Country: United States

Title: Pew Research Center: American Trends Panel Wave 145

Survey Organizations: Ipsos

Sponsors: Pew Research Center

Field Dates: April 1 - 7, 2024

Sample: National adults who had previously completed both of ATP Waves 132 and 143, including oversamples of non-Hispanic Asian adults, non-Hispanic Black men, and Hispanic men

Sample Size: 3600

Interview Modes: Web-based survey

Weight Location: Columns 390-397 (xxx.xxxx) -- Varname: WEIGHT_W145

Usage Notes: See documentation for detailed summaries on response rates for this study. Not all demographic variables from the Demographic Profile Questionnaire are included on every survey. Variables for these questions can be found at the end of the dataset; these variables have the prefix “F_” to denote that they are “frame” profile variables, which are not asked every wave.

Please note that data provided by the Roper Center for Public Opinion Research may not be re-disseminated without written permission. The results of any analyses conducted on the data may, however, be published with appropriate acknowledgments and source citation.

Methodology

The American Trends Panel survey methodology

Overview

The American Trends Panel (ATP), created by Pew Research Center, is a nationally representative panel of randomly selected U.S. adults. Panelists participate via self-administered web surveys. Panelists who do not have internet access at home are provided with a tablet and wireless internet connection. Interviews are conducted in both English and Spanish. The panel is being managed by Ipsos.

Data in this report is drawn from ATP Wave 145, conducted from April 1 to April 7, 2024 among a sample of ATP members who had previously completed both of ATP Waves 132 and 143, and includes an oversample of non-Hispanic Asian adults, non-Hispanic Black men, and Hispanic men in order to provide more precise estimates of the opinions and experiences of these smaller demographic subgroups. These oversampled groups are weighted back to reflect their correct proportions in the population. A total of 3,600 panelists responded out of 3,776 who were sampled, for a response rate of 95%. The cumulative response rate accounting for nonresponse to the recruitment surveys and attrition is 3%. The break-off rate among panelists who logged on to the survey and completed at least one item is 1%. The margin of sampling error for the full sample of 3,600 respondents is plus or minus 2.1 percentage points.

Panel recruitment

The ATP was created in 2014, with the first cohort of panelists invited to join the panel at the end of a large, national, landline and cellphone random-digit-dial survey that was conducted in both English and Spanish. Two additional recruitments were conducted using the same method in 2015 and 2017, respectively. Across these three surveys, a total of 19,718 adults were invited to join the ATP, of whom 9,942 (50%) agreed to participate.

In August 2018, the ATP switched from telephone to address-based sampling (ABS) recruitment. A study cover letter and a pre-incentive are mailed to a stratified, random sample of households selected from the U.S. Postal Service's Delivery Sequence File. This Postal Service file has been estimated to cover as much as 98% of the population, although some studies suggest that the coverage could be in the low 90% range.[1] Within each sampled household, the adult with the next

[1] AAPOR Task Force on Address-based Sampling. 2016. "AAPOR Report: Address-based Sampling."

birthday is asked to participate. Other details of the ABS recruitment protocol have changed over time but are available upon request.[2]

We have recruited a national sample of U.S. adults to the ATP approximately once per year since 2014. In some years, the recruitment has included additional efforts (known as an "oversample") to boost sample size with underrepresented groups. For example, Hispanic adults, Black adults and Asian adults were oversampled in 2019, 2022 and 2023, respectively.

American Trends Panel recruitment surveys

Recruitment dates	Mode	Invited	Joined	Active panelists remaining
Jan. 23 to March 16, 2014	Landline/ cell RDD	9,809	5,338	1,390
Aug. 27 to Oct. 4, 2015	Landline/ cell RDD	6,004	2,976	831
April 25 to June 4, 2017	Landline/ cell RDD	3,905	1,628	404
Aug. 8 to Oct. 31, 2018	ABS	9,396	8,778	3,844
Aug. 19 to Nov. 30, 2019	ABS	5,900	4,720	1,386
June 1 to July 19, 2020; Feb. 10 to March 31, 2021	ABS	3,197	2,812	1,438
May 29 to July 7, 2021; Sept. 16 to Nov. 1, 2021	ABS	1,329	1,162	731
May 24 to Sept. 29, 2022	ABS	3,354	2,869	1,449
April 17 to May 30, 2023	ABS	686	576	433
	Total	**43,580**	**30,859**	**11,906**

Note: RDD is random-digit dial; ABS is address-based sampling. Approximately once per year, panelists who have not participated in multiple consecutive waves or who did not complete an annual profiling survey are removed from the panel. Panelists also become inactive if they ask to be removed from the panel.

PEW RESEARCH CENTER

Across the six address-based recruitments, a total of 23,862 adults were invited to join the ATP, of whom 20,917 agreed to join the panel and completed an initial profile survey. Of the 30,859 individuals who have ever joined the ATP, 11,906 remained active panelists and continued to receive survey invitations at the time this survey was conducted.

The American Trends Panel never uses breakout routers or chains that direct respondents to additional surveys.

Sample design

The overall target population for this survey was noninstitutionalized persons ages 18 and older living in the U.S., including Alaska and Hawaii. It featured a stratified random sample of active ATP members who completed both ATP Wave 132 and Wave 143. Among the panelists who met these criteria, Hispanic men, non-Hispanic Black men and non-Hispanic Asian adults were selected with certainty. The remaining panelists were sampled at rates designed to ensure that the share of respondents in each stratum is proportional to its share of the U.S. adult population to the

[2] Email pewsurveys@pewresearch.org.

greatest extent possible. Respondent weights are adjusted to account for differential probabilities of selection as described in the Weighting section below.

Questionnaire development and testing

The questionnaire was developed by Pew Research Center in consultation with Ipsos. The web program was rigorously tested on both PC and mobile devices by the Ipsos project management team and Pew Research Center researchers. The Ipsos project management team also populated test data that was analyzed in SPSS to ensure the logic and randomizations were working as intended before launching the survey.

Incentives

All respondents were offered a post-paid incentive for their participation. Respondents could choose to receive the post-paid incentive in the form of a check or a gift code to Amazon.com or could choose to decline the incentive. Incentive amounts ranged from $5 to $20 depending on whether the respondent belongs to a part of the population that is harder or easier to reach. Differential incentive amounts were designed to increase panel survey participation among groups that traditionally have low survey response propensities.

Data collection protocol

The data collection field period for this survey was April 1 to April 7, 2024. Postcard notifications were mailed to a subset of ATP panelists[3] with a known residential address on April 1.

Invitations were sent out in two separate launches: soft launch and full launch. Sixty panelists were included in the soft launch, which began with an initial invitation sent on April 1. The ATP panelists chosen for the initial soft launch were known responders who had completed previous ATP surveys within one day of receiving their invitation. All remaining English- and Spanish-speaking sampled panelists were included in the full launch and were sent an invitation on April 2.

All panelists with an email address received an email invitation and up to two email reminders if they did not respond to the survey. All ATP panelists who consented to SMS messages received an SMS invitation and up to two SMS reminders.

[3] Postcard notifications are sent to 1) panelists who have been provided with a tablet to take ATP surveys, 2) panelists who were recruited within the last two years, and 3) panelists recruited prior to the last two years who opt to continue receiving postcard notifications.

Invitation and reminder dates, ATP Wave 145

	Soft launch	Full launch
Initial invitation	April 1, 2024	April 2, 2024
First reminder	April 4, 2024	April 4, 2024
Final reminder	April 6, 2024	April 6, 2024

PEW RESEARCH CENTER

Data quality checks

To ensure high-quality data, the Center's researchers performed data quality checks to identify any respondents showing clear patterns of satisficing. This includes checking for whether respondents left questions blank at very high rates or always selected the first or last answer presented. As a result of this checking, one ATP respondent was removed from the survey dataset prior to weighting and analysis.

Weighting

The ATP data is weighted in a multistep process that accounts for multiple stages of sampling and nonresponse that occur at different points in the survey process. First, each panelist begins with a base weight that reflects their probability of selection for their initial recruitment survey. These weights are then rescaled and adjusted to account for changes in the design of ATP recruitment surveys from year to year. Finally, the weights are calibrated to align with the population benchmarks in the accompanying table to correct for nonresponse to recruitment surveys and panel attrition. If only a subsample of panelists was invited to participate in the wave, this weight is adjusted to account for any differential probabilities of selection.

