TOPLINE & METHODOLOGY

About the Study

This Ipsos poll was conducted February 26-28, 2024, by Ipsos for Reuters using the probability-based KnowledgePanel®. This poll is based on a representative probability sample of 1,185 general population adults age 18 or older in the United States. The sample includes 337 Democrats, 357 Republicans, and 359 Independents.

The margin of sampling error for this study is plus or minus 3.0 percentage points at the 95% confidence level, for results based on the entire sample of adults. The margin of sampling error takes into account the design effect, which was 1.10. The margin of sampling error is higher and varies for results based on other sub-samples. In our reporting of the findings, percentage points are rounded off to the nearest whole number. As a result, percentages in a given table column may total slightly higher or lower than 100%. In questions that permit multiple responses, columns may total substantially more than 100%, depending on the number of different responses offered by each respondent. The poll also has a margin of plus or minus 5.5 percentage points for Democrats, plus or minus 5.3 percentage points for Republicans, and plus or minus 5.3 percentage points for independents. The margin of sampling error takes into account the design effect, which is 1.05 among Democrats, 1.03 among Republicans, and 1.04 among independents.

The survey was conducted using KnowledgePanel, the largest and most well-established online probability-based panel that is representative of the adult U.S. population. Our recruitment process employs a scientifically developed addressed-based sampling methodology using the latest Delivery Sequence File of the USPS – a database with full coverage of all delivery points in the US. Households invited to join the panel are randomly selected from all available households in the U.S. Persons in the sampled households are invited to join and participate in the panel. Those selected who do not already have internet access are provided a tablet and internet connection at no cost to the panel member. Those who join the panel and who are selected to participate in a survey are sent a unique password-protected log-in used to complete surveys online. As a result of our recruitment and sampling methodologies, samples from KnowledgePanel cover all households regardless of their phone or internet status and findings can be reported with a margin of sampling error and projected to the general population.

The data for the total sample were weighted to adjust for gender by age, race/ethnicity, Census region, education, household income, metropolitan status, and political party identification. The demographic benchmarks came from the 2023 March Supplement of the Current Population Survey (CPS). Political Party Benchmarks came from high quality polling. More details about the weighting benchmarks for this study can be found below:

- Gender (Male, Female) by Age (18–29, 30–44, 45–59, and 60+)
- Race/Hispanic Ethnicity (White Non-Hispanic, Black Non-Hispanic, Other or 2+ Races Non-Hispanic, Hispanic)
- Education (High School graduate or less, Some College, Bachelors and beyond)
- Census Region (Northeast, Midwest, South, West)
- Metropolitan status (Metro, non-Metro)
- Household Income (Under $25,000, $25,000-$49,999, $50,000-$74,999, $75,000-$99,999, $100,000-$149,999, $150,000+)
- Political party (Republican, Democrat, Independent, Other/Not Asked/Skipped)

TOPLINE & METHODOLOGY

This topline is trended with data from eight previous Reuters/Ipsos polls. The 2023 polls were conducted using an opt-in panel while the 2024 polls were fielded using the KnowledgePanel. This change may have generated a mode effect from the 2023 to the 2024 data. Additionally, the 2024 polls allow respondents to skip questions while the 2023 polls do not.

- The early June 2023 poll, conducted June 9-12, 2023, includes 1,005 Americans and has a credibility interval of plus or minus 3.8 percentage points.
- The late June 2023 poll, conducted June 26-27, 2023, includes 1,004 Americans and has a credibility interval of plus or minus 3.8 percentage points.
- The August 2023 poll, conducted August 14-15, 2023, includes 1,005 Americans and has a credibility interval of plus or minus 3.8 percentage points.
- The early October 2023 poll, conducted October 3-4, 2023, includes 1,005 Americans and has a credibility interval of plus or minus 3.8 percentage points.
- The late October 2023 poll, conducted October 12-13, 2023, includes 1,003 Americans and has a credibility interval of plus or minus 3.8 percentage points.
- The November 2023 poll, conducted November 13-14, 2023, includes 1,006 Americans and has a credibility interval of plus or minus 3.8 percentage points.
- The January 2024 poll, conducted January 22-24, 2024, includes 1,250 Americans and has a margin of error of plus or minus 2.86 percentage points at the 95% confidence interval.
- The early February 2024 poll, conducted February 9-12, 2024, includes 1,237 Americans and has a margin of error of plus or minus 2.91 percentage points at the 95% confidence interval.

KNOWLEDGEPANEL® | OVERVIEW

Be Sure with KnowledgePanel®

Ensuring accuracy with an industry leading representative random sample, exceptional response rates and coverage

KnowledgePanel has been at the forefront of conducting online research for more than two decades. Backed by scientific design, statistical rigor and sector expertise, it provides consistently high-quality measurement.

