TOPLINE & METHODOLOGY

Axios/Ipsos Survey: Abortion Attitudes/Alabama Supreme Court

Conducted by Ipsos using KnowledgePanel®
A survey of the American general population (ages 18+)
Interview dates: February 23-25, 2024
Number of interviews: 1,020
Number of Republican interviews: 291
Number of Democrat interviews: 324
Number of independent interviews: 301

Margin of error: +/- 3.3 percentage points at the 95% confidence level for all respondents
Margin of error: +/- 6.0 percentage points at the 95% confidence level for Republicans
Margin of error: +/- 5.8 percentage points at the 95% confidence level for Democrats
Margin of error: +/- 5.9 percentage points at the 95% confidence level for independents

NOTE: All results show percentages among all respondents, unless otherwise labeled. Reduced bases are unweighted values.

*NOTE: * = less than 0.5%, - = no respondents, N/A = not applicable*

Annotated Questionnaire:

1. How familiar, if at all, are you with the following?

Total Familiar Summary

	Total (N=1,020)	Republican (N=291)	Democrat (N=324)	Independent (N=301)
A ruling by the Alabama Supreme Court that frozen embryos are people and people can be held legally responsible for destroying them	45%	34%	65%	42%
Former President Donald Trump considering supporting a nationwide ban on abortion at 16 weeks of pregnancy **[Base: Half Sample]**	40%	32%	53%	40%
A reported plan to push for a nationwide ban on abortion at 16 weeks of pregnancy **[Base: Half Sample]**	40%	31%	61%	34%
Some states considering bans on emergency contraceptives, also known as Plan B	38%	24%	60%	35%
A non-binary teen in Oklahoma dying following an alleged beating in a school bathroom	27%	14%	44%	23%

TOPLINE & METHODOLOGY

About the Study

This Axios/Ipsos poll was conducted February 23-25, 2024, by Ipsos using the probability-based KnowledgePanel®. This poll is based on a nationally representative probability sample of 1,020 adults age 18 or older. The sample includes 291 Republicans, 324 Democrats, and 301 independents.

The survey was conducted using KnowledgePanel, the largest and most well-established online probability-based panel that is representative of the adult U.S. population. Our recruitment process employs a scientifically developed addressed-based sampling methodology using the latest Delivery Sequence File of the USPS – a database with full coverage of all delivery points in the U.S. Households invited to join the panel are randomly selected from all available households in the U.S. Persons in the sampled households are invited to join and participate in the panel. Those selected who do not already have internet access are provided a tablet and internet connection at no cost to the panel member. Those who join the panel and who are selected to participate in a survey are sent a unique password-protected log-in used to complete surveys online. As a result of our recruitment and sampling methodologies, samples from KnowledgePanel cover all households regardless of their phone or internet status and findings can be reported with a margin of sampling error and projected to the general population. KnowledgePanel members receive a per survey incentive, usually the equivalent of $1 (though for some it is $2) in points, that can be redeemed for cash or prizes. No prenotification email for this study was sent prior to field. Panelists receive a unique login to the survey and are only able to complete it one time. One reminder email was sent for this study.

The data for the total sample were weighted to adjust for gender by age, race/ethnicity, education, Census region, metropolitan status, and household income. Party ID benchmarks are from recent multi-night ABC News polls. The demographic benchmarks came from the 2023 March Supplement of the Current Population Survey (CPS).

- Gender (Male, Female) by Age (18–29, 30–44, 45-59 and 60+)
- Race/Hispanic Ethnicity (White Non-Hispanic, Black Non-Hispanic, Other, Non-Hispanic, Hispanic, 2+ Races, Non-Hispanic)
- Education (Less than High School, High School, Some College, Bachelor or higher)
- Census Region (Northeast, Midwest, South, West)
- Metropolitan status (Metro, non-Metro)
- Household Income (Under $25,000, $25,000-$49,999, $50,000-$74,999, $75,000-$99,999, $100,000-$149,999, $150,000+)
- Party ID (Democrat, Republican, Independent, Something else)

The margin of sampling error is plus or minus 3.3 percentage points at the 95% confidence level, for results based on the entire sample of adults. The margin of sampling error takes into account the design effect, which was 1.17. For Republicans, the margin of sampling error is plus or minus 6.0 percentage points at the 95% confidence level. The design effect for Republicans is 1.10. For Democrats, the margin of sampling error is plus or 5.8 percentage points at the 95% confidence level. The design effect for Democrats is 1.12. For independents, the margin of sampling error is plus or minus 5.9 percentage points at the 95% confidence level. The design effect for independents is 1.09. The margin of sampling error is

higher and varies for results based on sub-samples. Sampling error is only one potential source of error. There may be other unmeasured non-sampling error in this or any poll. In our reporting of the findings, percentage points are rounded off to the nearest whole number. As a result, percentages in a given table column may total slightly higher or lower than 100%. In questions that permit multiple responses, columns may total substantially more than 100%, depending on the number of different responses offered by each respondent.