American Trends Panel weighting dimensions

Variable	Benchmark source
Age (detailed) Age x Gender Education x Gender Education x Age Race/Ethnicity x Education Black (alone or in combination) x Hispanic Born inside vs. outside the U.S. among Hispanics and Asian Americans Years lived in the U.S. Census region x Metropolitan status	2022 American Community Survey (ACS)
Volunteerism	2021 CPS Volunteering & Civic Life Supplement
Party affiliation x Voter registration	2022 CPS Voting and Registration Supplement
Party affiliation x Race/Ethnicity Frequency of internet use Religious affiliation	2023 National Public Opinion Reference Survey (NPORS)

Note: Estimates from the ACS are based on noninstitutionalized adults. Voter registration is calculated using procedures from Hur, Achen (2013) and rescaled to include the total U.S. adult population.

PEW RESEARCH CENTER

Among the panelists who completed the survey, this weight is then calibrated again to align with the population benchmarks identified in the accompanying table and trimmed at the 2nd and 98th percentiles to reduce the loss in precision stemming from variance in the weights. This trimming is performed separately among non-Hispanic Black, non-Hispanic Asian, Hispanic and all other respondents. Sampling errors and tests of statistical significance take into account the effect of weighting.

The following table shows the unweighted sample sizes and the error attributable to sampling that would be expected at the 95% level of confidence for different groups in the survey.

Sample sizes and margins of error, ATP Wave 145

Group	Unweighted sample size	Plus or minus ...
Total sample	3,600	2.1 percentage points

Note: This survey includes oversamples of Hispanic men, non-Hispanic Black men and non-Hispanic Asian adults respondents. Unweighted sample sizes do not account for the sample design or weighting and do not describe a group's contribution to weighted estimates. See the Sample design and Weighting sections above for details.

PEW RESEARCH CENTER

Sample sizes and sampling errors for other subgroups are available upon request. In addition to sampling error, one should bear in mind that question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.

Dispositions and response rates

Final dispositions, ATP Wave 145

RECOMMENDED CITATION

Pew Research Center, February 2019, "Growing and Improving Pew Research Center's American Trends Panel"

About Pew Research Center

Pew Research Center is a nonpartisan fact tank that informs the public about the issues, attitudes and trends shaping the world. It does not take policy positions. It conducts public opinion polling, demographic research, content analysis and other data-driven social science research. The Center studies U.S. politics and policy; journalism and media; internet, science and technology; religion and public life; Hispanic trends; global attitudes and trends; and U.S. social and demographic trends. All of the Center's reports are available at www.pewresearch.org. Pew Research Center is a subsidiary of The Pew Charitable Trusts, its primary funder.

Growing and Improving Pew Research Center's American Trends Panel

The panel was the main data source for most of the Center's reports on U.S. political and social attitudes and behavior in 2018

Pew Research Center's American Trends Panel (ATP) is now the Center's principal source of data for U.S. public opinion research. This nationally representative survey panel will turn 5 early this year. Since its creation in 2014, the panel has grown substantially and changed in many ways. The first cohort of recruited panelists consisted of 5,338 adults, of whom 4,266 took part in at least one survey. The average sample size of a typical wave for this cohort was just over 3,200. Following three more recruitments, the panel now has 13,569 active panelists with the most recent interview wave producing 10,618 online interviews.

This report provides a portrait of the panel as it now exists and describes how its methodology has evolved. It also discusses the ongoing challenges survey research is facing and how the American Trends Panel and other surveys are dealing with them.

Why a survey panel?

For several decades, most political and social surveys of the U.S. general public were conducted by telephone. In the vast majority of these, respondents were interviewed only once. But changing social and communications habits and the growth of privacy concerns have caused phone survey response rates to decline. Despite this, telephone surveys continue to provide accurate data, a point reinforced by the generally good performance of election polls conducted by phone in the 2018 midterm elections. That said, declining response rates and the shift from landlines to cellphones has led to dramatic increases in the cost of conducting high-quality telephone surveys.

While these changes were occurring, other trends were making self-administered surveys – and online surveys in particular – more appealing. Internet access was expanding, smartphone use was growing, and survey methodologists were demonstrating the measurement advantages of self-administration for surveys. The number of surveys conducted online boomed over the past two decades as businesses moved most of their market research to the web and academic users found the combination of low cost and ease of experimentation very appealing.

These trends led to a revival of interest in survey panels – a set of respondents who agree to take repeated interviews over time, thus reducing the need to sample, contact and persuade new respondents each time new data are needed. Panels are hardly a recent invention, but there has

been a relatively recent growth in demand for high-quality *online* panels that use random samples. It was in this context that Pew Research Center decided to create the American Trends Panel in 2014.

Panels have many attractive characteristics when compared with survey designs that conduct only one interview with a sampled individual. Most notable is cost. Panels are expensive to build and properly maintain but, over time, yield interviews that are significantly cheaper than one-off surveys. Survey participation rates among active panelists are quite high (nearly 80%, on average, among ATP members), meaning that less effort is expended in obtaining a desired sample size. But the benefits of survey panels extend far beyond cost.

Because the same individuals are participating in multiple surveys over time, researchers can assemble a sizable amount of information about each person. Once a profile of each panelist's attitudinal, social, demographic and political characteristics has been collected, subsequent surveys need not ask many of these questions again. This frees up questionnaire space for the more substantive questions of interest to researchers, as well as creates a rich and multidimensional portrait of each panelist. Because people tend to remain in panels for a long time (more than half of those who took part in an American Trends Panel survey in 2014 are still actively taking surveys four years later) it is possible to track individual-level change over time in behaviors and attitudes like opinions of the president.

Methods

The design of the American Trends Panel, like all surveys, involved numerous trade-offs. A popular joke in the survey research profession says that three things are valued above all: quality, speed and affordability. The punchline is that you can have any two of three that you want. The ATP is not immune to this problem.

It's not quite as bad as that in practice, but the fact of trade-offs is real. Fast data collection often means sacrificing some representativeness in the sample. Hard-to-reach and hard-to-interview respondents can be located and persuaded to cooperate (thus improving the representativeness of the sample), but that's often at considerable effort, time and cost. Resources devoted to reducing error in one aspect of a survey often means fewer resources can be devoted to some other aspect. Researchers at the Center constantly faced these issues as the ATP was built and as it has evolved.

The principal goal of the ATP was to provide a reliable, representative sample of adult Americans for the research needs of Pew Research Center. When it was created in 2014, it was seen as providing a supplement to the telephone surveys that were the core methodology being used for

the Center's U.S.-based political and social research. As telephone surveys have gotten more difficult and expensive to conduct, the panel has gradually become the primary data collection method for this research. It was the principal source of data for a majority of the Center's reports about U.S. political and social attitudes and behavior in 2018. That transformation required that the panel grow in size, provide faster turnaround and improve its ability to represent the population accurately.

What follows is a description of the choices, decisions and results for each major aspect of building and operating the panel: recruitment, data collection, maintenance, weighting and costs.

Recruitment

Recruitment to the ATP has been conducted four times (2014, 2015, 2017 and 2018).[1] Invitations to potential panelists for the first two recruitments were made at the end of large and lengthy random-digit-dial (RDD) telephone surveys that dealt primarily with political topics. In planning the third recruitment, researchers decided to use a shorter custom RDD telephone survey that had little political content because of concerns that using a survey focused on politics increased the likelihood that the panel would be biased toward people who are especially interested in politics.

For the most recent recruitment, researchers decided to abandon the telephone altogether and shift to an address-based sample (ABS) of households selected from the U.S. Postal Service's Delivery Sequence File (DSF). A much higher share of those who responded to the mail-based recruitment survey agreed to join the panel than was the case for the three phone-based recruitments; 94% of those who completed the screening survey joined the panel, compared with about 50%, on average, from the three phone recruitments.

