Title: Gallup/EBRI Poll: Public Attitudes on Health Care System Changes

Survey Organizations: Gallup Organization

Sponsors: Employee Benefit Research Institute

Field Dates: February 1 - 28, 1992

Sample: National adult

Sample Size: 1001

Interview Modes: Telephone Interview, Landline

Weight Location: None

Usage Notes: Response codes unavailable for Q4. Columns locations are found to the right of the question in this format (CC), where CC = Column(s).

Please note that data provided by the Roper Center for Public Opinion Research may not be re-disseminated without written permission. The results of any analyses conducted on the data may, however, be published with appropriate acknowledgments and source citation.

Introduction

Employee Benefit Research Institute (EBRI) of Washington, D.C., commissioned The Gallup Organization, Inc. of Princeton, New Jersey to conduct a national public opinion study on consumer attitudes on various health care issues. EBRI was responsible for suggesting subject areas and Gallup was responsible for ensuring that questions were properly asked and without bias.

During February 1992, 1,001 Americans age 18 and older across the continental United States were contacted by telephone from randomly generated telephone lists. Random lists eliminate bias against newly listed and unlisted telephone numbers. Gallup uses a three-callback methodology in which up to three calls are made to the same telephone number in order to eliminate bias in favor of those easy to reach by telephone.

As part of Gallup's quality-control procedures, ten percent (10%) of all interviews are checked by supervisory personnel to ensure that data is accurate and properly procured. All interviews are conducted in Gallup's communication facility by professionally trained interviewers under exclusive employment of The Gallup Organization.

The final results presented in this report have been statistically weighted by gender, race, education, age and region to be proportional to the population of individuals age 18 and older across the continental United States.

The maximum expected error range at the 95% confidence level for a study of 1,001 respondents is $\pm$3.1%. Stated more simply, if 100 different samples of 1,001 persons each were randomly chosen from the population, 95 times out of 100 the total

results obtained would vary no more than ±3.1 percentage points from the results that would be obtained if the entire population were surveyed. The maximum expected statistical error range at the 95% level of confidence is given in the following table:

EXPECTED ERROR RANGE FOR A MARKET SAMPLE OF 1,001 RESPONDENTS*

Results About:	10%	20%	30%	40%	50%	60%	70%	80%	90%
Error Range:	±1.9	±2.5	±2.8	±3.0	±3.1	±3.0	±2.8	±2.5	±1.9

5. In your judgement, do you think the following factors should be a major influence (MJI) on decisions about when patients should get expensive, highly-technical medical services, a minor influence (MNI), or no influence at all (NIA) on such decisions? How about (read and rotate A-E)?

		MJI	MNI	NIA	(DK)	(RF)	
A.	How much the treatment is likely to improve the patient's quality of life	1	2	3	4	5	5.11(1106
B.	How many years or months the treatment is likely to add to the patient's life	1	2	3	4	5	5.12(110
C.	Whether the patient is more than 75 years old	1	2	3	4	5	5.13(110
D.	The cost of the treatment	1	2	3	4	5	5.14(110
E.	Whether the patient is able to pay	1	2	3	4	5	5.15(1110

Col 41

6. Please tell me if you strongly agree (SA), agree (A), disagree (D), or strongly disagree (SD) with the following statements. How about (read and rotate A-C, then D)?

		SA	A	D	SD	(DK)	(RF)	
A.	Everyone should be entitled to the same amount and quality of health care, whether or not they can pay for that care	1	2	3	4	5	6	6.11(1111)
B.	Those who can afford it, should be permitted to buy very expensive treatment, such as a heart or liver transplant, that might not be available to everyone	1	2	3	4	5	6	6.12(1112)
C.	Everyone should be expected to pay something toward the cost of their health care	1	2	3	4	5	6	6.13(1113)
D.	Currently, most people who have health insurance have a portion of their insurance premium paid either by their employer or by the government. Individuals with higher incomes should pay more towards their health insurance premiums than individuals with lower incomes for the same health insurance coverage	1	2	3	4	5	6	6.20(1114)
