Title: CNN Poll: Outlook on America Poll June 2024

Survey Organizations: SSRS

Sponsors: CNN

Field Dates: June 28 - 30, 2024

Sample: National adult

Sample Size: 1274

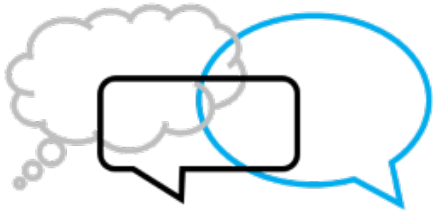

Interview Modes: Telephone Interview; Web-based survey; Computer-Assisted telephone interview (CATI)

Weight Location: Columns 3722-3728 (xx.xxxx) -- Variname: WEIGHT

Usage Notes: See documentation for detailed summaries on response rates.

Please note that data provided by the Roper Center for Public Opinion Research may not be re-disseminated without written permission. The results of any analyses conducted on the data may, however, be published with appropriate acknowledgments and source citation.

Overview

SSRS conducted the June 2024 Quick Turn Probability Panel Poll on behalf of CNN though the SSRS Opinion Panel among U.S. adults ages 18 or older. Data collection was conducted from June 28-30, 2024, among a sample of 1,274 respondents.

The survey was conducted online (n=1,207) and by telephone (n=67) in English (n=1,185) and Spanish (n=89). Data were weighted to represent the target population of U.S. adults ages 18 or older. The margin of sampling error for the complete set of weighted data is ± 3.5 percentage points.

This report provides information about the sampling procedures and the methods used to collect, process, and weight data for this study.

Sample Design: SSRS Opinion Panel

SSRS Opinion Panel members are recruited randomly based on nationally representative ABS (Address Based Sample) design ABS respondents are randomly sampled by Marketing Systems Group (MSG) through the U.S. Postal Service's Computerized Delivery Sequence File (CDS), a regularly-updated listing of all known addresses in the U.S. For the SSRS Opinion Panel, known business addresses are excluded from the sample frame.

The SSRS Opinion Panel is a multi-mode panel (web and phone). Most panelists take self-administered web surveys; however, the option to take surveys conducted by a live telephone interviewer is available to those who do not use the internet as well as those who use the internet but are reluctant to take surveys online.

Survey Sampling

The sample for this survey was randomly selected from the SSRS Opinion Panel based on a stratified probability-proportionate-to-size (PPS) sampling allocation where the measure-of-size (MOS) is computed as:

$$MOS_h = \sum_{i=1}^{N_h} \sqrt{FW_{hi}}$$

where FW_{hi} is the final calibrated full-population weight based on the entire SSRS Opinion Panel for panelist i in stratum h.

Sample selection was done separately for web English, Spanish-language, and CATI panelists.

Strata h are formed by dividing each sampling group into equally sized groups based on FW_{hi} and selecting replicates across strata such that the resulting samples will be proportionate by strata based on the MOS. The web English sample was split into 25 groups, the CATI sample was split into four groups, and the Spanish language samples were not split into subgroups.

Questionnaire Design

The questionnaire was developed by CNN in consultation with the SSRS project team. SSRS reviewed the questionnaire primarily to identify potential problems in the instrument that might increase respondent burden, cause respondents to refuse or terminate the survey, create problems with respondent comprehension, or pose practical challenges for mode-specific administration such as complex skip patterns.

Data Collection

Web Contact Procedures

A "soft launch" inviting a limited number of panelists to participate was conducted on June 28, 2024. Soft launch data were checked to ensure functionality of the program and assess survey length. After checking soft launch data to ensure that all questionnaire content and skip patterns were correct, additional sample was released to ensure the final sample met the study goals.

Web panelists were emailed an invitation to complete the survey online. The email for each respondent included a unique password-embedded link. Panelists who did not respond to the email invitation received up to four reminder emails, and panelists who did not respond and who had opted into receiving text messages from the SSRS Opinion Panel received at least one text message reminder.

Table 1: Email/SMS Schedule

Touchpoint	Start	End
Soft launch	June 28, 2024	June 28, 2024
Full launch I	June 28, 2024	June 28, 2024
Full launch II (Email or SMS)	June 29, 2024	June 29, 2024
Additional sample release	June 29, 2024	June 29, 2024
1st reminder (Email)	June 29, 2024	June 29, 2024
2nd reminder (Email)	June 30, 2024	June 30, 2024
3rd reminder(Email or SMS) (targeted)	June 30, 2024	June 30, 2024
Final reminder (Email or SMS)	June 30, 2024	June 30, 2024

In appreciation for their participation, panelists completing the survey received compensation in the form of an electronic gift card, sent via email immediately after completion of the survey. Panelists with less than a high school education were offered a larger compensation to encourage participation.

Median web survey length was approximately 11 minutes.

Phone Contact Procedures

For SSRS Opinion Panelists, interviewers asked to speak with the person at that number who is a member of the Panel. Interviewers verified that the person was in a safe place before administering the survey.

All interviews were completed in English or Spanish using the Forsta Plus) CATI system. The CATI system ensured that complete dispositions of all call attempts were recorded.

CATI interviewers received written materials about the survey instrument and received formal training for this project. The written materials were provided prior to the start of data collection and included an annotated questionnaire that contained information about the goals of the study, detailed explanations about why questions were being asked, the meaning and pronunciation of key terms or names, potential obstacles to overcome in getting good answers to questions, and respondent problems that could be anticipated ahead of time, as well as strategies for addressing the potential problems.

To maximize survey response, SSRS enacted the following procedures during the field period:

- As many as five (5) attempts were made to contact every sampled telephone number.
- Calls were staggered over times of day and days of the week to maximize the chance of making contact with potential respondents. At least one daytime call was conducted if necessary.
- Interviewers explained the purpose of the study and its importance.
- Respondents were offered the option of scheduling a call-back at their convenience.
- Specially trained interviewers contacted numbers where the initial call resulted in respondents hanging up the phone.

All respondents who completed the survey were offered post-paid compensation via a mailed check.

Average phone survey length was approximately 21 minutes.

Programming, Data Processing, and Integration

Programming

Prior to the field period, SSRS programmed the study into its Forsta Plus Web/CATI platform for administration in English or Spanish. Extensive checking of the program was conducted to ensure that skip patterns and sample splits followed the design of the questionnaire.

The web program was optimized for administration via smartphone or other mobile handheld devices. The web program was also checked on multiple devices, including desktop and laptop computers and different web browsers to ensure consistent and optimized visualization across devices and browsers. The web survey was accessed directly by respondents, using their unique survey links with embedded passwords. Respondents could return to their survey at any point if they chose to suspend their survey.

Quality Control Checks

For web surveys, quality checks were incorporated into the survey. For this study, respondents who failed the quality checks were not included in the final dataset. This included:

1. Panelists who answered two or more trap questions incorrectly (n=0).
2. Panelists with a survey length less than 30% of the median length (n=7).
3. Panelists who completed less than 90% of the questions they were asked (n=5).
4. Panelists who completed during soft launch period on June 28, 2024 (n=58).

Twelve completed surveys were removed after applying these cleaning standards.

For telephone surveys, interviews are closely monitored by interviewing staff for quality control. In addition, select recordings are reviewed by supervisors to monitor quality and interviewer procedures.

