Title: Los Angeles Times Poll: Southern California Guns

Survey Organizations: Los Angeles Times

Field Dates: April 9 - 15, 1992

Sample: Adult residents of Los Angeles, Orange, San Diego, Riverside, San Bernardino and Ventura Counties in California

Sample Size: 2619

Interview Modes: Telephone Interview

Weight Location: Columns 1-7 (xxxxx.xx) -- Varname: WTVAR

Usage Notes: Do not use column locations on the questionnaire as they refer to an older version of the ascii data. Use the new column guide on page 4 of the PDF document for the ASCII (.dat) dataset. In the new dataset, punches marked 'X' and 'Y' in the codebook '-' and '&' respectively.

Please note that data provided by the Roper Center for Public Opinion Research may not be re-disseminated without written permission. The results of any analyses conducted on the data may, however, be published with appropriate acknowledgments and source citation.

LOS ANGELES TIMES POLL
METHODOLOGY

This Los Angeles Times poll is the 277th in a series of opinion studies designed to measure public attitudes on a number of critical issues. This particular survey focuses on how Southern Californians feel about guns.

The sampling frame for this survey is all telephone residences in six Southern California counties. Two thousand six hundred nineteen men and women 18 years of age or older were contacted by telephone April 9-15, 1992. The sample includes 878 gun owners and 1,741 non-gun owners. Results are adjusted to conform with census figures on characteristics such as sex, race, age, education, household size and county size. Telephone numbers were generated from a computer list that includes all telephone exchanges in Los Angeles, Orange, San Diego, Riverside, San Bernardino and Ventura counties. Random-digit dialing techniques were used to ensure that both listed and unlisted residences have an opportunity to be contacted. Interviews were conducted in either English or Spanish.

Readers are reminded that, since survey research normally questions only a small proportion of the population, one must allow a certain margin for error. The margin of sampling error for percentages based on the total sample is plus or minus 2 percentage points; for gun owners, it is plus or minus 4 percentage points; for non-gunowners, it is plus or minus 3 percentage points. For certain sub-groups, the margin of error is somewhat higher.

Surveys of this kind are sometimes subject to different kinds of inaccuracies for which precise estimates cannot be calculated and which may, in some cases, be even larger than the effects associated with sampling procedures. For example, findings may be influenced by events which take place while the survey is in the field and, of course, events occurring since the time the interviews were conducted could have changed the opinions reported here. Undetected flaws in the way the sampling and interviewing procedure were carried out could have a significant effect on the findings. Changing the wording of questions and the sequence in which they are asked can produce different results. Sometimes questions are inadvertently biased or misleading. And people who responded to the survey may not necessarily replicate the views of those who refused to be interviewed or who could not be found at home during the time the survey was conducted. Moreover, while every precaution has been taken to make these findings completely accurate, other errors may have resulted from the various practical difficulties associated with taking any survey of public opinion.

Susan Pinkus directs the Los Angeles Times Poll under the general supervision of Dean Baquet, managing editor. Jill Darling Richardson is the associate director, Roger Richardson is the field director, Claudia Vaughn is the data management supervisor and Ray Enslow is the publications coordinator.

Further information regarding this study is available by writing to the Los Angeles Times Poll, 202 West 1st Street, Los Angeles, California 90012, or by calling (213) 237-2027 or by emailing timespoll@latimes.com. In addition, poll data can now be found on the World Wide Web. Visit us at http://www.latimes.com/timespoll
