Title: PPIC Statewide Survey

Survey Organizations: Ipsos

Sponsors: Public Policy Institute of California (PPIC)

Field Dates: November 6 - 22, 2024

Sample: Adult residents of California, including an oversample of lower-income Californians

Sample Size: 2344

Interview Modes: Web-based survey

Weight Location: Columns 4060-4065 (x.xxxx) - WEIGHT

Usage Notes: Interviews are conducted among Ipsos KnowledgePanel members. The dataset contains more than one weight variable: WEIGHT is the weight for the overall sample (N=2,344). To look at only the low-income oversample, use the weight WEIGHT2.

Methodology

This is the 26th year of the PPIC Statewide Survey. Coauthors of this report include survey director Mark Baldassare, who holds the Miller Chair in Public Policy; associate survey director and research fellow Dean Bonner, who was project manager for this survey; and survey analysts Lauren Mora and Deja Thomas. The Californians and Their Economic Well-Being survey is supported with funding from the Arjay R. and Frances F. Miller Foundation and the James Irvine Foundation. The PPIC Statewide Survey invites input, comments, and suggestions from policy and public opinion experts and from its own advisory committee, but survey methods, questions, and content are determined solely by PPIC's survey team.

Findings in this report are based on a survey of 2,344 California adult residents. The median time to complete the survey was 18 minutes. Interviews were conducted from November 6–22, 2024.

The survey was conducted by Ipsos, using its online KnowledgePanel, in English, Spanish, Chinese (simplified or traditional), Vietnamese, and Korean according to respondents' preferences. We chose these languages because Spanish is the dominant language among non-English-speaking adults in California, followed in prevalence by the three Asian languages. KnowledgePanel members are recruited through probability-based sampling and include both those with internet access and those without. KnowledgePanel provides internet access for those who do not have it and, if needed, a device to access the internet when they join the panel. KnowledgePanel members are primarily recruited using address-based sampling (ABS) methodology, which improves population coverage, particularly for hard-to-reach populations such as young adults and minority groups. ABS-recruited Latinos are supplemented with a dual-frame random digit dialing (RDD) sampling methodology that targets telephone exchanges associated with areas with a higher concentration of Latinos to provide the capability to conduct representative online surveys with Latinos, including those who speak only Spanish. KnowledgePanel's recruitment was originally based on a national RDD frame and switched to the primarily ABS-based methodology in 2009. KnowledgePanel includes households with landlines and cell phones, including those with cellphones only and those without phones. ABS allows probability-based sampling of addresses from the US Postal Service's Delivery Sequence File (DSF). The DSF-based sampling frame used for address selection is enhanced with a series of refinements—such as the appendage of various ancillary data to each address from commercial and government data sources—to facilitate complex stratification plans. Taking advantage of such refinements, quarterly samples are selected using a stratified sampling methodology that aims to retain the representativeness of the panel. KnowledgePanel recruits new panel members throughout the year to offset panel attrition.

To qualify for the survey, a panel member must be age 18 or older and reside in California. A general population sample of Californians was selected using Ipsos's PPS (probability proportional to size) sampling procedure to select study-specific samples. Briefly, to select such samples, the panel is first weighted to population benchmarks and those panel weights are used as the measure of size for a PPS sample selection that yields a fully representative sample. An oversample of panelists with household income under $40,000 augmented the general population sample. A total of 2,422 respondents completed the survey out of 6,944 panelists who were sampled, for a response rate of 35 percent. To ensure the highest data quality, we flagged respondents who sped through the survey, which we defined as completing the survey in one-fourth of the overall median time (less than 4.4 minutes). We also flagged respondents if their self-reported age or gender did not match the data stored in their profile. A total of 78 cases were removed after this review process, resulting in 2,344 total qualified and valid cases.

Accent on Languages, Inc., translated new survey questions into Spanish, with assistance from Renatta DeFever. Ipsos translated all survey questions into Chinese, Vietnamese, and Korean.