There was a subset of respondents who were not included in the final dataset due to the following reasons:

1. Panelists who completed during soft launch period on June 28, 2024, prior to final questionnaire changes (n=56).
2. Panelists with missing data at the Favorability section of the survey who were unreachable during recontact attempts (n=16).

Seventy-two completed surveys were removed after applying these additional cleaning standards.

Weighting and Design Effects

Data were weighted to represent the residential adult population of the United States. The data were weighted by applying a base weight and balancing the demographic profile of the sample to target population parameters.

Base Weight

The base weight accounts for the panelists' probability of selection into the sample using the following formula:

$$BW = FW_{hi} \times (N_h/n_h)$$

where FW_{hi} is the panelist weight described above, N_h is the size of stratum h and n_h is the number of panelists selected from stratum h.

Raking

With the base weight applied, the data were weighted to match the demographic profile of the sample to the target population parameters.

Missing data in the raking variables were imputed using hot decking. Hot deck imputation replaces the missing values of a respondent randomly with another similar respondent without missing data. Hot

decking was done using an SPSS macro detailed in 'Goodbye, Listwise Deletion: Presenting Hot Deck Imputation as an Easy and Effective Tool for Handing Missing Data' (Myers, 2011).

Weighting was done using SPSSINC RAKE, an SPSS extension module that simultaneously balances the distributions of all variables using the GENLOG procedure.[1]

Data were weighted to distributions of sex by age, sex by education, age by education, race by education, Hispanic nativity, census region, civic engagement, population density, party ID, religious affiliation, internet use frequency, leaned party by ideology, registered voter by leaned party, leaned party by race and education, 2020 recalled vote by quintile. The following table shows the data sources used for calibration totals.

Table 2. Calibration Variable Sources

Dimensions	Source
Sex Age Education Race Hispanic nativity Census region	Current Population Survey 2023[2]

Trimming

Weights were trimmed at the 2nd and 98th percentiles to prevent individual interviews from having too much influence on survey-derived estimates. The table below compares unweighted and weighted sample distributions to target population benchmarks.

Table 3: Sample Demographics

Category	Values	Parameter	Unweighted	Weighted
Sex by age	Male 18-24	6.0%	2.7%	4.9%
	Male 25-34	8.8%	6.4%	8.8%
	Male 35-44	8.5%	9.3%	8.7%
	Male 45-54	7.7%	7.7%	8.1%
	Male 55-64	7.8%	7.7%	7.7%
	Male 65+	10.2%	11.9%	10.0%

	Did not vote in 2020	37.6%	27.0%	35.5%

Effects of Sample Design on Statistical Inference

Post-data collection statistical adjustments require analysis procedures that reflect departures from simple random sampling. SSRS calculates the effects of these design features so that an appropriate adjustment can be incorporated into tests of statistical significance when using these data. The so-called "design effect" or deff represents the loss in statistical efficiency that results from a disproportionate sample design and systematic non-response. The total sample design effect for this survey is 1.60.

SSRS calculates the composite design effect for a sample of size n, with each case having a weight, as:[8]

$$deff = \frac{n \sum w^2}{(\sum w)^2}$$

The survey's margin of error is the largest 95% confidence interval for any estimated proportion based on the total sample — the one around 50%. For example, the margin of error for the entire sample is ± 3.5 percentage points. This means that in 95 out of every 100 samples drawn using the same methodology, estimated proportions based on the entire sample will be no more than 3.5 percentage points away from their true values in the population. Margins of error for subgroups will be larger. It is important to remember that sampling fluctuations are only one possible source of error in a survey estimate. Other sources, such as respondent selection bias, questionnaire wording, and reporting inaccuracy, may contribute additional error of greater or lesser magnitude.

[8] Kish, L. (1992). Weighting for Unequal Pi. Journal of Official Statistics, Vol. 8, No.2, 1992, pp. 183-200.

Sample Disposition and Response Rate

The table below details the completion and response rates for this study.

Table 4: Completion Rate/Response Rate

Completion Rates/Composite Response Rates	Total
Total Sample (Invited to participate)	3,223
Screen-outs	0
Total Eligible	3,223
Quality control removals	28
Incompletes	231
Quota full	0
Completions*	1,274
Incidence/Eligibility rate	100.00%
Survey Completion rate (Completions/Total invited to participate)	41.27%
Survey RR3	41.27%

Cumulative Response Rate

Cumulative response rate that takes into consideration the response rate for the panel recruitment survey, percent of recruitment survey respondents that agree to join the panel and the panel survey specific RR3 reported above comes to 1.93%.

Deliverables

Final deliverables for this study were as follows:

- Final questionnaire instrument.
- One final weighted dataset in SPSS.
- 3 banners of weighted cross-tabulations in Excel or Word.
- Topline with trends.
- Methods report.

SSRS ESOMAR 37

Company Profile

1. What experience does your company have in providing online samples for market research? How long have you been providing this service? Do you also provide similar services for other uses such as direct marketing? If so, what proportion of your work is for market research?

SSRS is a leading full-service, non-partisan public opinion research firm. For more than 30 years, SSRS has specialized in healthcare, public and social policy, and non-partisan political research studies conducted via all data collection modes. Our clients are comprised of various public and private sector entities including major academic institutions, leading national media organizations, and top research institutes.

Founded in 2016, the SSRS Opinion Panel is a probability-based nationally representative panel of U.S. adults ages 18 or older. The hallmarks of the SSRS Opinion Panel are methodological rigor, accuracy, affordability, mode flexibility, and representativeness. Our panel is actively used by major academic institutions, media organizations, and other private sector entities – both in the U.S. and abroad.

Our panel is strictly used for research purposes and gathering public opinion. It is not used for direct marketing.

As a charter member of the AAPOR (American Association for Public Opinion Research) Transparency Initiative, SSRS is committed to full compliance of AAPOR standards and transparency.

2. Do you have staff with responsibility for developing and monitoring the performance of the sampling algorithms and related automated functions who also have knowledge and experience in this area? What sort of training in sampling techniques do you provide to your frontline staff?

The SSRS Opinion Panel team is comprised of industry experts with deep knowledge of probability-based sampling techniques. The Panel team works closely with SSRS methodologists to develop and optimize sampling strategies, which are then automated using the Forsta+ (formerly known as Confirmit) platform. In addition, the Panel team oversees sample releases for every project

1 Braxton Way Suite 125 | Glen Mills, PA 19342
ssrs.com | @ssrs_research

conducted using the SSRS Opinion Panel and works with frontline project staff to ensure studies are executed to specification.

3. What other services do you offer? Do you cover sample-only, or do you offer a broad range of data collection and analysis services?

The SSRS Opinion Panel is a full-service platform and offers a broad range of data collection and analytic services. This includes, but is not limited to, full-service custom surveys, sample-only endeavors, and projects that utilize a hybrid probability/non-probability approach.

Sample Sources and Recruitment

4. Using the broad classifications above, from what sources of online sample do you derive participants?

SSRS Opinion Panel members are recruited randomly based on a nationally representative Address Based Sample (ABS) design (including Hawaii and Alaska). Address-based samples are drawn from the Delivery Sequence File (DSF) maintained by the U.S. Postal Service. Population coverage of the DSF is 98%-99%. Prior to 2022, we recruited a portion of our panel, including hard-to-reach populations, via RDD methodology.

