Country: United States

Title: Gallup/EBRI Poll: Public Attitudes on National Health Insurance

Survey Organizations: Gallup Organization

Sponsors: Employee Benefit Research Institute

Field Dates: January 1 - 30, 1992

Sample: National adult

Sample Size: 1000

Interview Modes: Telephone Interview, Landline

Weight Location: None

Usage Notes: Columns locations are found to the right of the question in this format (CC), where CC = Column(s).

Please note that data provided by the Roper Center for Public Opinion Research may not be re-disseminated without written permission. The results of any analyses conducted on the data may, however, be published with appropriate acknowledgments and source citation.

Introduction

Employee Benefit Research Institute (EBRI) of Washington, D.C., commissioned The Gallup Organization, Inc. of Princeton, New Jersey to conduct a national public opinion study on consumer behavior regarding a national health insurance system. EBRI was responsible for suggesting subject areas and Gallup was responsible for ensuring that questions were properly asked and without bias.

During January 1992, 1,000 Americans age 18 and older across the continental United States were contacted by telephone from randomly generated telephone lists. Random lists eliminate bias against newly listed and unlisted telephone numbers. Gallup uses a three-callback methodology in which up to three calls are made to the same telephone number in order to eliminate bias in favor of those easy to reach by telephone.

As part of Gallup's quality-control procedures, ten percent (10%) of all interviews are checked by supervisory personnel to ensure that data is accurate and properly procured. All interviews are conducted in Gallup's communication facility by professionally trained interviewers under exclusive employment of The Gallup Organization.

The final results presented in this report have been statistically weighted by sex, race, education, age and region to be proportional to the population of individuals age 18 and older across the continental United States.

The maximum expected error range at the 95% confidence level for a study of 1,000 respondents is $\pm$3.1%. Stated more simply, if 100 different samples of 1,000 persons each were randomly chosen from the population, 95 times out of 100 the total

results obtained would vary no more than ±3.1 percentage points from the results that would be obtained if the entire population were surveyed. The maximum expected statistical error range at the 95% level of confidence is given in the following table:

EXPECTED ERROR RANGE FOR A MARKET SAMPLE OF 1,000 RESPONDENTS*

Results About:	10%	20%	30%	40%	50%	60%	70%	80%	90%
Error Range:	±1.9	±2.5	±2.8	±3.0	±3.1	±3.0	±2.8	±2.5	±1.9

* At the 95% confidence level

Scott Ahlstrand - EBRI (Project Registration #89030280)

INTERVIEW TIME: ____ ____ (1437) (1438)

1. Lately, there have been a number of proposals to implement national health insurance in the U.S. Which of the following statements best describes your knowledge of the issue of a national health insurance system? Do you (read 1-3)?

   1 Know very little about the topic of national health insurance

   2 Have some knowledge of national health insurance

   OR

   3 Know quite a bit about national health insurance

   4 (DK)
   5 (Refused) 1.90 (1001)

2. In general, do you strongly favor, favor, oppose, or strongly oppose the implementation, by the United States government, of some type of national health insurance system?

   1 Strongly favor
   2 Favor
   3 Oppose
   4 Strongly oppose
   5 (DK)
   6 (Refused) 2 (1002)

3. National health insurance is a topic which means different things to different people. I am now going to ask you some questions about what you think would happen if a national health insurance system was implemented by the U.S. government. Under a national health insurance system, what portion of an individual's medical bills would be paid for by the government out of taxes, rather than by private insurance or out of individual's pockets? Do you think (read 1-4) would be paid by the government?

   1 All
   2 Most
   3 Some, OR
   4 None
   5 (DK)
   6 (Refused) 3 (1003)

4. Under a national health insurance system, how much choice do you think consumers would have in picking doctors? Would they have (read 1-3)?

1 More choice than they have now

2 Less choice than they have now

OR

3 About the same amount of choice as they have now

4 (DK)
5 (Refused) 4 (1004)

5. Which statement do you agree with most? (Read and rotate 1-2)

1 Under a national health insurance system, every citizen would have health care coverage

OR

2 Even if we have a national health insurance system, some citizens would still not have health care coverage

3 (DK)
4 (Refused) 5 (1005)

6. Which statement do you agree with most? (Read and rotate 1-2)

1 Under a national health insurance system, most doctors would work for the government and most hospitals would be owned or run by the government

OR

2 Under a national health insurance system, most doctors would still work for themselves, and there would be a few changes in the ownership of hospitals

3 (DK)
4 (Refused) 6 (1006)

7. Which statement do you think best applies to a national health insurance system? (Read and rotate 1-3)

1 People would have to wait more time for tests and procedures

2 People would have to wait less time for tests and procedures

OR

3 People would have to wait the same amount of time for tests and procedures as they do now

4 (DK)
5 (Refused)

7 (1007)

8. Which statement do you agree with most? (Read and rotate 1-2)

1 Under a national health insurance system, everyone in the U.S. would have the same health care coverage regardless of income

OR

2 Even if we have a national health insurance system, low income people would still not have as much coverage as others

3 (DK)
4 (Refused)

8 (1008)

9. Which of the following statements do you agree with most? (Read and rotate 1-3)

1 Under a national health insurance system, most people would have more access to expensive tests and medical procedures than they do now

2 Under a national health insurance system, most people would have less access to expensive tests and medical procedures than they do now

OR

3 Under a national health insurance system, access to expensive tests and medical procedures would be about the same as it is now for most people

4 (DK)
5 (Refused)

9 (1009)

10. Which of these two statements do you agree with most? (Read and rotate 1-2)

1 A national health insurance system would save money for the country, because there would be less paperwork and less profit for doctors, hospitals, drug companies, malpractice lawyers, and insurance companies

OR

2 A national health insurance system would cost the country more, because a national health insurance system would be less efficient than private insurance is now

3 (DK)
4 (Refused) 10 (1010)

11. If the U.S. were to adopt a national health insurance system, do you think the total amount you would pay for health care, in taxes, insurance premiums, and out-of-pocket health care expenses would (read 1-3)?

1 Increase
2 Decrease, OR
3 Stay the same as they are now
4 (DK)
5 (Refused) 11 (1011)

12. If the U.S. were to adopt a national health insurance system, do you think the quality of health care you receive would (read 1-3)?

1 Get better
2 Get worse, OR
3 Stay the same
4 (DK)
5 (Refused) 12 (1012)

13. Over the next ten years, which of the following do you think is most likely to occur? (Read 1-3)

1 The U.S. will adopt some form of a national health insurance system

2 The U.S. will alter its present health care system somehow, but will not adopt a national health insurance system

OR

3 No major changes will be made to the current U.S. health care system

4 (DK)
5 (Refused) 13 (1013)
