Title: Gallup/EBRI Poll: Public Attitudes on Taxation of Employee Benefits

Survey Organizations: Gallup Organization

Sponsors: Employee Benefit Research Institute

Field Dates: November 1 - 30, 1992

Sample: National adult

Sample Size: 1000

Interview Modes: Telephone Interview, Landline

Weight Location: None

Usage Notes: Columns locations are found to the right of the question.

Please note that data provided by the Roper Center for Public Opinion Research may not be re-disseminated without written permission. The results of any analyses conducted on the data may, however, be published with appropriate acknowledgments and source citation.

Introduction

Employee Benefit Research Institute (EBRI) of Washington, D.C., commissioned The Gallup Organization, Inc. of Princeton, New Jersey to conduct a national public opinion study on employee attitudes toward health benefits. EBRI was responsible for suggesting subject areas and Gallup was responsible for ensuring that questions were properly asked and were without bias.

During November 1992, 1,000 Americans age 18 or older across the continental United States were contacted by telephone from randomly generated telephone lists. Random lists eliminate bias against newly listed and unlisted telephone numbers. Gallup uses a three-callback methodology in which up to three calls are made to the same telephone number in order to eliminate bias in favor of those individuals easy to reach by telephone.

As part of Gallup's quality-control procedures, ten percent (10%) of all interviews are checked by supervisory personnel to ensure that data is accurate and properly procured. All interviews are conducted in Gallup's communication facility by professionally trained interviewers under exclusive employment of The Gallup Organization.

The final results presented in this report have been statistically weighted by gender, race, education, age and region to be proportional to the population of individuals age 18-65 across the continental United States.

The maximum expected error range at the 95% confidence level for a study of 1,000 respondents is $\pm$3.1%. Stated more simply, if 100 different samples of 1,000

persons each were randomly chosen from the population, 95 times out of 100 the total results obtained would vary no more than ±3.1 percentage points from the results that would be obtained if the entire population were surveyed. The maximum expected statistical error range at the 95% level of confidence is given in the following table:

EXPECTED ERROR RANGE FOR A MARKET SAMPLE OF 1,000 RESPONDENTS*

Results About:	10%	20%	30%	40%	50%	60%	70%	80%	90%
Error Range:	±1.9	±2.5	±2.8	±3.0	±3.1	±3.0	±2.8	±2.5	±1.9

* At the 95% confidence level

FLD 12

(INTERVIEWER READ:) Employers pay on average $3,200 per employee per year for health insurance coverage. Under current law, the value of health insurance that employees receive through their employer is not included as taxable income. Employers receive tax deductions for the health benefits they provide. Some proposals to reform the health care system would change the tax status of health insurance in order to raise revenue to guarantee health insurance for all Americans.

25. In exchange for a guarantee of health insurance coverage, regardless of your or your family's work status, would you be willing to pay income tax on the value of health insurance you receive from your employer?

1	2	3	4
Yes (Continue)	No	(DK) (Skip to #27)	(RF)

---

27. Which of the following three statements do you agree with most? **(Read 1-3)** FLD14

1 None of the value of health insurance benefits should be included in taxable income to the individual

OR

2 The value of a basic core set of health insurance benefits should be excluded from taxable income, but any benefits beyond that basic package should be taxed

OR

3 All of the value of health insurance benefits should be included in taxable income to the individual

4 (None)
5 (DK)
6 (Refused)

Col 34 ___ (1741)

28. Which statement do you agree with most? **(Read 1-3)** FLD15

1 None of the value of health insurance benefits employers provide should be tax deductible to the employer

OR

2 The value of a basic core set of health insurance benefits should be tax deductible to the employer, but any benefits beyond that basic package should be taxed

OR

3 All of the value of health insurance benefits should be tax deductible to the employer

4 (None
5 (DK)
6 (Refused)

Col 36 ___ (1742)

FLD16

(INTERVIEWER READ:) FICA taxes are payroll taxes that are withheld from your paycheck every month to pay for the Social Security and Medicare programs.

29. Which statement do you think is most accurate? **(Read and rotate 1-2)**

1 FICA taxes are used to pay benefits immediately to current retirees

OR

2 FICA taxes are put into an account to pay for your Social Security benefits when you retire

3 (Neither)
4 (DK)
5 (Refused)

Col 38 (1743)

FLD17

30. Which statement do you agree with most? **(Read 1-3)**

1 You expect to pay more into the Social Security program than you will get out when you retire

OR

2 You expect to pay less into the Social Security program than you will get out when you retire

OR

3 You expect to pay about the same amount into the Social Security program as you will get out when you retire