In addition, compared with the earlier panel cohorts, a much higher share of those who joined in the fourth recruitment have taken the regular surveys than was the case for those who joined after a phone recruitment. In the three telephone recruitments, a sizable share of those who agreed to join the panel never participated in a regular panel wave. By contrast, a far higher share of those in the fourth recruitment who agreed to join the panel have taken at least one of the available surveys.

[1] For details about the design and results of the initial recruitment, see "Building Pew Research Center's American Trends Panel."

The first three recruitments used dual-frame stratified RDD samples, with cellphone-to-landline ratios that were standard at Pew Research Center at the time of the data collection (50%-50% in 2014, 65%-35% in 2015 and 75%-25% in 2017).

For the 2018 ABS recruitment, the sample was designed to offset the somewhat lower response rates among Hispanics and African-Americans and to ensure adequate sample sizes of young adults. To achieve this goal, the sample was stratified using Census data and other information appended to the DSF, and households believed to belong to the targeted categories were sampled at a higher rate than others.

American Trends Panel recruitment surveys

Recruitment dates	Mode	Invited	Joined	Active panelists remaining
Jan. 23 to March 16, 2014	Landline/ cell RDD	9,809	5,338	2,515
Aug. 27 to Oct. 4, 2015	Landline/ cell RDD	6,004	2,976	1,471
April 25 to June 4, 2017	Landline/ cell RDD	3,905	1,628	806
Aug. 8, 2018–Oct. 31, 2018	ABS/web	9,396	8,778	8,777
	Total	**29,114**	**18,720**	**13,569**

Note: Approximately once per year, panelists who have not participated in multiple consecutive waves or who did not complete an annual profiling survey are removed from the panel. Panelists also become inactive if they ask to be removed from the panel. The number of active panelists in this table reflects the state of the panel on Dec. 31, 2018.
"Growing and Improving Pew Research Center's American Trends Panel"

PEW RESEARCH CENTER

The mailings in the fourth recruitment included a letter of introduction inviting recipients (and specifically, the adult in the household with the next upcoming birthday) to take the online survey, information about how to take the survey, $2 in cash as a pre-incentive and a promise of a $10 post-incentive for completing the survey. At the end of the survey, respondents were invited to join the panel.

Recruiting non-internet households

There is an obvious obstacle to achieving a nationally representative sample with an online survey: not everyone in the U.S. uses the internet. The share of adults who do not use the internet was estimated to be 11% in 2018. And while this is a relatively small group, its members are quite different demographically from those who go online. Accordingly, it is important to represent them in the panel. In its first two years, the ATP did so by providing the non-internet respondents with a paper questionnaire that they could return by mail. This approach meant that both the online and mail respondents were using a self-administered survey (as opposed to interviewing the non-internet group by telephone). But this approach had serious drawbacks. Many of the advantages of online administration, such as the ability to use automatic skipping of questions and branching in the questionnaire (asking different questions of different respondents based on

answers to previous questions), were impossible to replicate in the mail instrument. The mail questionnaire limited the number of different forms (or versions) of the questionnaire that could be employed. And producing a separate questionnaire and processing the mailings and returns required substantial administrative effort, as well as extending the time required to collect the data.

As a result of these issues, researchers made an effort in 2016 to convert the mail panelists to the web by supplying them with tablets, internet access and technical support. While two-thirds of the panelists taking surveys by mail at the time agreed to be converted to web, only 41% of the 574 actually followed through and began taking surveys on their tablets by the end of the year. A comparison of those who converted and those who did not showed – perhaps unsurprisingly – that age was a strong predictor of conversion. While half of those ages 50 to 64 (53%) converted, only 32% of those 65 and older did so. Education, sex, income and political engagement were not significant predictors of who would convert.

The third and fourth recruitments offered free tablets and internet service to all respondents who wanted to join the panel but lacked home internet access. A total of 125 tablet panelists were added in these recruitments, bringing the total number to 275, or 2% of all active panelists.

The underrepresentation of non-internet households remains a challenge for the ATP. Though they are a relatively small share of the adult population, these households are demographically quite different from those who do have home internet access. Nearly half of those in the panel without internet access are ages 65 and older, about six-in-ten have only a high school education or less and nearly half are nonwhite.

Interviewing

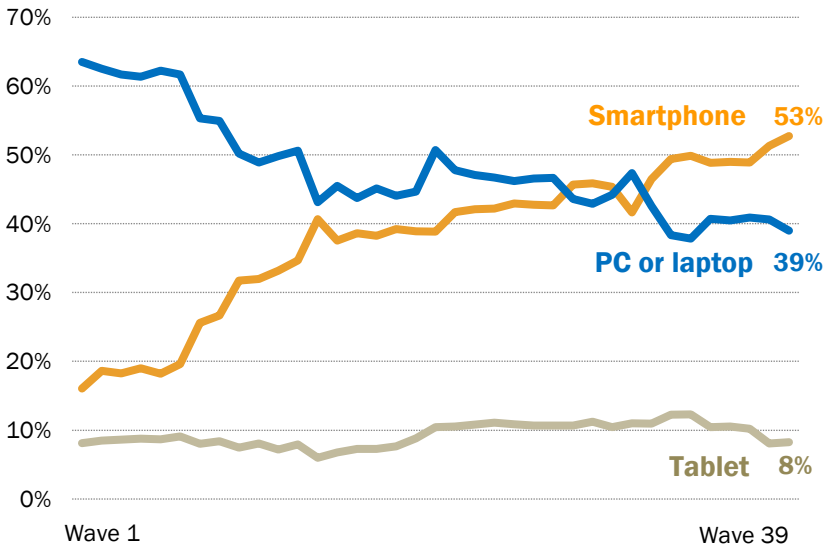

Panelists typically take at least one survey each month. The newly expanded panel makes it possible to conduct more than one survey per month by subsampling from the larger pool of panelists, but the volume of surveys may grow enough so that many panelists will be asked to complete two surveys in a month. This is still, by design, less frequent than many other probability-based panels in the U.S.

ATP panelists receive a survey invitation by email or text message if they have consented. Those who have been provided tablets are invited by text messages sent directly to their devices and are also sent a postcard informing them that a survey is ready. Panelists can access the survey online via the invitation. The survey is available to the panelist for approximately two weeks, and panelists can start the survey, pause, and return to it hours or days later if they choose.

When the panel began, nearly two-thirds of respondents took their surveys on a PC or laptop. That share declined quickly through 2014 and 2015 and has continued to gradually decline since then. In a November 2018 wave of the panel, just over half of the interviews were conducted on a smartphone, while 39% used a PC or laptop. About 8% took the survey on a tablet computer, a figure that has remained fairly stable since the panel was created.

Half of panel interviews are now conducted on a smartphone

% of interviews conducted on each device

PEW RESEARCH CENTER

Sampling for panel waves

The vast majority of panel waves conducted between 2014 and 2018 invited all active panelists to participate. In a late 2018 wave, 78% of panelists invited to take the survey did so, which is similar to the median completion rate for the ATP. Now that the panel has more than 10,000 members, full-panel surveys will become less common. Most studies at Pew Research Center do not require such large sample sizes. Thus, one of the benefits of the large panel is the ability to conduct surveys more frequently by subsampling so that the same individuals are not asked to take part too frequently. Prospective panelists are told during the recruitment process that they will be asked to take surveys "about once or twice a month."

Another benefit of subsampling is that samples can be tailored to be more representative of the public. As noted earlier, like most surveys, the panel has a disproportionately large number of certain kinds of people (e.g., college-educated individuals) and too few of others (e.g., young adults). Subsamples can be crafted to minimize these biases by undersampling certain groups and oversampling others. Doing so produces a sample that requires less aggressive weighting to align it with the population and, thus, a larger effective sample size. A recent subsampled wave produced an average design effect of 1.65, compared with typical design effects (at the time) of around 2.5 or higher for full sample waves.[2]

Weighting

A survey sample is a model of the population of interest. For the ATP, the population of interest is noninstitutionalized adults 18 and older living in the U.S. (50 states and the District of Columbia). Inevitably, survey samples will be imperfect models of the population. But they can be adjusted to better match the population through the process of weighting, which aligns characteristics of the sample to known population parameters.