5. Which of these sources are proprietary or exclusive and what is the percent share of each in the total sample provided to a buyer? (Assume proprietary to mean that the sample provider owns the asset. Assume exclusive to mean that the sample provider has an exclusive agreement to manage/provide access to sample originally collected by another entity.)

100% of sample from the SSRS Opinion Panel is proprietary and exclusive to SSRS. All recruited SSRS Opinion Panelists are wholly owned by SSRS.

6. What recruitment channels are you using for each of the sources you have described? Is the recruitment process 'open to all' or by invitation only? Are you using probabilistic methods? Are you using affiliate networks and referral programs and in what proportions? How does your use of these channels vary by geography?

The SSRS Opinion Panel consists entirely of sample recruited based on probabilistic methods. Recruitment is strictly by invitation only. As of 2022, all panel members are recruited via Address Based Sample (ABS). ABS respondents are randomly sampled by Marketing Systems Group

1 Braxton Way Suite 125 | Glen Mills, PA 19342
ssrs.com | @ssrs_research

(MSG) through the U.S. Postal Service's Computerized Delivery Sequence File (DSF), a regularly updated listing of all known addresses in the U.S. For the SSRS Opinion Panel, known business addresses are excluded from the sample frame. Prior to 2022, we recruited a portion of our panel, including hard-to-reach populations, via RDD methodology.

7. What form of validation do you use in recruitment to ensure that participants are real, unique, and are who they say they are? Describe this both in terms of the practical steps you take within your own organisation and the technologies you are using. Please try to be as specific and quantify as much as you can.

SSRS generates unique survey passwords that are assigned and provided via mail to the randomly selected households. The recruitment survey can only be accessed using their unique passwords. In addition, at the start of every recruitment survey, respondents are asked to verify they live at the sampled address and are terminated if they indicate they live elsewhere. Panelists who join via web are asked to provide their email address and must complete a double opt-in process to confirm their email is correct and working.
One of our de-duplication mechanisms is RelevantID, a digital fingerprint technology that prevents duplicate respondents from completing the survey. Please note that SSRS may use other de-duplication technology solutions at its discretion.

8. What brand (domain) and/or app are you using with proprietary sources? Summarize, by source, the proportion of sample accessing surveys by mobile app, email or other specified means.

SSRS uses Forsta+ (formerly known as Confirmit) software and data warehousing solution for the SSRS Opinion Panel. Forsta+ is the world's leading provider of survey and reporting software. Forsta+ is a sophisticated web-based data collection tool with capabilities to deliver tailored, fully branded, and highly structured surveys for all types of feedback and market research programs. SSRS utilizes Forsta+ for survey design and reporting, as well as for phone, web, and SMS data collection. Web programs are optimized for administration via smartphone or other mobile handheld devices. In our experience, more than half of SSRS Opinion Panel web surveys are completed on a smartphone or other mobile device.

SSRS leverages Forsta+ to invite panelists to surveys via email or SMS (if consenting) and contact telephone panelists via outbound dialing conducted by professional interviewers.

9. Which model(s) do you offer to deliver sample? Managed service, self-serve, or API integration?

1 Braxton Way Suite 125 | Glen Mills, PA 19342
ssrs.com | @ssrs_research

The SSRS Opinion Panel only provides sample as a managed service.

10. If offering intercepts, or providing access to more than one source, what level of transparency do you offer over the composition of your sample (sample sources, sample providers included in the blend). Do you let buyers control which sources of sample to include in their projects, and if so, how? Do you have any integration mechanisms with third-party sources offered?

The SSRS Opinion Panel does not offer intercepts. The SSRS Opinion Panel consists entirely of sample recruited based on probabilistic methods.

11. Of the sample sources you have available, how would you describe the suitability of each for different research applications? For example, Is there sample suitable for product testing or other recruit/recall situations where the buyer may need to go back again to the same sample? Is the sample suitable for shorter or longer questionnaires? For mobile-only or desktop-only questionnaires? Is it suitable to recruit for communities? For online focus groups?

The hallmarks of probability-based sample are methodological rigor, accuracy, mode flexibility, and representativeness. As such, SSRS Opinion Panel sample is suitable for a wide variety of research applications, methodologies, and survey lengths. We have the ability to target various populations of interest based on panel demographics for research studies. Panelists can be recontacted for multiple surveys for tracking studies. All web surveys are programmed with a responsive layout that ensures surveys are optimized for administration on both desktop and mobile devices.

Panelists may also be recruited for online focus groups. SSRS reserves the right to review any survey topics that are overly sensitive in nature or that require collection of personally identifiable information (PII).

Sampling and Project Management

12. Briefly describe your overall process from invitation to survey completion. What steps do you take to achieve a sample that "looks like" the target population? What demographic quota controls, if any, do you recommend?

The SSRS Opinion Panel leverages probability proportional to size (PPS) sampling to select probability samples from the Panel that are representative of the target population. The entire SSRS Opinion Panel is first weighted to demographic benchmarks for the U.S. adult population with

1 Braxton Way Suite 125 | Glen Mills, PA 19342
ssrs.com | @ssrs_research

respect to gender, age, educational attainment, race/ethnicity, Census division, civic engagement, population density, Internet use frequency, voter registration status, party identification, religion, household size, and home tenure. The Panel is then broken into strata defined by quantiles of this weight. A random sample is then selected within each stratum, with higher-weight strata having a higher selection probability. Depending on the target population and study goals, additional stratification variables and/or quota controls may be implemented. Final data is then weighted to population benchmarks to be representative of the target population.

13. What profiling information do you hold on at least 80% of your panel members plus any intercepts known to you through prior contact? How does this differ by the sources you offer? How often is each of those data points updated? Can you supply these data points as appends to the data set? Do you collect this profiling information directly or is it supplied by a third party?

As a part of enrollment process, a variety of socio-demographic and household composition information is collected and saved as part of the panelist profile. This information is collected consistently from all respondents who enroll in the panel. A full list of available demographics can be found at https://ssrs.com/opinion-panel/. Key demographics are regularly updated.

14. What information do you need about a project in order to provide an estimate of feasibility? What, if anything, do you do to give upper or lower boundaries around these estimates?

In order to provide accurate cost and feasibility, it is most helpful to receive the following information at the proposal stage: Target population group(s), incidence rates, sample size, survey length and complexity, subject matter of research, Spanish language requirement, project timeline, and any special requirements or deliverables such as inclusion of video and graphics, open-end coding, data tabulation, questionnaire design support, and data analysis support. The Panel team can use a combination of expected incidence, historical response rate, and panel composition to determine feasibility.

15. What do you do if the project proves impossible for you to complete in field? Do you inform the sample buyer as to who you would use to complete the project? In such circumstances, how do you maintain and certify third party sources/sub-contractors?

As a charter member of AAPOR's (American Association for Public Opinion Research) Transparency Initiative, SSRS is committed to full transparency with our clients and the general

1 Braxton Way Suite 125 | Glen Mills, PA 19342
ssrs.com | @ssrs_research

public. In the event we need to supplement our panel with sample from other providers, SSRS discloses this upfront to the client.

We have strategic relationships with high-quality sample providers. Our technology infrastructure supports use of sample from multiple partners without duplication.

