Title: Gallup/EBRI Poll: Public Attitudes on Setting Health Care Limits

Survey Organizations: Gallup Organization

Sponsors: Employee Benefit Research Institute

Field Dates: August 1 - 31, 1992

Sample: National adult

Sample Size: 1001

Interview Modes: Telephone Interview, Landline

Weight Location: None

Usage Notes: Columns locations are found to the right of the question.

Please note that data provided by the Roper Center for Public Opinion Research may not be re-disseminated without written permission. The results of any analyses conducted on the data may, however, be published with appropriate acknowledgments and source citation.

Introduction

Employee Benefit Research Institute (EBRI) of Washington, D.C., commissioned The Gallup Organization, Inc. of Princeton, New Jersey to conduct a national public opinion study on employee attitudes toward the quality of health care and the costs related to that care. EBRI was responsible for suggesting subject areas and Gallup was responsible for ensuring that questions were properly asked and were without bias.

During August 1992, 1,001 Americans age 18 and older across the continental United States were contacted by telephone from randomly generated telephone lists. Random lists eliminate bias against newly listed and unlisted telephone numbers. Gallup uses a three-callback methodology in which up to three calls are made to the same telephone number in order to eliminate bias in favor of those individuals easy to reach by telephone.

As part of Gallup's quality-control procedures, ten percent (10%) of all interviews are checked by supervisory personnel to ensure that data is accurate and properly procured. All interviews are conducted in Gallup's communication facility by professionally trained interviewers under exclusive employment of The Gallup Organization.

The final results presented in this report have been statistically weighted by gender, race, education, age and region to be proportional to the population of individuals age 18-65 across the continental United States.

The maximum expected error range at the 95% confidence level for a study of 1,001 respondents is $\pm$3.1%. Stated more simply, if 100 different samples of 1,001

persons each were randomly chosen from the population, 95 times out of 100 the total results obtained would vary no more than ±3.1 percentage points from the results that would be obtained if the entire population were surveyed. The maximum expected statistical error range at the 95% level of confidence is given in the following table:

EXPECTED ERROR RANGE FOR A MARKET SAMPLE OF 1,001 RESPONDENTS*

Results About:	10%	20%	30%	40%	50%	60%	70%	80%	90%
Error Range:	±1.9	±2.5	±2.8	±3.0	±3.1	±3.0	±2.8	±2.5	±1.9

* At the 95% confidence level

33. Please tell me if you strongly agree (SA), agree (A), disagree (D), or strongly disagree (SD) with the following statements. How about that (read and rotate A-D)?

		SA	A	D	SD	(DK)	(RF)	
A.	In order to slow the rise in health care costs and increase access to health care for all Americans, it would be acceptable to reduce the amount of health care that is currently available to the elderly	1	2	3	4	5	6	FLD18 28.61(1934) Cn 40
B.	In order to slow the rise in health care costs and increase access to health care for all Americans, it would be acceptable to limit the introduction of new, more expensive high-technology equipment which saves lives but may increase costs	1	2	3	4	5	6	FLD19 28.62(1935) Cn 42
C.	In order to slow the rise in health care costs and increase access to health care for all Americans, the types of services health insurance plans will pay for should be limited	1	2	3	4	5	6	FLD20 28.63(1936) Cn 44
D.	In order to slow the rise in health care costs, the types of services public health programs will pay for low-income individuals should be limited	1	2	3	4	5	6	FLD21 28.64(1937) Cn 46

34. Suppose it has been decided that some limits have to be set on how much health care will be provided. For each of the following statements, please tell me if you strongly agree (SA), agree (A), disagree (D), or strongly disagree (SD). How about **(read and rotate A-F)**?

		SA	A	D	SD	(DK)	(RF)	
A.	Expensive treatments that extend patient's lives, but don't improve the quality of their lives, should be limited	1	2	3	4	5	6	FL022 28.71(1938) Ca 48
B.	Expensive treatments that make sick patients more comfortable, but that won't help them live any longer, should be limited	1	2	3	4	5	6	FL023 28.72(1939) Ca 50
C.	Expensive treatments that are not very likely to be successful should be limited	1	2	3	4	5	6	FL024 28.73(1940) Ca 52
D.	Expensive treatments for patients over 75 years old should be limited	1	2	3	4	5	6	FL025 28.74(1941) Ca 54
E.	Expensive treatments for people who do not have health insurance, so that the treatments will have to be paid for out of tax money, should be limited	1	2	3	4	5	6	FL026 28.75(1942) Ca 56
F.	Treatments that are much more expensive than average should be limited	1	2	3	4	5	6	FL027 28.76(1943) Ca 58