Ipsos uses the US Census Bureau's 2018–2022 American Community Survey's (ACS) Public Use Microdata Series for California (with regional coding information from the University of Minnesota's Integrated Public Use Microdata Series for California) to compare certain demographic characteristics of the survey sample—region, age, gender, race/ethnicity, and education—with the characteristics of California's adult population. The survey sample was closely comparable to the ACS figures. We also used voter registration data from the California Secretary of State to compare the party registration of registered voters in our sample to party registration statewide. The sample of Californians is first weighted using an initial sampling or base weight that corrects for any differences in the probability of selecting various segments of the KnowledgePanel sample. This base weight is further adjusted using an iterative proportional fitting (raking) procedure that aligns sample demographics to population benchmarks from the 2018–2022 ACS data as well as party registration benchmarks from the California Secretary of State's voter registration file.

The sampling error, taking design effects from weighting into consideration, is ±3.1 percent at the 95 percent confidence level for the total unweighted sample of 2,344 adults. This means that 95 times out of 100, the results will be within 3.1 percentage points of what they would be if all adults in California were interviewed. The sampling error for unweighted subgroups are larger: for the 1,929 registered voters, the sampling error is ±3.3 percent; for the 1,449 likely voters, it is ±3.8 percent. The sampling error for the oversample of 1,020 lower-income Californians is ±5.3 percent. Sampling error is only one type of error to which surveys are subject. Results may also be affected by factors such as question wording, question order, and survey timing.

We present results for five geographic regions, accounting for approximately 90 percent of the state population. "Central Valley" includes Butte, Colusa, El Dorado, Fresno, Glenn, Kern, Kings, Madera, Merced, Placer, Sacramento, San Joaquin, Shasta, Stanislaus, Sutter, Tehama, Tulare, Yolo, and Yuba Counties. "San Francisco Bay Area" includes Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, Solano, and Sonoma Counties. "Los Angeles" refers to Los Angeles County, "Inland Empire" refers to Riverside and San Bernardino Counties, and "Orange/San Diego" refers to Orange and San Diego Counties. Residents of other geographic areas are included in the results reported for all adults, registered voters, and likely voters, but sample sizes for these less-populous areas are not large enough to report separately.

We present results for non-Hispanic whites, who account for 38 percent of the state's adult population, and also for Latinos, who account for 36 percent of the state's adult population and constitute one of the fastest-growing voter groups. We also present results for non-Hispanic Asian Americans, who make up about 16 percent of the state's adult population, and non-Hispanic African Americans, who comprise about 5 percent. Results for other racial/ethnic groups—such as Native Americans—are included in the results reported for all adults, registered voters, and likely voters, but sample sizes are not large enough for separate analysis. Results for African American and Asian American likely voters are combined with those of other racial/ethnic groups because sample sizes for African American and Asian American likely voters are too small for separate analysis. We compare the opinions of those who report they are registered Democrats, registered Republicans, and decline-to-state or independent voters; the results for those who say they are registered to vote in other parties are not large enough for separate analysis. We also analyze the responses of likely voters—so designated per their responses to survey questions about voter registration, previous election participation, intentions to vote this year, attention to election news, and current interest in politics.

Sample sizes and margins of error for each subgroup are presented in the table below.

The percentages presented in the report tables and in the questionnaire may not add to 100 due to rounding.

We compare current PPIC Statewide Survey results to those in our earlier surveys and national surveys conducted by Gallup. Numerous questions were adapted from the Public Religion Research Institute's (PRRI) California Workers Survey dated August 2018 and national surveys by the Pew Research Center and YouGov. Additional details about our methodology can be found at www.ppic.org/wp-content/uploads/SurveyMethodology.pdf and are available upon request through surveys@ppic.org.

KNOWLEDGEPANEL® | OVERVIEW

Be Sure with KnowledgePanel®

Ensuring accuracy with an industry leading representative random sample, exceptional response rates and coverage

KnowledgePanel has been at the forefront of conducting online research for more than two decades. Backed by scientific design, statistical rigor and sector expertise, it provides consistently high-quality measurement.