16. Do you employ a survey router or any yield management techniques? If yes, please describe how you go about allocating participants to surveys. How are potential participants asked to participate in a study? Please specify how this is done for each of the sources you offer.

SSRS does not use survey routers for the SSRS Opinion Panel.

17. Do you set limits on the amount of time a participant can be in the router before they qualify for a survey?

SSRS does not use survey routers for the SSRS Opinion Panel.

18. What information about a project is given to potential participants before they choose whether to take the survey or not? How does this differ by the sources you offer?

Panelists are not told any specific information about the subject of a survey prior to participating in order to preserve independence of research and reduce non-response bias. In the invitations, panelists are told the value of the incentive they will receive for completing the survey and are typically given a due date.

19. Do you allow participants to choose a survey from a selection of available surveys? If so, what are they told about each survey that helps them to make that choice?

No, panelists are never given the option to choose from a selection of available surveys. Each survey invitation includes a unique link to a single survey.

20. What ability do you have to increase (or decrease) incentives being offered to potential participants (or sub-groups of participants) during the course of a survey? If so, can this be flagged at the participant level in the dataset?

All panelists who qualify for and complete the survey via web are offered a post-participation compensation in the form of an electronic gift card, sent via email immediately after completion of the survey. They have the option of redeeming their rewards as a cash equivalent gift card (such as

1 Braxton Way Suite 125 | Glen Mills, PA 19342
ssrs.com | @ssrs_research

a Visa gift card) or as a gift card for one of many online or in-store retailers. All respondents who complete the survey via telephone are offered post-participation compensation via a mailed check.

Hard-to-reach population groups are typically offered a higher compensation. The Panel team will often make a recommendation for a higher compensation for longer survey lengths. Incentives values can be adjusted during the survey field period if needed.

We can provide participant-level compensation payout data as a special service.

21. Do you measure participant satisfaction at the individual project level? If so, can you provide normative data for similar projects (by length, by type, by subject, by target group)?

All survey-specific respondent communication contains contact information for the SSRS Opinion Panel manager. We carefully review survey-specific respondent feedback and take necessary action promptly in the event an anomaly is detected. In addition, we also ask survey-specific respondent satisfaction questions for our internal quality control. We can insert participation satisfaction questions as designed by the client and provide this data to the client.

22. Do you provide a debrief report about a project after it has completed? If yes, can you provide an example?

As a charter member of AAPOR's (American Association for Public Opinion Research) Transparency Initiative, SSRS reporting is fully compliant with AAPOR's transparency standards. After completion of the study, in addition to a fully labeled data file with demographic weights, SSRS provides a methods report containing detailed information about design, sampling, AAPOR response rate calculations, weighting, and data processing. This report can also contain various performance metrics, including but not limited to margin of error, design effect, survey start rate, survey completion rate, drop-out rate, and overall length of interview.

Data Quality and Validation

23. How often can the same individual participate in a survey? How does this vary across your sample sources? What is the mean and maximum amount of time a person may have already been taking surveys before they entered this survey? How do you manage this?

The SSRS Opinion Panel is a relatively low burden panel in that our panelists generally do not receive more than 2 to 3 surveys per month. This keeps the engagement level and data quality high.

1 Braxton Way Suite 125 | Glen Mills, PA 19342
ssrs.com | @ssrs_research

As an additional measure, we maintain a 24 hour lock out, so that a panelist cannot be invited to more than 1 survey per day.

24. What data do you maintain on individual participants such as recent participation history, date(s) of entry, source/channel, etc? Are you able to supply buyers with a project analysis of such individual level data? Are you able to append such data points to your participant records?

SSRS maintains individual participation data including participation rate, number of surveys completed, dates of completed surveys, and registration date. We analyze and use this data for panel management purposes. This data is not a part of our standard deliverables. We can provide aggregated data as a custom service.

25. Please describe your procedures for confirmation of participant identity at the project level. Please describe these procedures as they are implemented at the point of entry to a survey or router.

Our probability-based recruitment methods ensure that only respondents with a confirmed identity are invited into the panel. In addition, we implement an email double opt-in methodology at the panel registration stage for web panelists to confirm respondent identity. For web surveys, invitations are sent to the unique email address provided by respondents at the time of registration. All email invitations are addressed to the panelists by name and contain a unique survey link. For telephone surveys, interviewers ask for the member of the panel by name and are trained not to conduct interviews with anyone else in the household who may be willing.

26. How do you manage source consistency and blend at the project level? With regard to trackers, how do you ensure that the nature and composition of sample sources remain the same over time? Do you have reports on blends and sources that can be provided to buyers? Can source be appended to the participant data records?

The SSRS Opinion Panel consists entirely of sample recruited based on probabilistic methods and is therefore treated as a singular source. For tracking studies, we make sure each wave of sample is similar in demographic composition with minimized respondent duplication across waves.

27. Please describe your participant/member quality tracking, along with any health metrics you maintain on members/participants, and how those metrics are used to invite, track, quarantine, and block people from entering the platform, router, or a survey. What processes do you have in place to compare profiled and known data to in-survey responses?

1 Braxton Way Suite 125 | Glen Mills, PA 19342
ssrs.com | @ssrs_research

SSRS maintains individual participation data including participation rate. The SSRS Opinion Panel regularly tracks panel health and reviews the panel database annually for chronic non-responders (i.e. those who joined the panel but have never completed a survey despite multiple invitations). Chronic non-responders are given a final opportunity to confirm their membership with an engagement survey. Those who do not respond to the engagement survey are excluded from future sampling. We also systematically replenish the panel to account for panel attrition over time.

Upon request, SSRS may program questions into a survey that can compare profiled and known data to in-survey responses.

28. For work where you program, host, and deliver the survey data, what processes do you have in place to reduce or eliminate undesired in-survey behaviours, such as (a) random responding, (b) Illogical or inconsistent responding, (c) overuse of item non-response (e.g.,"Don't Know") (d) inaccurate or inconsistent responding, (e) incomplete responding, or (f) too rapid survey completion?

For web surveys, quality checks are incorporated into the survey itself. Respondents who fail the quality checks are not included in the final dataset. These quality control measures include checks for speeders, high non-response, and the administration of trap questions to check for consistent responses and attentiveness. Additional quality control measures may be included depending on the scope of the project.

For telephone surveys, interviews are closely monitored by interviewing staff for quality control. In addition, randomly sampled recordings are reviewed by supervisors to monitor quality and interviewer procedures.

Policies and Compliance

29. Please provide the link to your participant privacy notice (sometimes referred to as a privacy policy) as well as a summary of the key concepts it addresses.

The SSRS Opinion Panel Privacy Policy is available at https://ssrsopinionpanel.com/privacy/.

30. How do you comply with key data protection laws and regulations that apply in the various jurisdictions in which you operate? How do you address requirements regarding consent or other legal bases for the processing personal data? How do you address requirements for data breach response, cross-border transfer, and data retention? Have you appointed a data protection officer?

1 Braxton Way Suite 125 | Glen Mills, PA 19342
ssrs.com | @ssrs_research

Survey response data provided to clients by the SSRS Opinion Panel is anonymized and contains no PII, except in cases where the respondent has given explicit permission to share personally identifiable information.