Surveys like the ATP are typically weighted on demographic characteristics that are known to be associated with survey noncoverage and nonresponse or are related to important measures and concepts in the survey. They also are weighted to adjust for aspects of the sample design, such as the intentional oversampling or undersampling of certain kinds of individuals. The weighting of the ATP is very similar to that used in many types of U.S. political and social surveys but also has several unique elements that have been added to improve the accuracy of the data.

[2] The design effect is a measure of the impact of the sample design and survey weighting on the precision of estimates in the survey. Generally speaking, weighting to correct for sample design features (such as oversampling of certain groups) or nonresponse bias reduces the precision of the survey and is reflected in a larger design effect.

Base weighting

Since its inception, the ATP has been weighted in a multistep process that begins with a base weight incorporating the respondents' recruitment survey selection probability and the fact that some respondents were subsampled for invitation to the panel (in 2014 and again in 2017). Components of the base weight included information about the telephone sampling frames (for the three cohorts recruited by phone) and any relevant subsampling. Between 2014 and 2017, a second step computed a propensity score to adjust for differential nonresponse to the invitation to join the panel. This step has been discontinued, both because it was judged to provide little if any additional bias correction and because the fourth recruitment did not employ a telephone survey. Details on how the propensity adjustment was computed can be found here.

Iterative proportional fitting, or "raking"

The final step in the weighting uses an iterative technique that aligns the sample to population benchmarks on a variety of characteristics. This stage of weighting, often referred to as "raking," uses demographic characteristics that are reliably measured by the American Community Survey, including gender, age, education and race. Among Hispanics, the raking adjusts for place of birth (U.S. vs. elsewhere). Researchers have found that this helps correct for the underrepresentation of Hispanics who are immigrants. Two geographic variables used in the raking are U.S. Census region (four categories) and metropolitan status. The weighting also adjusts for internet access, using a measure from the American Community Survey. Party affiliation is also included in the raking to ensure proper representation of adults across the political spectrum. There is no official national parameter for party affiliation. Moreover, because it is an attitude rather than a demographic characteristic, it can change in response to political events. Accordingly, the target for party affiliation in the ATP is based on an average of the three most recent Pew Research Center telephone surveys that asked about party affiliation.

Weighting dimensions

Variable	Benchmark source
Age by gender Age by education Education by gender Race/ethnicity by education (including nativity among Hispanics)	2017 American Community Survey
Region x Metropolitan status	2018 CPS March Supplement
Volunteerism	2015 CPS Volunteer Supplement
Voter registration	2016 CPS Voting and Registration Supplement
Party affiliation	Average of the three most recent Pew Research Center telephone surveys.
Internet access	2017 American Community Survey

Note: Estimates from the ACS are based on non-institutionalized adults. Voter registration is calculated using procedures from Hur and Achen (2013) and rescaled to include the total US adult population.
"Growing and Improving Pew Research Center's American Trends Panel"

PEW RESEARCH CENTER

Correcting for the overrepresentation of civic and political engagement

Social and political surveys are known to overrepresent people who are politically engaged and who take part in volunteer activities. The American Trends Panel is no exception to this phenomenon. Because the panel is often used to study topics related to political and civic engagement, researchers decided to add volunteer activity as a raking variable in early 2016. A reliable national parameter is available because volunteering is measured regularly on the Current Population Survey's Civic Engagement Supplement. Previous research by Pew Research Center showed that correcting for the bias in volunteer activity has almost no effect on measures of public opinion but does reduce reported levels of social activity and community involvement such as talking with neighbors or attending religious services.

Bias in political engagement is somewhat more complicated. While adding volunteering to the weighting helps to reduce the overrepresentation of the politically engaged, it does not eliminate the bias completely. A first step at addressing this was taken in 2017 with the third recruitment to the ATP. Rather than appending the recruitment to a survey focused mostly on politics (as the first two recruitments did), a dedicated recruitment survey with relatively little political content (and considerably fewer questions) was used.

This change resulted in a recruitment cohort that was approximately 10 percentage points less likely to be registered to vote than the first two cohorts. But the share who are registered remained somewhat higher than the true population value. Researchers decided to add voter registration to the raking, starting with the first wave after the summer 2018 refreshment was completed (November 2018). The parameter for this variable was taken from the 2016 Current Population Survey Voting and Registration Supplement, adjusted for actual turnout as described by Hur and Achen (2013) and implemented by Michael McDonald.

Who's in the panel?

The panel contains a broad cross-section of the U.S. adult population. Fully one-quarter of panelists are nonwhite, one-in-five have family incomes below $30,000 and nearly half are under the age of 50. But the sample reflects shortcomings that are typical of public opinion surveys. Nonwhites, people under 30, Spanish-speaking Hispanics and people with only a high school education or less are underrepresented, while registered voters, non-Hispanic whites and college graduates are overrepresented. Higher incentives to young people, minorities, the less-educated and the politically disengaged help to keep these harder-to-survey groups participating but does not completely solve the problem. Weighting (discussed above) addresses the demographic imbalances in the sample for variables that are used in the weighting and mitigates the bias in many other variables such as attendance at religious services and interest in politics.

Demographic and political composition of the panel

%

	Weighted	Unweighted
Male	48	44
Female	52	56
18-29	21	13
30-49	33	34
50-64	26	30
65+	20	23
White	64	73
Black	11	9
Hispanic	15	10
Other	8	7
College grad	31	53
Some college	32	31
HS or less	37	15
$75,000 or more	32	44
$30,000-$74,999	33	33
Less than $30,000	30	19
Republican/lean Rep	43	41
Democrat/lean Dem	52	56
No lean	5	4
Certain registered to vote	68	83
Probably registered	8	5
Not registered	17	9

PEW RESEARCH CENTER

Costs

While the exact cost of Pew Research Center's surveys is confidential, it is possible to describe the *relative* costs of various data collection methods. The American Trends Panel required a large initial investment to create its management and data infrastructure. The four recruitments conducted since early 2014 were also expensive, though the first two took advantage of some cost savings since the recruitment request was appended to the end of a telephone survey that was funded for a different purpose. The third and fourth recruitments were conducted primarily for recruitment to the panel. Collectively, the recruitment costs are a part of what might be described as the total cost of ownership of the panel. Adding to the overall cost is the migration of mail mode panelists to tablet computers in 2016 and the cost of providing tablets to new recruits in 2017 and 2018.

Conducting each wave of the panel incurs additional vendor costs in management, programming, data collection, respondent incentives and data processing. There are also expenses associated with the ongoing management and maintenance of the panel, including keeping track of panelists as they move, responding to questions and inquiries from panelists, paying the cellular plan costs for the panelists who were provided a tablet and providing technical support to these panelists.

Considering the full costs of panel creation, recruitment, management and maintenance, plus survey-specific expenses, a 15-minute panel interview is considerably less expensive than a dual-frame RDD interview with the same substantive content. Even with the survey-specific and ongoing management and maintenance expenses, interviewing a large panel sample online is inherently less costly than either a telephone survey (because of the cost of interviewing) or a one-time online survey (because the full costs of sampling and contacting potential respondents is incurred). Over time, panel interviews become less expensive as the sunk costs are spread across a larger number of interviews. The longer a panel member is in a panel, the less expensive they become on cost-per-complete basis.

Contractors

Pew Research Center works with Ipsos, an international market and opinion research organization, to recruit panelists, manage the panel and conduct the surveys. Ipsos also manages KnowledgePanel, a very large probability-based online panel similar to the American Trends Panel. Ipsos is the third contractor to work with Pew Research Center on the project. Abt Associates assisted Pew Research Center in designing and building the panel in 2014. They managed the panel until December 2017, when GfK was hired to do this work. GfK was acquired by Ipsos in October 2018. All of the GfK key staff working on the ATP remained in their same roles at Ipsos.

