31. CBS News is sponsoring a nationally televised broadcast following President Bush's State of the Union Address on Tuesday, January 28th. We are putting together a random sample of one thousand Americans all over the country to react to this news event as it occurs, and will have the results reported on television immediately during this live broadcast. We will be assessing the reactions of Americans like yourself to the President's address as well as some other issues. It will involve having people like you call in to an 800 number -- a free telephone call -- and registering your opinion to a set of questions. First though, we would ask that all participants watch the President's speech which will be aired on CBS as well as the other two networks. Participants will then call in and record their answers. You have been chosen to take part in this important experiment. The experiment will only work if our random sample of Americans -- people like you -- agree to cooperate. Would you be willing to watch the President's State of the Union address at 9 p.m. Eastern time and call in a few minutes afterwards and register your answers to a few questions about the President's speech?