As a company, SSRS is ISO/IEC 27001:2013 certified. ISO/IEC 27001:2013 is an international standard on how organizations are to handle information security. SSRS holds certificate number IS 743297 and operates an Information Security Management System which complies with ISO/IEC 270001:2013 for the following scope: The information Security Management System for the management of the processes necessary to securely deliver Public Opinion and Market Research to clients in accordance with the Statement of Applicability version 4.0 dated 05/18/2022. Our certificate issued by BSI is valid until 06/24/2024.

The SSRS Opinion Panel stores its database in Forsta+ (formerly known as Confirmit) software. For decades, Forsta+ has maintained one of the highest levels of security in our industry, allowing them to earn the trust of the most demanding companies, and meet their stringent security and privacy requirements. Forsta+'s operations undergo an annual comprehensive SOC 2 Type II (SSAE 18 / AT 101) examination by a highly reputable AICPA accredited firm. Their SaaS production environment, where client data is stored and processed, is ISO 27001 certified, SOC 2 Type II audited and PCI-DSS certified.

In addition to the comprehensive third-party SOC 2 Type II audits of their operations, Forsta+ performs a battery of additional testing to ensure the effectiveness of their security posture. These include weekly penetration testing by information security team which are validated by annual third-party penetration tests by independent security professionals (McAfee). Forsta+also performs static code-scanning of the software, which is validated by third-party white-hat application testing performed by highly trained cyber-security professionals (Veracode). Forsta+has always completed the third-party testing with the highest security grade available, "A".

Forsta+'s full security features can be reviewed here:
https://extranet.confirmit.com/Extranet/media/PublicDocuments/SaaS/Confirmit_Horizons_SaaS_Security-January_2019.pdf

SSRS IT department handles all data protection issues.

31. How can participants provide, manage and revise consent for the processing of their personal data? What support channels do you provide for participants?

1 Braxton Way Suite 125 | Glen Mills, PA 19342
ssrs.com | @ssrs_research

All panelists have the ability to opt-out of the panel by contacting the panel manager. Contact information for the panel manager is provided in every invitation survey and within every survey.

32. How do you track and comply with other applicable laws and regulations, such as those that might impact the incentives paid to participants?

SSRS Opinion Panel is fully compliant with all applicable laws in the United States including incentives paid to participants. SSRS is compliant with all regulations set forth by our incentive vendors.

33. What is your approach to collecting and processing the personal data of children and young people? Do you adhere to standards and guidelines provided by ESOMAR or GRBN member associations? How do you comply with applicable data protection laws and regulations?

The SSRS Opinion Panel only accepts panelists age 18 or older. In the event that a project seeks to survey the child of an adult panelists, SSRS will first get consent from the responsible adult then ask the child for their agreement. The responsible adult will be told the name and contact details of the research organization, the nature of the data to be collected, the purpose of collecting the data, how the data will be used, and benefits or potential impact of the research.

34. Do you implement "data protection by design"(sometimes referred to as "privacy by design") in your systems and processes? If so, please describe how.

Our internal systems and processes have all been certified as ISO 27001 compliant. This includes system security, file access/handling, storage, credential management, vulnerability testing, etc.

35. What are the key elements of your information security compliance program? Please specify the framework(s) or auditing procedure(s) you comply with or certify to. Does your program include an asset-based risk assessment and internal audit process?

As a company, SSRS is ISO/IEC 27001:2013 certified. ISO 27001 includes a risk assessment process, organizational structure, Information classification, Access control mechanisms, physical and technical safeguards, Information security policies, procedures, monitoring, and reporting guidelines.

36. Do you certify to or comply with a quality framework such as ISO 20252?

1 Braxton Way Suite 125 | Glen Mills, PA 19342
ssrs.com | @ssrs_research

As a company, SSRS is ISO/IEC 27001:2013 certified. ISO/IEC 27001:2013 is an international standard on how organizations are to handle information security. SSRS holds certificate number IS 743297 and operates an Information Security Management System which complies with ISO/IEC 270001:2013 for the following scope: The information Security Management System for the management of the processes necessary to securely deliver Public Opinion and Market Research to clients in accordance with the Statement of Applicability version 4.0 dated 05/18/2022. Our certificate issued by BSI is valid until 06/24/2024.
Metrics

37. Which of the following are you able to provide to buyers, in aggregate and by country and source? Please include a link or attach a file of a sample report for each of the metrics you use.

01. Average qualifying or completion rate, trended by month.
02. Percent of paid completes rejected per month/project, trended by month.
03. Percent of members/accounts removed/quarantined, trended by month
04. Percent of paid completes from 0-3 months tenure, trended by month
05. Percent of paid completes from smartphones, trended by month
06. Percent of paid completes from owned/branded member relationships versus intercept participants, trended by month
07. Average number of dispositions (survey attempts, screenouts, and completes) per member, trended by month (potentially by cohort)
08. Average number of paid completes per member, trended by month (potentially by cohort)
09. Active unique participants in the last 30 days
10. Active unique 18-24 male participants in the last 30 days
11. Maximum feasibility in a specific country with nat rep quotas, seven days in field, 100% incidence, 10-minute interview
12. Percent of quotas that reached full quota at time of delivery, trended by month

The SSRS Opinion Panel is U.S. only and comes from a single probability-based source. We can provide some aggregate data that we use for tracking panel health. This will be handled as a special request on a study-by-study basis.

Contact Information

Background

SSRS is a leading full-service, public opinion research firm. For more than 30 years, SSRS has specialized in healthcare, public and social policy, and non-partisan political research studies conducted via all data collection modes. Our clients are comprised of public and private sector entities including major academic institutions, leading national media organizations, and top research institutes (www.ssrs.com).

SSRS Opinion Panel

The SSRS Opinion Panel is a nationally representative probability-based panel of U.S. adults age 18 or older. The hallmarks of the SSRS Opinion Panel are methodological rigor, accuracy, affordability, mode flexibility, and representativeness. Our panel is actively used by major academic institutions, media organizations, and other private sector entities – both in the U.S. and abroad.

As a charter member of the AAPOR (American Association for Public Opinion Research) Transparency Initiative, SSRS is committed to full compliance of AAPOR standards and transparency.

SSRS Opinion Panel Team and Services

Our highly experienced SSRS Opinion Panel team stands ready to support both data collection and client analytic needs. We work closely with clients from the early project planning stages to developing and delivering effective customized solutions. Our services include questionnaire design, questionnaire programming and hosting, user experience (UX) testing, cognitive interviews, data collection, statistical weighting, and data analysis and reporting. Specific SSRS Opinion Panel services include:

- Questionnaire design consultation that meets industry best practices.
- Methodological consultation.
- Highly collaborative team that works closely in meeting client schedules.
- Design and implementation of subpopulation-specific surveys that leverage panelist profile data, such as for surveys of Hispanics, people with specific health insurance statuses, caregivers, parents, registered voters, and people with different chronic health conditions.
- Establishment and maintenance of custom proprietary panels.

Panel Recruitment

SSRS Opinion Panel members are recruited randomly based primarily on nationally representative Address Based Sample (ABS) design. ABS sample is drawn from the Delivery Sequence File (DSF) maintained by the U.S. Postal Service. Population coverage of the DSF is in the 98%-99% range. Additional panelists are recruited via random digit dial (RDD) telephone sample of prepaid cell phone numbers. Phone numbers used for the prepaid cell phone component are randomly generated from a cell phone sampling frame.

