LOS ANGELES TIMES POLL
METHODOLOGY

This 270th Los Angeles Time Poll is one of a series of surveys undertaken to sample the opinions of voters as they participate in key elections. This particular exit poll was conducted during the presidential nominating process in New Hampshire.

The sampling frame for this exit poll is all primary voters in the state. Five thousand nine hundred voters were interviewed between the hours of A.M. and 8 P.M EST, on February 18, 1992, as they left polling places in randomly selected election districts in all parts of the state. The sample included 3,195 interviews with New Hampshire Democratic primary voters and 2,700 Republican primary voters.

The results based on all the responses in a study such as this will have a sampling error of four percentage points in either direction from what would have been obtained by interviewing every primary voter in New Hampshire in the same way. Confidence limits for smaller subgroups will, of course, be larger. In addition, surveys of this kind may be subject to errors not associated with sampling methods but resulting instead from the practical difficulties involved in conducting any survey of public opinion.

The Los Angeles Times Poll is directed by John Brennan, under the general supervision of Assistant Managing Editor Martin Baron. Susan Pinkus is the assistant director, Roger Richardson is the field supervisor, Jill Milburn is the systems analyst and Claudia Vaughn is the data coordinator.

Further information regarding this study is available by writing to the Los Angeles Times Poll, Times Mirror Square, Los Angeles, California 90053, or by calling (213) 237-7976.

This report conforms to the standards of disclosure of the National Council on Public Polls and the American Association for Public Opinion Research.