Appendix D: Sources and details for benchmarks

Topic: Civic engagement

Benchmark item	Source	Question text	Response category	Benchmark estimate (%)	Notes
Talked with neighbors	CPS Civic Engagement Supplement (Nov 2013)	During a typical month in the past year, how often did you talk with any of your neighbors?	Basically every day	12.1	
			A few times a week	28.9	
			A few times a month	21.6	
			Once or less than once a month	19.5	
			Not at all	12.3	
Trusts neighbors	CPS Civic Engagement Supplement (Nov 2013)	How much do you trust the people in your neighborhood? In general, do you trust …	All of the people in your neighborhood	13.7	
			Most of the people in your neighborhood	37.3	
			Some of the people in your neighborhood	33.2	
			None of the people in your neighborhood	8.6	
Participated in a school group, neighborhood, or community association	CPS Civic Engagement Supplement (Nov 2013)	In the last 12 months, that is since June 2015, have you participated in a school group, neighborhood, or community association such as PTA or neighborhood watch group?	Yes	13.7	
			No	82.1	
Volunteered	CPS Volunteer Supplement (Sep 2015)	In the last 12 months, that is since June of last year, have you done any volunteer activities through or for an organization? Sometimes people don't think of activities they do infrequently or activities they do for children's schools or youth organizations as volunteer activities. Since June of last year, have you done any of these types of volunteer activities?	Yes	24.8	The variable used to produce this estimate is a recode of two Yes/No questions from the CPS. The second question clarifies the definition of 'volunteer activities' and is asked if respondents skipped or answered no to the first question.
			No	75.0

Benchmark item	Source	Question text	Response category	Benchmark estimate (%)	Notes
Employment status	General Social Survey (2016)	Last week, were you working full time, part time, going to school, keeping house, or what?	Working full time	47.2	
			Working part time	13.2	
			With a job, but not at work because of temporary illness, vacation, strike	1.9	
			Unemployed, laid off, looking for work	4.2	
			Retired	17.0	
			In school	3.2	
			Keeping house	10.3	
Home ownership	American Community Survey (2015)	Is your house, apartment, or mobile home ...	Owned by you or someone in this household with a mortgage or loan.	43.1	On the ACS, this question was not asked of people who lived in non-institutional group quarters (such as dormitories).
			Owned by you or someone in this household free and clear	22.2	
			Rented	31.4	
			Occupied without payment of rent	1.6	
Family income	CPS Annual Social and Economic Supplement (Mar 2016)	Which category represents the total combined income of all members of your FAMILY during the past 12 months? This includes money from jobs, net income from business, farm or rent, pensions, dividends, interest, social security payments and any other money income received by members of your family who are 15 years of age or older.	Less than $5,000	2.6	
			$5,000 to $7,499	1.4	
			$7,500 to $9,999	1.9	
			$10,000 to $12,499	2.5	
			$12,500 to $14,999	2.5	
			$15,000 to S19,999	3.9	
			$20,000 to $24,999	5.1	
			$25,000 to $29,999	5.4	
			$30,000 to $34,999	5.5	
			$35,000 to $39,999	5.1	
			$40,000 to $49,999	8.6	
			$50,000 to $59,999	8.3	
			$60,000 to $74,999	10.4	
			$75,000 to $99,999	12.5	
			$100,000 to $149,999	13.0	
			$150,000 to more	11.2

PEW RESEARCH CENTER

Topic: Personal

Benchmark item	Source	Question text	Response category	Benchmark estimate (%)	Notes
Lived in house or apartment one year ago	American Community Survey (2015)	Did you live in your house or apartment one year ago?	Same house	85.7	
			Different house in US	13.6	
			Different house outside US	0.7	
Active duty military service	American Community Survey (2015)	Have you ever served on active duty in the U.S. Armed Forces, Reserves, or National Guard?	Have been on active duty	8.0	The variable used to produce this estimate is a recode that collapses people who are currently on active duty and people who were on active duty in the past, and does not consider Reserves or National Guard as active duty.
			Have never been on active duty	92.0	
U.S. citizenship	American Community Survey (2015)	Are you a citizen of the United States?	Yes, a U.S. citizen	91.6	
			No, not a U.S. citizen	8.4	
Gun ownership	General Social Survey (2016)	Do you happen to have in your home or garage any guns or revolvers?	Yes	31.7	
			No	65.4	
Smoking	National Health Interview Survey (2015)	Have you smoked at least 100 cigarettes in your ENTIRE LIFE? Do you NOW smoke cigarettes every day, some days, or not at all?	Smoke every day	11.4	The variable used to produce this estimate collapses two questions from the NHIS.
			Smoke some days	3.7	
			No longer smoke	21.8	
			Have never smoked	62.8	
Food allergies	National Health and Nutrition Examination Survey (2007)	Do you have any food allergies?	Yes	10.0	The NHANES 2007 was used due to this question not having been asked in NHANES 2016.
			No	89.8

PEW RESEARCH CENTER

Topic: Political engagement

Benchmark item	Source	Question text	Response category	Benchmark estimate (%)	Notes
Voted in 2012	CPS Voting and Registration Supplement (Nov 2012)	In the 2012 presidential election between Barack Obama and Mitt Romney, did things come up that kept you from voting, or did you happen to vote?	Voted	50.2	These estimates use the adjustment recommended in Hur and Achen (2013) to correct for bias resulting from the fact that item nonrespondents are treated as not having voted in the CPS. Adjustment factors for 2012 can be found at: http://www.electproject.org/home/voter-turnout/cps-methodology These estimates are further adjusted to approximate the percentage of adults in 2016 who voted in 2012. The adjustment was done by using the ACS to break out the total adult population in 2016 by citizenship, age group and race. Each break was then multiplied by the probability that said group voted 4 years ago (in 2012), obtained from the CPS. Finally, the breaks were added together to get estimates of voting in 2012 for the total 2016 adult population.
			Did not vote (includes too young to vote)	49.8	
Voted in 2014	CPS Voting and Registration Supplement (Nov 2014)	In the 2014 midterm election, did things come up that kept you from voting, or did you happen to vote?	Voted	32.7	These estimates are adjusted to correct for item nonresponse bias and to approximate the percentage of adults in 2016 who voted in 2014, as described in the notes for the 'Voted in 2012' benchmark estimate.
			Did not vote (includes too young to vote)	67.3	
Contacted or visited a public official	CPS Civic Engagement Supplement (Nov 2013)	In the past 12 months, that is since June 2015, have you contacted or visited a public official—at any level of government—to express your opinion?	Yes	11.2	
			No	85.1

Study Note

-This dataset contains the variables corresponding to questions asked in the survey. It also contains administrative data, such as the main production weight and completion date. There are several types of additional variables that we can typically provide upon request, if they were created for published reporting:

(1) Researcher-created variable(s) reflecting how we categorized responses to open-ended questions. We do not release verbatim answers to open-ended questions, in the interest of protecting panelist anonymity.

(2) Researcher-created variables needed to replicate published analysis (e.g., an index using several questions).

(3) Special weights needed to replicate published analysis. The main production weight is included in the public dataset. Special weights refer to those used for unusual, bespoke analysis. We can provide existing special weights upon request so long as the analysis they support does not pose a risk to panelist anonymity.

-For a small number of respondents with high risk of identification, certain values have been randomly swapped with those of lower risk cases with similar characteristics.

-BESTAGE

Responses to BESTAGE have been backcoded in the dataset.

CODEBOOK FOR ATP SAMPLE VARIABLES TO BE USED IN SURVEY PROGRAMMING LOGIC

XFORM
1 Form 1
2 Form 2
Note: Flag to randomly assign panelists to one of two forms (Form 1, Form 2) and weight within form
ATP source: Randomly assigned for each survey.

PEW RESEARCH CENTER
CODEBOOK AND INSTRUCTIONS FOR WORKING WITH AMERICAN TRENDS PANEL DATA
Updated May 2021

DEMOGRAPHIC PROFILE VARIABLES
Each ATP dataset comes with a number of variables prefixed by "F_" (for "frame") that contain demographic profile data. These variables are not measured every wave; instead, they are sourced from panel profile surveys conducted on a less frequent basis. Some profile variables are also occasionally asked on panel waves and are accordingly updated for each panelist. Profile information is based on panelists' most recent response to the profile questions. Some variables are coarsened to help protect the confidentiality of our panelists. Interviewer instructions in [ ] and voluntary responses in ( ) are included if the source of a profile variable was ever presented in phone (CATI) mode. See Appendix I for the profile variable codebook.

UNIQUE IDENTIFIER
The variable QKEY is a unique identifier assigned to each respondent. QKEY can be used to link multiple panel waves together. Note that except in a few instances, weights are only provided for single waves. Use caution when analyzing data from multiple waves without weights that are designed for use with multiple waves.