KnowledgePanel is the largest probability-based online panel in the U.S.—with about 55,000 members. Our research capability spans all industries from public health to commercial services and products. We have the most experienced analysts and online panel research team in the industry. And, with thousands of profile variables, we can reach all with the cost benefit of online survey administration without sacrificing accuracy.

With address-based sampling (ABS), KnowledgePanel provides a statistically valid representation of the U.S. population as well as many difficult-to-survey populations:

- cellphone-only households
- African Americans
- Latinos
- young adults (ages 15+)

Rigorous design, superior coverage, panel size and sound methodology make KnowledgePanel® the most suitable choice for a broad range of commercial, academic, and governmental applications.

The key design advantages of KnowledgePanel

- **We address self-selection bias by choosing respondents.** Our efficient sample design uses a single sampling frame: the Delivery Sequence File (DSF) of the United States Postal Service, covering almost 100% of the U.S. population.
- **We address participant fatigue by ensuring minimal survey burden.** Panelists take on average two KnowledgePanel surveys a month, minimizing respondent fatigue and attrition. Our research has highlighted a stark difference in the burden on KnowledgePanel members compared to opt-in participants:

Panel Hygiene

Number of surveys in a typical month from all sources:

We would like to think about surveys you take online over the internet. About how many ONLINE surveys would you estimate that you complete in a typical month?

	KP Members	Opt-in
Mean	7.25	26.8
Median	5	15

About 80+ percent of KP members only belong to KnowledgePanel. The same stat of solo panel membership for Opt-in samples is at 33.

- **We address mode bias.** Mixed-mode effects have been found with dual-mode online and telephone methods. KnowledgePanel provides non-internet households with a netbook and internet service to enable a single mode of data collection. The example below highlights the impact of mode on the responses of similar demographic groups:

Question		Telephone	Online
Do you favor or oppose providing a legal way for illegal immigrants already in the country to become citizen?	Strongly favor	33.3*	20.3
	Somewhat favor	31.8	34.5
	Somewhat oppose	11.5	24.1
	Strongly oppose	23.4	21.1

**significant difference by mode at 95% confidence*

- **We address coverage bias.** We provide coverage of hard-to-reach populations such as Hispanics across all acculturation levels, minority young adults, low income households, populations with low educational attainment, youth and pre-teens.

- **We address coverage of U.S. Hispanics.** You no longer need to rely on expensive and problematic methods when conducting Hispanic research. KnowledgePanel Latino[SM] has reinvented research to meet the needs of the online survey age without sacrificing population representation and the sound sampling principles you expect. We uniquely cover about 93% of U.S. Latino households. This encompasses Spanish- and English-dominant and bilingual households alike, as well as U.S. Latinos who do not have access to the internet at least occasionally.
- **We address non-response bias.** We lead the online research industry in terms of the proportion of the respondent pool that actually participates in our research. This is partly the result of our efforts to "convert" non-responders.
- **We can calibrate.** KnowledgePanel Calibration[SM] meets the needs of studies involving either exceptionally large sample sizes or the targeting of very small sub-populations/local geographies. This blended web sample approach is an effective methodology when compared to conducting the survey exclusively with non-probability opt-in panels. When calibrated, the combined sample sources—KnowledgePanel and opt-in online samples—result in higher accuracy over the use of an opt-in sample alone.

We know our panelists. We maintain an extensive, multi-year database of more than 2,000 profile variables based on survey respondents. Updated annually, the database is used to identify unique subgroups that are otherwise unattainable online. With the breadth of Ipsos KnowledgePanel profiles, we are able to:

- target the specific survey respondents you need, so that you don't need to waste valuable time in your custom survey
- integrate analytic value from profile packages—this might include, but is not limited to, information about political affairs, lifestyle, media, shopping habits, financial views, technological sophistication and more
- create custom panels based on collected characteristics, behaviors and attitudes of Ipsos KnowledgePanel members, eliminating the cost of newly recruiting a panel