During the recruitment process, full demographic information on panelists is collected. This data is stored securely and used to determine eligibility for specific studies (if needed). We also rely on these data to improve the survey experience for panelists by avoiding the need to re-ask demographic questions with each survey.

How are SSRS Opinion Panel Surveys Conducted?

The SSRS Opinion Panel is a multi-mode panel. Most panelists take self-administered web surveys; however, the option to take surveys conducted by a live telephone interviewer is available to those who prefer to complete surveys by phone and/or who do not use the Internet. SSRS's own research suggests that more than 9 in 10 non-internet panelists would prefer to take surveys over the phone rather than be provided an internet-enabled device to take web surveys.[1] SSRS has therefore made the decision not to provide internet access to non-internet respondents as doing so does not effectively address the coverage bias of non-internet respondents.

The SSRS Opinion Panel is multi-mode (web and phone) and bilingual (English and Spanish)

Samples are drawn among panel members to best meet the study criteria. We use a probability proportional to size (PPS) sampling methodology to draw samples that are representative of the target population with respect to key demographics, attitudes, and behaviors. Selected panelists are sent an email invitation to participate in the survey, including unique survey link. The link allows the respondent to complete the self-administered online survey. Our contact protocol also includes a text message reminder for panelists that have consented to receiving text messages. All telephone interviews are conducted using a CATI (Computer Assisted Telephone Interviewing) system with live interviewers.

[1] Berta, K., Gumbs, J., Schmidt, J., Turakhia, C. "Comparing Non-internet and Web-reluctant Panelists" Presented at 2023 AAPOR Conference.

Weighting

SSRS Opinion Panel data is weighted to be representative of the entire residential adult population in the United States. The first step in the weighting process is the application of a base weight that accounts for the sample design at the recruitment and study levels. For studies that opt to have no telephone component, we then apply a proprietary model-based non-internet propensity adjustment so that results are representative of all adults and not just those who have access to the internet. Following the base weight, the panel is calibrated to correct for differential participation along demographics such as age, race, sex, region, and education. Benchmark distributions are obtained from the most recently available data from sources such as the Current Population Survey (CPS), the American Community Survey (ACS), the Pew Research Center's National Public Opinion Reference Survey (NPORS), and the Aristotle Registered Voter Database. Additionally, online panelists are known to be more civically engaged than the general population. To correct for this potential bias, we include volunteerism and interaction with neighbors in panel calibration. These benchmark distributions are derived from the Civic Engagement and Volunteer Supplement to the Current Population Survey.

How is the SSRS Opinion Panel an improvement over opt-in Online Panels?

Most recent research suggests that probability samples provide the most accurate data. Surveys that utilize a probability sample combined with an opt-in sample are less accurate than surveys of full probability samples. Least accurate are surveys comprised entirely of opt-in panel sample. The SSRS Opinion Panel is a fully probability-based panel because it recruits randomly selected panelists from probability-based sample sources that reflect the U.S. adult population (ABS and RDD prepaid cell). Results obtained from this panel can statistically represent a target population with a known margin of error.

Unlike typical opt-in panels, no one can "volunteer" to be part of the SSRS Opinion Panel. They must be selected randomly and invited to participate. By employing rigorous sampling methods, we not only reduce the risk of selection bias but also minimize susceptibility to "bots" or fraudulent panelists. This additional layer of security enhances the reliability of our survey results.

SSRS Opinion Panel Standard Deliverables

SSRS Opinion Panel standard deliverables include a weighted SPSS data file (with standard demographic variables) and an AAPOR compliant methods statement (with response rate calculations) provided after completion of all data collection and weighting. Upon request, we can also provide access to an online dashboard that provides near real-time project updates during data collection.

In addition to standard deliverables, our deliverables and other offered services are fully customizable to client needs.

SSRS Opinion Panel Demographics

A battery of demographic and other questions is asked during the recruitment of panelists. These questions are stored securely and kept for identifying target respondents, used for weighting, and can be appended to study data to expand what is known about respondents. Demographics are typically not re-asked for every survey unless there is reason to believe that the data could have changed in a meaningful way. Available demographics are provided in the table below.

Standard Profile Variables^

Age
Gender
Education
Race/Ethnicity
Employment Status
Marital Status
Party Identification
Political Ideology
Voter Registration
Income
Home Ownership
Internet Use Frequency
Household Size/Composition
Parental Status
Region (U.S. Census – 4 category)
Division (U.S. Census – 9 category)
State
Metro Status
DMA (Designated Market Area)

^Included in standard deliverables.

Custom Profile Variables*

Religion
Health Insurance Type
Disability/Handicap
Sexual Orientation
Detailed Hispanic Nativity
Work role/Purchasing power
Employer Size
Retirement Savings Type
Age of Children
Active Duty/Armed Forces Status
Gun Ownership
Internet Type
Zip code
Social Media Usage

*Available for an additional cost

CNN Quick Turnaround Prob Panel Poll 4
Questionnaire (English)
Version: 6/28/2024

GLOBAL SOP PROGRAMMING NOTES:

1. SCREEN-OUT LANGUAGE (IF TERMINATING IN SCREENER – NO INCENTIVE):
   "Unfortunately, you do not qualify for this survey. We thank you for your time and hope you look forward to getting new survey invitations from us in the future."

2. Survey should be programmed to be device-responsive.

3. Display question numbers for testing purposes only. Do not display the section headers, question numbers, or other question labels for the live respondent survey.

4. Each question should be displayed on a new screen unless otherwise noted.

5. Respondents should be able to click anywhere within the radio buttons/check boxes or on the corresponding labels for those response options when selecting a response.

6. Do not include a progress bar.

7. Allow respondents to [1] finish the survey at a later time, and [2] resume the survey where they left off.

8. Grids: Do not program multi-items questions as grids unless otherwise specified.
   IF SPECIFIED TO PROGRAM AS GRID:
   a. Grid programming for desktop version only. For mobile devices, program each item in a multi-item question on its own screen.
   b. For questions with multiple items that are set up the question as a grid, items should be programmed down the left side and response options across the top from left to right.
   c. HTML tables should be programmed in a way that column widths are set as proportions of the screen size. This will allow content to adjust to different browser window sizes.
   d. The table should be centered and be flexible to take up 90% of the browser width, with the size determined in percent to maintain the relative column width.
   e. Response columns should be of equal width.
   f. If possible, grids should not display table lines. Instead, rows for items should be shaded in a color that matches the design theme, and alternate between shaded row and non-shaded row.
   g. For Desktop version, program detection of straight-lining behavior.

9. If question or response text is in bold, italics, underlined, or ALL CAPS, please do the same in the online survey.

10. All links in a survey -- whether for FAQs, Help Sheet, or Support -- will be programmed as pop-ups, with the exception of surveys viewed via mobile devices.

GLOBAL NON-SOP PROGRAMMING NOTES:

1. Look and feel for the online survey: Standard SSRS Opinion Panel, with responsive survey design.

2. Browser title should read: SSRS Opinion Panel Survey

3. Unless otherwise specified, questions after the screener are non-mandatory. Allow respondents to skip questions after the screener (beginning with A1/Q1). After skipping a question, respondents should be taken to the next question they are eligible to receive, unless otherwise specified.
   a. We have exceptions to this rule with **PE1** and **PE2**, which we need responses for in order to determine who qualifies for the survey. We want these to be forced choice.