DATA VARIABLE TYPES
American Trends Panel datasets contain single-punch or multi-punch variables. For questions in a 'Check all that apply' format, each option has its own variable indicating whether a respondent selected the item or not. For some datasets there is an additional variable indicating whether a respondent did not select any of the options. Open-end string variables are not included in ATP datasets. Coded responses to open-end questions are included when available.

DATASET FORMAT
The dataset is formatted as a .sav file and can be read with the SPSS software program. The dataset can also be read with the R programming language, using the 'foreign' package. R is a free, open-source program for statistical analysis that can be downloaded at: https://cran.r-project.org/. It can also be used to export data in .csv format for use with other software programs.

NOTE: Using other tools to directly convert the .sav file to another format such as .csv may ERASE value labels. For this reason, it is highly recommended that you use either SPSS or R to read the file directly.

The following example code shows how to import data into R, view variable descriptions, and export the data to .csv format.

```
### EXAMPLE CODE ###
library(foreign)

# The following line of code will import the dataset as an R data.frame
# Replace XX with the wave number

atp <- read.spss("ATP WXX.sav", to.data.frame = TRUE)

# The following line of code will show the variable description
```

```
# Replace VAR with the variable name

attr(atp, "variable.labels")[["VAR"]]

# The following line of code exports the data to .csv format.

write.csv(atp, "ATP WXX.csv", row.names = FALSE)
```

Click here to read an article on how to analyze Pew Research Center data in R. More advanced R users can click here to read an article on how to use different R packages to help analyze our data. These articles are part of Pew Research Center's blog on medium that is entitled Decoded.

APPENDIX I.
DEMOGRAPHIC PROFILE VARIABLE CODEBOOK

********** IMPORTANT **********

This section lists the demographic profile variables typically available in the ATP publicly released datasets. These variables have the prefix "F_" to denote that they are "frame" profile variables, which are not asked every wave.

In most cases, the F_ variables are recoded versions of questions asked in the annual panel profile survey. Those source questions, from which the F_ variables are computed, are provided below and **shaded gray**. Some source questions are not publicly released in order to help protect the confidentiality of our panelists. Previous versions of these variables in older ATP datasets may end in "_FINAL" or "_RECRUITMENT".

****

F_METRO
Metropolitan area indicator.

1	Metropolitan
2	Non-metropolitan

F_CREGION
Census region.

1	Northeast
2	Midwest
3	South
4	West

F_CREGION
Census division.

1	New England
2	Middle Atlantic
3	East North Central
4	West North Central
5	South Atlantic
6	East South Central
7	West South Central
8	Mountain
9	Pacific

F_AGECAT
Four-way category based on the panelist age as calculated from their date of birth. If only YOB is available, age is calculated as calendar year July 1 – YOB. If DOB and YOB are both unavailable, age is calculated as calendar year of recruitment survey – self-reported age at the time of recruitment. Age is updated annually during the annual profile survey.

1	18-29
2	30-49
3	50-64
4	65+
99	Refused

DOB What is your date of birth? Like all of the information you provide us, this information will only be used for research-related purposes.

ASK IF DOB=MISSING:
YOB If you do not wish to provide your full date of birth, may we have just your year of birth? Again, this information will only be used for research-related purposes.

AGE What is your age?

_____ years
98 98 or older
99 Don't know/Refused **(VOL.)**

F_GENDER
Gender.

GENDER Do you describe yourself as a man, a woman or in some other way?
1 A man
2 A woman
3 In some other way
99 Refused

F_EDUCCAT
Three-way category coded from self-reported educational attainment.

1	College graduate+	(EDUC_ACS =11,12,13,14)
2	Some college	(EDUC_ACS =8,9,10)
3	H.S. graduate or less	(EDUC_ACS =1,2,3,4,5,6,7)
99	Don't know/Refused	(EDUC_ACS =Refused)

EDUC_ACS What is the highest degree or level of school that you have COMPLETED?

1	No schooling completed
2	Nursery school
3	Kindergarten
4	Grade 1 through 11 (Specify Grade ____)
5	12th Grade – **NO DIPLOMA**
6	Regular high school diploma
7	GED or alternative credential
8	Some college credit, but less than 1 year of college credit
9	1 or more years of college credit, no degree
10	Associate's degree (for example: AA, AS)
11	Bachelor's degree (for example: BA, BS)
12	Master's degree (for example: MA, MS, MEng, MEd, MSW, MBA)
13	Professional degree beyond a bachelor's degree (for example: MD, DDS, DVM, LLB,JD)
14	Doctorate degree (for example: PhD, EdD)

F_EDUCCAT2
Six-way category coded from self-reported educational attainment.

1	Less than high school	(EDUC_ACS=1,2,3,4,5)
2	High school graduate	(EDUC_ACS =6,7)
3	Some college, no degree	(EDUC_ACS=8,9)
4	Associate's degree	(EDUC_ACS=10)
5	College graduate/some postgrad	(EDUC_ACS =11)
6	Postgraduate	(EDUC_ACS =12,13,14)
99	Don't know/Refused	(EDUC_ACS =Refused)

F_HISP
Hispanic identification.

HISP Are you of Hispanic, Latino, or Spanish origin, such as Mexican, Puerto Rican or Cuban?

1	Yes
2	No
99	Refused

F_HISP_ORIGIN[1]
Hispanic origin.

1 Mexican
2 Puerto Rican
3 Cuban
4 Spanish
5 All others
6 Non-Hispanic
99 Refused

ASK IF HISPANIC (HISP=1):
HISPORIG1 Thinking about your family's heritage, are you Mexican, Puerto Rican, Cuban, Dominican, Salvadoran, or are you and your ancestors from another country? *[Check all that apply]*

1 Mexican
2 Puerto Rican
3 Cuban
4 Dominican
5 Salvadoran
6 Spanish
7 Other Central American
8 Other South American
97 Other country **[TEXT BOX]**

ASK IF MORE THAN ONE ANSWER SELECTED IN HISPORIG1; DISPLAY ONLY ITEMS SELECTED IN HISPORIG1:
HISPORIG2 Of the heritages you selected, which one do you identify most closely with?

1 Mexican
2 Puerto Rican
3 Cuban
4 Dominican
5 Salvadoran
6 Spanish
7 Other Central American
8 Other South American
97 Other country **[TEXT BOX]**

[1] Includes backcoded response to Other specify entries.

F_YEASRSINUS
Years lived in U.S. (excluding Puerto Rico or other U.S. territories).

1 Born in US (not including unincorporated territories)
2 0-10 years
3 11-20 years
4 20+ years
99 Refused

ASK IF BORN IN PUERTO RICO, OTHER US TERRITORY OR OUTSIDE OF US (BIRTHPLACE=2,3,4):
YEARSINUS How many years have you lived in the United States (excluding Puerto Rico or other U.S. territories)? *[Enter 0 for less than one year]*

F_RACECMB[2]
Combining race.

1 White
2 Black or African-American
3 Asian or Asian-American
4 Mixed Race
5 Or some other race
99 Don't know/Refused

RACEMOD What is your race or origin? *[Check all that apply]*

1 White
2 Black or African-American
3 Asian or Asian-American
4 American Indian or Alaska Native
5 Native Hawaiian or other Pacific Islander
6 Some other race or origin **[TEXT BOX]**

[2] Includes backcoded responses to RACE=4 Some other race. For more information on backcoding procedures contact info@pewresearch.org.

F_RACETHNMOD[3]
Race-ethnicity.

1	White, non-Hispanic
2	Black, non-Hispanic
3	Hispanic
4	Other
5	Asian, non-Hispanic
99	Refused

```
if racecmb=1 and hisp ge 2 racethn=1.
if racecmb=2 and hisp ge 2 racethn=2.
if (racecmb ge 3 and racecmb le 5) and (hisp ge 2) racethn=4.
if racecmb=9 racethn=9.
if hisp=1 racethn=3.
variable label racethn “Race-Ethnicity”.
value label racethn
    1 “White non-Hispanic”
    2 “Black non-Hispanic”
    3 “Hispanic”
    4 “Other”
    9 “Refused”.
```

F_CITIZEN
Citizenship.

