METHODOLOGICAL DETAILS

This poll was jointly sponsored and funded by The Washington Post and ABC News. The poll is a random sample of the continental United States, not including Alaska and Hawaii, with interviews in English and Spanish.

This questionnaire was administered with the exact questions in the exact order as appears in this document. Demographics and religious identity questions are not shown. If a question was asked of a reduced base of the sample, a parenthetical preceding the question identifies the group asked. Phrases surrounded by parentheticals within questions indicate clauses that were randomly rotated for respondents. Results preceded by "RV" indicate results among registered voters.

A dual frame landline and cellular phone telephone sample was generated using Random Digit Dialing procedures. Interviewers called landlines cellular phone numbers, first requesting to speak with the youngest adult male or female at home. The final sample included 352 interviews completed on landlines and 651 interviews completed via cellular phones, including 404 interviews with adults in cell phone-only households.

This survey uses statistical weighting procedures to account for deviations in the survey sample from known population characteristics, which helps correct for differential survey participation and random variation in samples. The overall adult sample is weighted to correct for differential probabilities of selection among individuals who are landline-only, cell phone-only or dual users. Results are also weighted match the demographic makeup of the population by sex, region, age, education and race/ethnicity according to the latest Current Population Survey March Social and Economic Supplement by age, race/ethnicity, sex and education.

All error margins have been adjusted to account for the survey's design effect, which is 1.24 for this survey. The design effect is a factor representing the survey's deviation from a simple random sample, and takes into account decreases in precision due to sample design and weighting procedures. Surveys that do not incorporate a design effect overstate their precision.

Group	Unweighted sample size	Error margin
All adults	1,003	+/- 3.5 points
Registered voters	816	4
Registered Leaned Dems	385	5.5
Registered Leaned Reps	346	6
Whites	666	4
Blacks	122	10
Hispanics	126	9.5
