GEORGIA STATE POLL

The GEORGIA STATE POLL is a quarterly telephone survey of Georgia residents. The POLL is conducted by the Applied Research Center at Georgia State University. For the Winter POLL, 722 residents were randomly selected and interviewed from December 2 to December 15, 1992 on a variety of public policy issues. All adult residents of Georgia with a working telephone (including new and unlisted numbers) are eligible for the POLL. The actual results collected were weighted using the most recent U.S. Census data on the state of Georgia.

The results of the POLL are likely to contain some error. Ninety-five percent of the time, error due to the random selection process will be no more than 3.5 percentage points plus or minus the reported percentage. Error for subgroups is likely to be slightly larger. Other sources of error are caused by individuals refusing to participate in the interview and inability to connect with the selected number. The response rate for the Winter POLL was 51%. Every feasible effort is made to obtain a response and reduce the error, but the reader should be aware that some error is inherent in all research.