1	Yes
2	No
99	Refused

[3] Older ATP datasets have variable F_RACETHN, which had Asian, non-Hispanic in the Other category.

CITIZEN Are you a citizen of the United States?

1 Yes
2 No

Previous versions of this variable in older ATP datasets were coded as follows based on a combination of responses to three separate questions. This variable was previously labeled as F_CITIZEN_RECODE_RECRUITMENT in ATP datasets prior to W38.

1	US Citizen	(BIRTH_HISP =1,2 OR USBORN =1,3,4 OR CITIZEN=1)
2	Not US Citizen	(CITIZEN=2)
9	DK US Citizen	(CITIZEN=9)

ASK IF HISPANIC (HISP=1 OR RACE=7):
BIRTH_HISP Were you born in the United States, on the island of Puerto Rico, or in another country?

1 U.S.
2 Puerto Rico
3 Another country
9 Don't know/Refused **(VOL.)**

ASK IF NOT HISPANIC (HISP=2,9 AND RACE≠7):
USBORN Were you born in the United States or in another country?

1 Yes, born in U.S.
2 No, some other country
3 Puerto Rico **(VOL.)**
4 Other U.S. Territories (includes Guam, Samoa, U.S. Virgin Islands) **(VOL.)**
9 Don't know/Refused **(VOL.)**

F_BIRTHPLACE2
Birthplace with Cuba and Mexico broken out.

1 U.S.
2 Puerto Rico
3 Other U.S. territory
4 Cuba
5 Mexico
6 Another country
99 Refused

BIRTHPLACE Where were you born?

1 U.S.
2 Puerto Rico
3 Other U.S. territory
4 Another country

ASK IF BIRTHPLACE=4:
COUNTRY In what country where you born? **[TEXT BOX]**

F_MARITAL
Marital status.

MARITAL Which of these best describes you?

1 Married
2 Living with a partner
3 Divorced
4 Separated
5 Widowed
6 Never been married

F_RELIG[4]
Religion.

1 Protestant
2 Roman Catholic
3 Mormon (Church of Jesus Christ of Latter-day Saints or LDS)
4 Orthodox (such as Greek, Russian, or some other Orthodox church)
5 Jewish
6 Muslim
7 Buddhist
8 Hindu
9 Atheist
10 Agnostic
11 Other
12 Nothing in particular
99 Refused

[4] Includes backcoded responses to RELIG=11 Something else. For more information on backcoding procedures contact info@pewresearch.org.

RELIG What is your present religion, if any?

1 Protestant (for example, Baptist, Methodist, Non-denominational, Lutheran, Presbyterian, Pentecostal, Episcopalian, Reformed, Church of Christ, etc.)
2 Roman Catholic
3 Mormon (Church of Jesus Christ of Latter-day Saints or LDS)
4 Orthodox (such as Greek, Russian, or some other Orthodox church)
5 Jewish
6 Muslim
7 Buddhist
8 Hindu
9 Atheist
10 Agnostic
11 Something else, Specify:_____
12 Nothing in particular

F_BORN
Born-again or evangelical Christian.

1 Yes, born-again or evangelical Christian
2 No, not born-again or evangelical Christian
99 Refused

ASK IF SOMETHING ELSE OR DK/REF (RELIG=11, 99):
CHR Do you think of yourself as a Christian or not? **[IF R NAMED A NON-CHRISTIAN RELIGION IN PREVIOUS QUESTION (e.g. Native American, Wiccan, Pagan, etc.), DO NOT READ (ENTER "NO" CODE 2)]**

1 Yes
2 No
9 **(VOL.)** Don't know/Refused

ASK IF CHRISTIAN (RELIG =1-4 OR CHR=1):
BORN Would you describe yourself as a born-again or evangelical Christian, or not?

1 Yes, born-again or evangelical Christian
2 No, not born-again or evangelical Christian

F_RELIGCAT1
Condensed 4-way religion variable.

1 Protestant
2 Catholic
3 Unaffiliated
4 Other
99 Seldom

F_ATTEND
Self-reported religious service attendance frequency.

ATTEND Aside from weddings and funerals, how often do you attend religious services?

1 More than once a week
2 Once a week
3 Once or twice a month
4 A few times a year
5 Seldom
6 Never

F_PARTY_FINAL
Party.

PARTY In politics today, do you consider yourself a…

1 Republican
2 Democrat
3 Independent
4 Something else

F_PARTYLN_FINAL
Party lean.

ASK IF INDEP/SOMETHING ELSE (PARTY=3 or 4 or REFUSED):
PARTYLN As of today do you lean more to…

1 The Republican Party
2 The Democratic Party

F_PARTYSUM_FINAL
Party summary.

1 Rep/Rep Lean
2 Dem/Dem Lean
3 Independent/No Lean
9 DK/Refused/No lean

```
IF PARTY=1 OR PARTYLN=1  PARTYSUM_FINAL=1.
IF PARTY=2 OR PARTYLN=2 PARTYSUM_FINAL=2.
IF PARTY=3 AND PARTYLN=99 PARTYSUM_FINAL=9.
IF PARTY=4 AND PARTYLN=99 PARTYSUM_FINAL=9.
IF PARTY=99 AND PARTYLN=99 PARTYSUM_FINAL=9.
```

F_PARTYSUMIDEO
Combining ideology and party identification.

1 Conservative Rep/Lean
2 Moderate/Liberal Rep/Lean
3 Moderate/Conservative Dem/Lean
4 Liberal Dem/Lean
99 Refused either F_IDEO or F_PARTYSUM_FINAL

F_INC_SDT1
Family income.

1 Less than $30,000
2 $30,000 to less than $40,000
3 $40,000 to less than $50,000
4 $50,000 to less than $60,000
5 $60,000 to less than $70,000
6 $70,000 to less than $80,000
7 $80,000 to less than $90,000
8 $90,000 to less than $100,000
9 $100,000 or more
99 Refused

F_INC_TIER2
Income tier 3-way.

1 Lower income
2 Middle income
3 Upper income
99 Refused

INC_SDT1 Last year, that is in [PREVIOUS YEAR], what was your total family income from all sources, before taxes?

1 Less than $30,000
2 $30,000 to less than $40,000
3 $40,000 to less than $50,000
4 $50,000 to less than $60,000
5 $60,000 to less than $70,000
6 $70,000 to less than $80,000
7 $80,000 to less than $90,000
8 $90,000 to less than $100,000
9 $100,000 or more

ASK IF FAMILY INCOME IS $30,000 OR LESS (INC_SDT1=1):
INC_SDT2 And in [PREVIOUS YEAR], would you say that your total family income from all sources, before taxes, was…

1 Less than $5,000
2 $5,000 to less than $10,000
3 $10,000 to less than $15,000
4 $15,000 to less than $20,000
5 $20,000 to less than $25,000
6 $25,000 to less than $30,000

ASK IF FAMILY INCOME IS $100,000 OR MORE (INC_SDT1=9):

INC_SDT3 And in 2019, would you say that your total family income from all sources, before taxes, was…

1 $100,000 to less than $125,000
2 $125,000 to less than $150,000
3 $150,000 to less than $175,000
4 $175,000 to less than $200,000
5 $200,000 to less than $225,000
6 $225,000 to less than $250,000
7 $250,000 or more

To create upper-, middle- and lower-income tiers, respondents' family incomes were adjusted for differences in purchasing power by geographic region and for household size. "Middle-income" adults live in families with annual incomes that are two-thirds to double the median family income in the panel (after incomes have been adjusted for the local cost of living and for household size). The middle-income range for the American Trends Panel is about $38,900 to $116,800 annually for an average family of three. Lower-income families have incomes less than roughly $38,900, and upper-income families have incomes greater than roughly $116,800.

F_REG
Registered voter.

REG Which of these statements best describes you?

1 You are ABSOLUTELY CERTAIN that you are registered to vote at your current address
2 You are PROBABLY registered, but there is a chance your registration has lapsed
3 You are NOT registered to vote at your current address

F_IDEO
Ideology.

