Title: Gallup/EBRI Poll: Public Attitudes on Health Benefits, Part 2

Survey Organizations: Gallup Organization

Sponsors: Employee Benefit Research Institute

Field Dates: December 1 - 31, 1991

Sample: National adult

Sample Size: 1000

Interview Modes: Telephone Interview, Landline

Weight Location: None

Usage Notes: Columns locations are found to the right of the question in this format (CC), where CC = Column(s).

Please note that data provided by the Roper Center for Public Opinion Research may not be re-disseminated without written permission. The results of any analyses conducted on the data may, however, be published with appropriate acknowledgments and source citation.

Introduction

Employee Benefit Research Institute (EBRI) of Washington, D.C., commissioned The Gallup Organization, Inc. of Princeton, New Jersey to conduct a national public opinion study regarding consumer behavior and attitudes about the quality and cost of health care. EBRI was responsible for suggesting subject areas and Gallup was responsible for ensuring that questions were properly asked and without bias.

During December 1991, 1,000 Americans age 18 and older across the continental United States were contacted by telephone from randomly generated telephone lists. Random lists eliminate bias against newly listed and unlisted telephone numbers. Gallup uses a three-callback methodology in which up to three calls are made to the same telephone number in order to eliminate bias in favor of those easy to reach by telephone.

As part of Gallup's quality-control procedures, ten percent (10%) of all interviews are checked by supervisory personnel to ensure that data is accurate and properly procured. All interviews are conducted in Gallup's communication facility by professionally trained interviewers under exclusive employment of The Gallup Organization.

The final results presented in this report have been statistically weighted by sex, race, education, age and region to be proportional to the population of individuals age 18 and older across the continental United States.

The maximum expected error range at the 95% confidence level for a study of 1,000 respondents is $\pm$3.1%. Stated more simply, if 100 different samples of 1,000 persons each were randomly chosen from the population, 95 times out of 100 the total

results obtained would vary no more than ±3.1 percentage points from the results that would be obtained if the entire population were surveyed. The maximum expected statistical error range at the 95% level of confidence is given in the following table:

EXPECTED ERROR RANGE FOR A MARKET SAMPLE OF 1,000 RESPONDENTS*

Results About:	10%	20%	30%	40%	50%	60%	70%	80%	90%
Error Range:	±1.9	±2.5	±2.8	±3.0	±3.1	±3.0	±2.8	±2.5	±1.9

* At the 95% confidence level

(1126)(1127)

3. How do you rate your current health insurance benefits? Would you say they are (read 1-4)?

1	Excellent	4	Poor	
2	Good	5	(DK)	
3	Fair	6	(Refused)	5 (1128)

4. Does your household maintain a relationship with a physician who could be called your personal or family doctor?

1	2	3	4	
Yes	No	(DK)	(RF)	6 (1129)

5. In the last five years, has your household had to involuntarily change your personal or family physician?

1	2	3	4	
Yes (Continue)	No	(DK) (Skip to #8)	(RF)	7 (1130)

6. (If "Yes" in #5, ask:) Which of the following statements best describes the reason for that change? Was it because (read 06-08, then 01)?

01 Or, some other reason (list)
02 (DK)
03 (Refused)
04 HOLD
05 HOLD

06 Your health benefit plan required you to change doctors
07 You selected another health benefit plan from your employer
08 You changed jobs

8.10
(1131) (1132)

---

7. Which of the following statements best describes your reaction to the change in doctors? (Read 1-3)

1 You were more satisfied with the care you received after the change than with the care you received before the change

2 You were equally satisfied with the care you received after the change and with the care you received before the change

3 You were less satisfied with the care you received after the change than with the care you received before the change

4 (DK)
5 (Refused)

9 (1133)

8. Who do you think should be most responsible for providing health benefits for full-time employees and their dependents in the U.S.? Do you think it should be (read and rotate 1-3)?

1 Employers
2 The federal government
3 Individuals themselves

4 (All the same)
5 (DK)
6 (Refused)

9.10 (912)

9. Which of the following groups do you think is in the best position to influence the cost of health care? Do you think it is (read 1-5)?

1 Employers
2 Individuals
3 Government
4 Doctors
5 Insurers

6 (All the same)
7 (DK)
8 (Refused)

9.20 (913)

10. Which of the following groups is in the best position to make decisions about the quality of health care provided by a hospital or physician? Do you think it is (read and rotate 1-3)?

1 Employers
2 Individuals
3 Government

4 (All the same)
5 (DK)
6 (Refused)

10 (914)

11. (If "Yes" in #1, ask:) Many companies, insurers, and government programs have adopted measures to eliminate unnecessary expenditures on health care and to save costs by promoting cost-effective care. Have these cost management measures resulted in any of the following? How about (read and rotate A-C)?

	Yes	No	(DK)	(RF)	
A. Your being denied health care services that you think you needed	1	2	3	4	11.11(915)
B. Your experiencing unreasonable "hassle" or delays in obtaining health care services	1	2	3	4	11.12(916)
C. Your being required to receive health care services from a physician you would not have otherwise chosen	1	2	3	4	11.13(917)

12. For your own health care and that of your family, which of the following is your biggest concern? Is it (read and rotate 06-08)?
