Title: Los Angeles Times Poll: LA Mayor's Race, Schools, Immigration

Survey Organizations: Los Angeles Times

Field Dates: January 28 - February 2, 1993

Sample: Adult residents of Los Angeles, California

Sample Size: 1618

Interview Modes: Telephone Interview

Weight Location: Card 3; Columns (53-57 (xx.xxx)

Usage Notes: Some questions, which use only 1 column for data, allow legitimate punches for 10 & 11.
10 will correspond to 'X' in the data file and 11 will correspond to 'Y' in the data file.

Please note that data provided by the Roper Center for Public Opinion Research may not be re-disseminated without written permission. The results of any analyses conducted on the data may, however, be published with appropriate acknowledgments and source citation.

LOS ANGELES TIMES POLL METHODOLOGY

This Los Angeles Times poll is the 300th in a series of opinion studies designed to measure public attitudes on a number of critical issues. This particular survey focuses on the city of Los Angeles six months after the civil unrest that ensued when the verdicts in the King beating case were announced.

The sampling frame for this survey is all telephone residences in the city of Los Angeles. One thousand six hundred eighteen men and women 18 years of age or loder were contacted by telephone January 28-February 2, 1993. The sample includes 1,149 registered voters. Results are adjusted to conform with census figures on characteristics such as sex, age, race, education and household size. Telephone numbers were generated from a computer list that includes all telephone exchanges in the city. Interviewing was conducted in either English or Spanish. Random-digit dialing techniques were used to ensure that both listed and unlisted residences have an opportunity to be contacted.

Readers are reminded that, since survey research normally questions only a small proportion of the population, one must allow a certain margin for error. The margin of error for the total sample is plus or minus three percentage points. The error margin for certain other subgroups maybe somewhat higher.

Surveys of this kind are sometimes subject to different kinds of inaccuracies for which precise estimates cannot be calculated and which may, in some cases, be even larger than the effects associated with sampling procedures. For example, findings may be influenced by events which take place while the survey is in the field and, of course, events occurring since the time the interviews were conducted could have changed the opinions reported here. Undetected flaws in the way the sampling and interviewing procedure were carried out could have a significant effect on the findings. Changing the wording of questions and the sequence in which they are asked can produce different results. Sometimes questions are inadvertently biased or misleading. And people who responded to the survey may not necessarily replicate the views of those who refused to be interviewed or who could not be found at home during the time the survey was conducted. Moreover, while every precaution has been taken to make these findings completely accurate, other errors may have resulted from the various practical difficulties associated with taking any survey of public opinion.

The Los Angeles Times Poll is directed by John Brennan, under the general supervision of Assistant Managing Editor Martin Baron. Susan Pinkus is the assistant director, Roger Richardson is the field supervisor, Jill Milburn is the systems analyst, Claudia Vaughn is the data coordinator and Jenny Lewis and Rob Cioe are the researchers.

Further information regarding this study is available by writing to the Los Angeles Times Poll, Times Mirror Square, Los Angeles, California 90053, or by calling (213) 237-7976.

This report conforms to the standards of disclosure of the National Council on Public Polls and the American Association for Public Opinion Research.

QUESTION TITLE : Subsidize Candidates | LOCATION : CARD 1, COL(S) 59
ABBV (MNEMONIC) : MATCHFUN | DATA TYPE : 1: Small Integer
QUESTION NUMBER : Q32 | SURVEY / INDEX NUMBER : 0306/52

32. As you may know, voters approved a measure that allows the candidates running for mayor of Los Angeles to receive up to six hundred thousand dollars each in matching funds from the city treasury to help finance their campaigns. Supporters of the idea say it helps new people get into politics and holds down the influence of special interests. Opponents say the city cannot afford to subsidize politicians at a time when basic city services are inadequate. Generally speaking, do you think public financing of the mayor's race is a good idea or a bad idea? (IF GOOD OR BAD) Do you feel strongly or not strongly about that?

	RESPONSES	PERCENT
1) GOOD/STR	191	12%
2) GOOD/NS	170	10%
3) BAD/NS	161	10%