4. Navigation buttons:
   a. Labeled "Back", "Finish Later" and "Next".
   b. Back button should be on the left, Finish Later button in the middle, and Next button should be on the right.
   c. Include a << button throughout the online survey.

5. Each page of the online survey, including the survey suspension page (i.e., the page respondents see after they click the "Finish Later" navigation button), should contain the SSRS Opinion Panel logo, except for mobile devices. For mobile, display logo on welcome landing page and survey suspension page only.

6. Footer for each page, centered and displayed in a smaller text font, should contain the following information:

   Questions or technical problems?

   Contact us at jamie.miller@ssrspanel.com [PN: Autofill subject line: (INSERT JOB#) Technical Support: Case # [INSERT RESPID FROM PROJECT PID IN PARENTHESES]]

7. For questions with "other-specify" options and Web, prompt once for completion if option selected but no text is entered. If still skipped with no text entered, allow blank text responses. For CATI, force a text response to be typed in the specify text box if the other response option is selected. The following error message should be shown above the skipped text box: "***Please enter a response in the '(Specify)' box.***"

8. Do not display "Web blank" categories unless otherwise specified.

9. Please code any skipped questions for a question that a web respondent saw as a "999 Web blank".

10. Error Message(s) for detection of straight-lining behavior in grids (red, bold, and italicized): "***Your opinions are very important to us. Please review your responses to this question to ensure the online survey has accurately captured your responses.***"

11. Error Messages for skipped questions: In general, respondents should be able to skip any question. However, we would like an error message to show up for respondents:

    a. For the first two (2) skipped questions.
    b. For any elements that are skipped in a grid-type question. For grid questions programmed as separate items on mobile devices, treat all attributes as a single question -- in other words, if a respondent skips an attribute on a grid, they should see the error message, but if they skip an additional attribute, they should not see the error message again.
    c. For questions with "other-specify" options or full open-ends, and the respondent left the text box blank.

    The following error message should be shown above the skipped question (red, bold, and italicized): "***Your answers to these questions are very important to us. Can you please take a moment to review your responses below for completion? If you do not wish to answer this question or have no opinion on it, click the Next button again to continue the survey.***"

    The respondent should be allowed to skip the question after this message is shown; they should **not** be required to answer the question before moving on after the error message conditions outlined above are met, except where noted at the question-level.

12. For Web, auto-suspend the survey after **15** minutes of inactivity.

[TEXT FOR "FINISH LATER" LANDING PAGE]
Your responses are important to us. We hope that you'll come back later and finish the survey.

When you wish to resume, return to the link you were provided. It will take you to the last question you answered.

INTRODUCTIONS AND SCREENERS

WEB INTRODUCTION AND SCREENER

(SHOW TO ALL WEB)
(PN: INSERT COMPENSATION AMOUNT)

WS1. Thank you for being a valued member of the SSRS Opinion Panel. We are pleased to send you our invitation for this survey.

In appreciation of your time, if you qualify for and complete this survey, **you will receive <<$INSERT>> in compensation** via an electronic gift code immediately after completion of this survey.

Your answers are confidential. You are not required to answer any question you do not wish to answer.

By continuing, you are giving your consent to participate.

Please click the Next>> button to begin your survey.

CATI INTRODUCTION

VOICEMAIL MESSAGE
[PN: LEAVE ONLY ONCE, THE FIRST TIME A CALL GOES TO VOICEMAIL FOR LL OR CELL; SET FOR CALLBACK]
Hello, I am calling from SSRS on behalf of the SSRS Opinion Panel. This is NOT a sales call. We will try to reach you again.

(ASK IF SSRS PANEL CATI)

CS1. Hello, my name is _____ calling on behalf of the SSRS Opinion Panel. This is NOT a sales call. This call may be monitored or recorded for quality assurance.

May I please speak to [INSERT PANELIST NAME; IF NO PANELIST NAME, INSERT: the member of this household who joined the SSRS Opinion Panel]?

(READ IF PERSON ON PHONE ASKS THE PURPOSE OF CALL: "[INSERT PANELIST NAME; IF NO PANELIST NAME, INSERT: An adult at this number] joined the SSRS Opinion Panel. We are reaching out to them for their next survey opportunity.")

1 Respondent already on the phone
2 Respondent coming to phone
3 Respondent is unavailable
999 Refusal

[PN: IF CS1=1,2, GO TO CS1T]
[PN: IF CS1=3, THANK AND SET FOR CALLBACK]
[PN: IF CS1=999, THANK AND TERMINATE – SHOW CS1 TERM TEXT]
[PN: CS1 TERMINATION TEXT: "Thank you very much for your time. Have a good day/evening."]

(IF CS1=1,2)
(PN: IF RESPONDENT CAME TO PHONE (CS1=2), INSERT TEXT AS SHOWN)
(PN: INSERT COMPENSATION AMOUNT)

CS1T. [INSERT IF CS1=2: Hello, my name is _____ calling on behalf of the SSRS Opinion Panel. This is NOT a sales call. This call may be monitored or recorded for quality assurance.] Thank you for being a valued member of the SSRS Opinion Panel. You will receive a <<$INSERT>> check in the mail for completing the following survey.

1 Continue
999 Refusal

[PN: IF CS1T=1, CONTINUE]
[PN: IF CS1T=999, THANK AND TERMINATE – SHOW CS1 TERM TEXT]
[PN: CS1T TERMINATION TEXT: "Thank you very much for your time. Have a good day/evening**."]**

(ASK IF PRESCREENED CATI LANDLINE)
(PN: INSERT COMPENSATION AMOUNT)

CS2. Hello, my name is _____ calling on behalf of the SSRS Opinion Panel. This is NOT a sales call. We're conducting a national public opinion survey on interesting issues facing Americans today. We will pay eligible respondents <<$INSERT>> for participating in this survey. This call may be monitored or recorded for quality assurance.

To randomly select an adult in your household, may I please speak with the person, age 18 or older, who has the next birthday and is at home now?

(READ IF NECESSARY: Your phone number has been randomly selected to complete the survey. We are not selling anything.)

(READ IF NECESSARY: I am calling for SSRS, a national research firm.)

1 Continue with respondent already on phone
2 New respondent being brought to phone
3 No adult currently at home
999 Refusal

[PN: IF CS2=1, CONTINUE]
[PN: IF CS2=2, RE-READ INTRO AND THEN CONTINUE]
[PN: IF CS2=3, GET NAME AND SET FOR CALLBACK]
[PN: IF CS2=999, THANK AND TERMINATE]
[PN: CS2 TERMINATION TEXT: "Thank you very much for your time. Have a good day/evening."]

(ASK IF PRESCREENED CATI CELL)
(PN: INSERT COMPENSATION AMOUNT)

CS3. Hello, my name is _____ calling on behalf of the SSRS Opinion Panel. This is NOT a sales call. We're conducting a national public opinion survey on interesting issues facing Americans today. We will pay eligible respondents <<$INSERT>> for participating in this survey. This call may be monitored or recorded for quality assurance.