KnowledgePanel is the largest probability-based online panel in the U.S.—with about 55,000 members. Our research capability spans all industries from public health to commercial services and products. We have the most experienced analysts and online panel research team in the industry. And, with thousands of profile variables, we can reach all with the cost benefit of online survey administration without sacrificing accuracy.

With address-based sampling (ABS), KnowledgePanel provides a statistically valid representation of the U.S. population as well as many difficult-to-survey populations:

- cellphone-only households
- African Americans
- Latinos
- young adults (ages 15+)

Rigorous design, superior coverage, panel size and sound methodology make KnowledgePanel® the most suitable choice for a broad range of commercial, academic, and governmental applications.

The key design advantages of KnowledgePanel

- **We address self-selection bias by choosing respondents.** Our efficient sample design uses a single sampling frame: the Delivery Sequence File (DSF) of the United States Postal Service, covering almost 100% of the U.S. population.
- **We address participant fatigue by ensuring minimal survey burden.** Panelists take on average two KnowledgePanel surveys a month, minimizing respondent fatigue and attrition. Our research has highlighted a stark difference in the burden on KnowledgePanel members compared to opt-in participants:

Panel Hygiene

Number of surveys in a typical month from all sources:

We would like to think about surveys you take online over the internet. About how many ONLINE surveys would you estimate that you complete in a typical month?

	KP Members	Opt-in
Mean	7.25	26.8
Median	5	15

About 80+ percent of KP members only belong to KnowledgePanel. The same stat of solo panel membership for Opt-in samples is at 33.

- **We address mode bias.** Mixed-mode effects have been found with dual-mode online and telephone methods. KnowledgePanel provides non-internet households with a netbook and internet service to enable a single mode of data collection. The example below highlights the impact of mode on the responses of similar demographic groups:

Question		Telephone	Online
Do you favor or oppose providing a legal way for illegal immigrants already in the country to become citizen?	Strongly favor	33.3*	20.3
	Somewhat favor	31.8	34.5
	Somewhat oppose	11.5	24.1
	Strongly oppose	23.4	21.1

**significant difference by mode at 95% confidence*

- **We address coverage bias.** We provide coverage of hard-to-reach populations such as Hispanics across all acculturation levels, minority young adults, low income households, populations with low educational attainment, youth and pre-teens.

- **We address coverage of U.S. Hispanics.** You no longer need to rely on expensive and problematic methods when conducting Hispanic research. KnowledgePanel Latino[SM] has reinvented research to meet the needs of the online survey age without sacrificing population representation and the sound sampling principles you expect. We uniquely cover about 93% of U.S. Latino households. This encompasses Spanish- and English-dominant and bilingual households alike, as well as U.S. Latinos who do not have access to the internet at least occasionally.
- **We address non-response bias.** We lead the online research industry in terms of the proportion of the respondent pool that actually participates in our research. This is partly the result of our efforts to "convert" non-responders.
- **We can calibrate.** KnowledgePanel Calibration[SM] meets the needs of studies involving either exceptionally large sample sizes or the targeting of very small sub-populations/local geographies. This blended web sample approach is an effective methodology when compared to conducting the survey exclusively with non-probability opt-in panels. When calibrated, the combined sample sources—KnowledgePanel and opt-in online samples—result in higher accuracy over the use of an opt-in sample alone.

We know our panelists. We maintain an extensive, multi-year database of more than 2,000 profile variables based on survey respondents. Updated annually, the database is used to identify unique subgroups that are otherwise unattainable online. With the breadth of Ipsos KnowledgePanel profiles, we are able to:

- target the specific survey respondents you need, so that you don't need to waste valuable time in your custom survey
- integrate analytic value from profile packages—this might include, but is not limited to, information about political affairs, lifestyle, media, shopping habits, financial views, technological sophistication and more
- create custom panels based on collected characteristics, behaviors and attitudes of Ipsos KnowledgePanel members, eliminating the cost of newly recruiting a panel

Ipsos expertise applied

We believe that the true value to you of working with our company lies in the knowledge of our people and having their know-how and creativity, motivation and commitment applied to your needs. KnowledgePanel alone cannot tell a story, provide actionable recommendations or create the best survey or sample design to find them either, but Ipsos' experts can. Our team members combine and apply their industry experience and specialist knowledge to every project—so you can be assured you'll not only receive the best survey/sample design but the best insight on which to act too.

Understanding the public sector

Ipsos KnowledgePanel is the trusted source of relevant public opinion information that enables its clients to make smarter decisions. Our experts combine their passion with Ipsos' long-standing data science experience. This allows us to deliver vital global insights matched with local intelligence from more than 100 countries. By using innovative technologies and data sciences, we turn big data into smart data, enabling its clients to address critical concerns in public policy, health policy and services, epidemiology, environmental protection, political science, sociology, social psychology, and many other fields.
