The Survey Method

This report presents the findings of a personal interview research survey conducted among a nationally representative sample of 1,045 men and women, 18 years of age or over, living in private households in the United States.

Interviewing for this survey was completed June 23-28, 1992, by members of the Gallup Personal Omnibus national interviewing staff. All interviews were conducted in the homes of respondents.

To ensure the representativeness of the sample, data were weighted to take into account demographic variables. Therefore, the results may be projected to the total adult civilian population, 18 years of age or over, living in the United States.

Survey Categories

The appendix tables in this report present detailed findings for the survey results. Details may not add to 100 percent due to rounding.

The following definitions are provided for some of the standard breakdowns by which the data are analyzed. Other breakdowns are self-explanatory.

Occupation refers to the occupation of the respondent. Examples of the types of positions included in each category are listed below. The fourth classification is retired persons.

Professional/Manager/Owner
Executives, Professionals, Technical and Kindred Workers, Managers, Officials, and Proprietors.

White Collar, Sales, Clerical
Clerical, Office and Secretarial Workers, and Sales Agents and Workers.

Blue Collar
Skilled and Semi-Skilled Workers, Laborers, and Service Workers and Craftsmen.

Metro size groupings are determined by the U.S. Bureau of the Census population figures for the metropolitan area. Nonmetro areas are those not in a metropolitan area. Metropolitan areas consist of two parts: (1) "central city areas" with populations of 50,000 or more in a central city or combination of central cities of a metropolitan area; and (2) "fringe areas" with urban concentrations of population outside but closely associated with the central city or cities.

The four *geographic regions* are defined as follows: *Northeast*—Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania; *North-Central*—Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, Kansas; *South*—Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, Texas; *West*—Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, California, Hawaii, Alaska.

Income groups respondents by 1991 total household income before taxes.

Sampling tolerances for the survey are plus or minus 3 percentage points at the 95 percent level of confidence.

Further detail on the survey methods and sampling tolerances are available from ACIR.

Previous Classifications and Results

This volume presents only the 1992 survey results. Detailed data may be found in the Appendix.

Survey results for questions asked in 1991 are in ACIR report S-20; 1990 in report S-19; and 1989 in report S-18.

Survey results for questions asked in the 1982-1988 surveys may be found in report S-17. Revised 1986 figures are underlined in the detailed tables of the 1988 report.

Data on questions asked in the 1972-1981 surveys may be found in Appendix III of the 1983 or 1984 reports (S-12 and S-13). Descriptions of classifications used in these years also may be found in those reports.

Now I would like to ask you about federal preemption. Preemption means that the federal government in Washington takes a power from state or local government in order to use that power itself. For example, the federal government has preempted the power of state and local governments to regulate prescription drugs, airlines, and atomic energy. Therefore, these things are regulated by the federal government. For each of the following, I would like to ask whether you think the federal government should take over the regulation of the activity in order to set uniform rules across the country, or whether you think state or local governments should continue to regulate the activity, each in its own way.

Q 9

Should the federal government regulate the use of pesticides on home lawns and public grounds throughout the country, or should each local government regulate the use of pesticides on home lawns and public grounds in its community?