First, just a few background questions. Are you under 18 years old, or are you 18 or older?

(READ IF NECESSARY: Your phone number has been randomly selected to complete the survey. We are not selling anything.)

(READ IF NECESSARY: I am calling for SSRS, a national research firm.)

1 Under 18
2 18 or older
999 (DO NOT READ) Don't know/Refused

[PN: IF CS3=2, CONTINUE]
[PN: IF CS3=1, THANK & TERMINATE]
[PN: IF CS3=999, THANK & TERMINATE]
[PN: CS3 TERMINATION TEXT: "This survey is limited to adults age 18 and over. Have a good day/evening."]

(ASK ALL CATI)

CS4. Before we continue, are you driving or doing any activity requiring your full attention?

1 Yes, driving
2 No, not driving
999 (DO NOT READ) Don't know/Refused

[PN: IF CS4=1, GET NAME AND SET FOR CALLBACK)]
[PN: IF CS4=2, CONTINUE]
[PN: IF CS4=999, THANK AND TERMINATE]
[PN: CS4 TERMINATION TEXT: "Thank you very much for your time. Have a good day/evening."]

MAIN INTERVIEW

[PN: FOR CATI ONLY: INCLUDE THE FOLLOWING PROBE AFTER EACH QUESTION]
[REQUIRED PROBE IF DON'T KNOW/REFUSED IS THE VOLUNTEERED RESPONSE: "If you had to choose one of the response options I read to you, which would it be?**" (RE-READ QUESTION ONLY IF NECESSARY)]**

(ASK IF SSRS PANEL CATI, OR PRESCREENED CATI LANDLINE OR CELL)

SEX. [DO NOT ASK] RECORD RESPONDENT'S SEX

1 Male
2 Female

(ASK IF WEB)
(PN: ALLOW MULTIPLE RESPONSES; CODES 6,999 ARE EXCLUSIVE; RANDOMIZE CODES 1-5; INCLUDE RANDOMIZATION IN DATA FILE)

TR1. In which of the following activities have you participated during the past 7 days? Please select all that apply.

1 Checked email
2 Traveled to a remote location on a private jet
3 Drank coffee or tea
4 Read a book or newspaper
5 Drove a car
6 None of the above
999 Web blank

(PN: SHOW TO ALL)

TRANSITION1. First of all, here are some questions about issues that impact the United States of America.

[PN: IF WEB:] Your answers are confidential. You are not required to answer any question you do not wish to answer.

[PN: IF WEB:] **Please click Next>> to continue.**

[PN: IF CATI:] [NOTE TO INTERVIEWER: Click >> to continue.]

(IF CELL PHONE SAMPLE)

C1. Now thinking about your telephone use, is there at least one telephone INSIDE your home that is currently working and is not a cell phone?

1 Yes, has a home telephone

2 No, no home telephone
8 (DO NOT READ) Don't know
9 (DO NOT READ) Refused

(ASK IF CELL PHONE SAMPLE OR HH HAS A CELL PHONE (L1=1))

C1a. How many different cell phone numbers do you personally answer calls on?

_____ (ENTER # CELL PHONE NUMBERS)
99 (DO NOT READ) Refused

(ASK IF LL SAMPLE OR HH HAS A LL PHONE (C1=1))

C-3a. How many telephone numbers does your household have that I could have reached you on? Not extensions, but different telephone numbers, not counting cell phones?

01 _____ (ENTER # CELL PHONE NUMBERS)
99 (DO NOT READ) Don’t know/No answer

Z-2. Are you…? (READ LIST)

1 Single, that is never married
2 Single, living with a partner
3 Married
4 Separated
5 Widowed, or
6 Divorced
9 (DO NOT READ) Refused

Z-4. Currently, are you yourself employed full-time, part-time, or not at all?

1	Full-time	(SKIP TO Q.Z-6)
2	Part-time	(SKIP TO Q.Z-6)
3	Not employed	(GO TO Q.Z-5)
9	Refused	(SKIP TO Q.Z-6)

(ASK IF NOT EMPLOYED IN Q.Z-4)
Z-5. Are you…? (READ LIST)

1 Retired
2 A homemaker
3 A student, or
4 Temporarily unemployed
5 (DO NOT READ) Disabled/handicapped
0 (DO NOT READ) Other
8 (DO NOT READ) Don't Know
9 (DO NOT READ) Refused

Z-6. Including yourself, how many people are there living in your household?
(RECORD SINGLE-DIGIT NUMBER)

_____
8 Eight or more people
9 Refused

(IF 1 OR IF REFUSED, SKIP TO Q.Z-7)
Z-6a. How many of these are adults, 18 or older?
(RECORD SINGLE-DIGIT NUMBER)

_____
8 Eight or more people
9 Refused

Z-6b. How many are children 12 to 17?
(RECORD SINGLE-DIGIT NUMBER)

_____
0 None
5 Five or more children
9 Refused

Z-6c. How many are children 6 to 11?
(RECORD SINGLE-DIGIT NUMBER)

_____
0 None
5 Five or more children
9 Refused

Z-6d. How many are children under 6?
(RECORD SINGLE-DIGIT NUMBER)

_____
0 None
5 Five or more children
9 Refused

(IF TOTAL NUMBER OF ADULTS AND CHILDREN DO NOT EQUAL NUMBER IN Z-6, RE-ASK Z-6 THROUGH Z-6D)

DI-22a. You mentioned there is/are (a) child(ren) between the ages of 12 and 17. Could you please me give me the age of (the first/next) child?

_____ ENTER AGE OF FIRST/NEXT CHILD

(ASK FOR FIRST FIVE (5) CHILDREN IN THIS AGE GROUP)

DI-22b. You mentioned there is/are (a) child(ren) between the ages of 6 and 11. Could you please me give me the age of (the first/next) child?

_____ ENTER AGE OF FIRST/NEXT CHILD

(ASK FOR FIRST FIVE (5) CHILDREN IN THIS AGE GROUP)

DI-22c. You mentioned there is/are (a) child(ren) under the age of 6. Could you please me give me the age of (the first/next) child?

_____ ENTER AGE OF FIRST/NEXT CHILD

(ASK FOR FIRST FIVE (5) CHILDREN IN THIS AGE GROUP)

(IF ANYONE UNDER 18 IN HOUSEHOLD)

Z-6e. Are you the parent or guardian of a child under the age of 18 living in your household?

1 Yes
2 No
8 (DO NOT READ) Don't Know
9 (DO NOT READ) Refused

Z-8. What is the highest level of school you have completed or the highest degree you have received?

(DO NOT READ LIST)

(INTERVIEWER NOTE: Enter code 3-HS grad if Respondent completed training that did NOT count toward a degree)
(INTERVIEWER NOTE: Enter code 3-HS graduate if Respondent completed vocational, business, technical, or training courses after high school that did NOT count toward an associate degree from a college, community college or university (e.g., training for a certificate or an apprenticeship))

01 Less than high school (Grades 1-8 or no formal schooling) (OLD CODE 1)
02 High school incomplete (Grades 9-11 or Grade 12 with NO diploma) (OLD CODE 1)
03 High school graduate (Grade 12 with diploma or GED certificate) (OLD CODE 2)
04 Some college, no degree (includes community college) (OLD CODE 3)