IDEO In general, would you describe your political views as…

[PROGRAMMING NOTE: REVERSE RESPONSE OPTION SCALE FOR RANDOM HALF OF RESPONDENTS]

1 Very conservative
2 Conservative
3 Moderate
4 Liberal
5 Very liberal

F_INTFREQ
Frequency of internet use.

INTFREQ About how often do you use the internet?

1 Almost constantly
2 Several times a day
3 About once a day
4 Several times a week
5 Less often

F_VOLSUM
Self-reported volunteerism status.

1 Yes
2 No
99 Refused

VOL12_CPS In the past 12 months, did you spend any time volunteering for any organization or association? (This includes activities people may not think of, such as infrequent activities or for children's schools.)

1 Yes
2 No

Older ATP datasets had F_VOLSUM computed based on asking two separate questions:

VOL1_CPS In the past 12 months, did you spend any time volunteering for any organization or association?

1 Yes
2 No

IF NO OR DID NOT ANSWER VOL1_CPS (VOL1_CPS=2 or refused)
VOL2_CPS Some people don't think of activities they do infrequently or for children's schools or youth organizations as volunteer activities. In the past 12 months have you done any of these types of activities?

1 Yes
2 No

IF VOL1=1 OR VOL2=1 F_VOLSUM=1
IF VOL1=2,99 AND VOL2=2 F_VOLSUM=2
IF VOL1=2,99 AND VOL2=99 F_VOLSUM=99

APPENDIX II.
PAST VERSIONS OF DEMOGRAPHIC PROFILE VARIABLES

The following variables were included in some previous ATP datasets but are no longer measured on a regular basis or are now measured differently as referenced in APPENDIX I.

F_ACSWEB
Household internet status.

1 Accesses internet by paying provider
2 Does not access the Internet by paying a cell phone company or Internet service provider

ACS_WEB At your house, apartment or mobile home, do you or any member of this household have access to the internet?

1 Yes, by paying a cell phone company or internet service provider
2 Yes, without paying a cell phone company or internet service provider
3 No access to the internet at my house, apartment, or mobile home

Older ATP datasets contained variable F_INTUSER to define internet status, which were coded as follows:

F_INTUSER source from 2017-2019:

HOMEINT1 Do you personally have access to the internet at your home?

1 Yes
2 No
9 **(VOL.)** Don't Know/Refused

ASK IF NO INTERNET ACCESS AT HOME OR DK (HOMEINT1=2,9):
OTHERINT1 Do you use the internet anywhere other than your home, at least occasionally?

1 Yes **[SKIP TO INT3M]**
2 No
9 **(VOL.)** Don't Know/Refused

ASK IF DOES NOT USE THE INTERNET (OTHERINT1=2,9):
INT2 Do you send or receive email, at least occasionally?

1 Yes
2 No
9 **(VOL.)** Don't Know/Refused

ASK IF DOES NOT HAVE THE INTERNET AT HOME (HOMEINT1=2,9):

INT3M Do you access the internet on a cell phone, tablet or other mobile handheld device, at least occasionally?

1 Yes
2 No
9 **(VOL.)** Don't Know/Refused

```
compute intuser = 0.
if homeint1 = 1 or int2=1 or int3m = 1 intuser = 1.
value label intuser
        1 "Internet user"
        0 "Not internet user"
```

F_INTUSER source from 2014-2016:

INT1 Do you use the internet, at least occasionally?

1 Yes
2 No
9 Don't Know/Refused **(VOL.)**

ASK IF DOES NOT USE THE INTERNET (INT1=2,9):

INT2 Do you send or receive email, at least occasionally?

1 Yes
2 No
9 Don't Know/Refused **(VOL.)**

ASK IF DOES NOT USE THE INTERNET OR EMAIL (INT2=2,9):

INT3M Do you access the internet on a cell phone, tablet or other mobile handheld device, at least occasionally?

1 Yes
2 No
9 Don't know/Refused **(VOL.)**

```
compute intuser = 0.
if int1 eq 1 or int2 eq 1 or int3m eq 1 intuser = 1.
val lab intuser
        1 'Internet user'
        0 'Not internet user'.
```

F_INCOME
Self-reported family income.

INCOME	Last year, that is in [FILL LAST YEAR], what was your total family income from all sources, before taxes?	
	1	Less than $10,000
	2	$10,000 to less than $20,000
	3	$20,000 to less than $30,000
	4	$30,000 to less than $40,000
	5	$40,000 to less than $50,000
	6	$50,000 to less than $75,000
	7	$75,000 to less than $100,000
	8	$100,000 to less than $150,000
	9	$150,000 or more

F_INCOME_RECODE
Three-way category coded from self-reported family income.

1	$75,000+
2	$30-$74,999
3	<$30,000
99	(VOL) Don't know/Refused

$75,000+	(INCOME =7,8,9)
$30-$74,999	(INCOME =4,5,6)
<$30,000	(INCOME =1,2,3)
Don't know/Refused	(INCOME =99)

F_SEX
Self-reported sex.

SEXASK	Are you male or female?	
	1	Male
	2	Female
	99	Refused

F_INSURANCE_FINAL
Self-reported insurance coverage.

INSURANCE Are you, yourself, now covered by any form of health insurance or health plan or do you not have health insurance at this time?

1 Covered by health insurance
2 Not covered by health insurance

F_INT_FREQ1_FINAL
Self-reported internet frequency use.

INT_FREQ1 For the following question, consider time spent on the internet from a computer or mobile device at home, work, or any other locations.

How often did you USUALLY access the internet over the last year?

1 Every day
2 At least once a week but not every day
3 Once a week
4 Once a month
5 Less than once a month
6 Never

F_INT_FREQCOMB_FINAL
Coded internet frequency use for self-reported daily users.

1 Use the Internet constantly
2 Use the Internet many times a day
3 Use the Internet a few times a day
4 Use the Internet about once a day
5 Use the Internet at least once a week but not every day
6 Use the Internet once a week
7 Use the Internet once a month

ASK FOR THOSE WHO SAY "EVERY DAY" (INT_FREQ1=1)

INT_FREQ2 Which of these best describes your Internet use:

[PROGRAMMING NOTE: Randomize half of respondents to get response options in order shown, other half gets the reverse]

1 I use the Internet almost constantly
2 I use the Internet many times a day
3 I use the Internet a few times a day
4 I use the Internet about once a day

IF INT_FREQ1 =1 AND INT_FREQ2=1 INT_FREQCOMB_FINAL=1.
IF INT_FREQ1 =1 AND INT_FREQ2=2 INT_FREQCOMB_FINAL=2.
IF INT_FREQ1 =1 AND INT_FREQ2=3 INT_FREQCOMB_FINAL=3.
IF INT_FREQ1 =1 AND INT_FREQ2=4 INT_FREQCOMB_FINAL=4.
IF INT_FREQ1 =2 INT_FREQCOMB_FINAL=5.
IF INT_FREQ1 =3 INT_FREQCOMB_FINAL=6.
IF INT_FREQ1 =4 INT_FREQCOMB_FINAL=7.
IF INT_FREQ1 =5 INT_FREQCOMB_FINAL=8.
IF INT_FREQ1 =6 INT_FREQCOMB_FINAL=9.

F_SNSUSER_FINAL
Social media user as coded from self-reported social network use.

0	Not Social Media User
1	Social Media User

SNS Do you use any of the following social networking sites? **[RANDOMIZE WITH "OTHER" ALWAYS LAST]**

[Check all that apply]

a. Facebook
b. Twitter
c. Google Plus
d. LinkedIn
e. Instagram
h. Vine
i. Tumblr
j. YouTube
k. Reddit
l. Snapchat
m. Pinterest
n. WhatsApp
o. Other

F_SNSUSER_FINAL=1 if any in SNSa-o=1

F_BBINT_RF1
Self-reported high-speed internet access.

BBINT Does your household currently subscribe to some type of high-speed internet service (such as cable internet, DSL, FIOS, or satellite internet service), not including a data plan you might have for a cell phone?

1	Yes, have high-speed internet service at home
2	No, do not have high-speed internet service
3	Not sure

F_IDEOCONSISTREC_RECRUITMENT
Coded ideological consistency.

For details see: http://www.people-press.org/2014/06/12/appendix-a-the-ideological-consistency-scale/
