Country: United States

Title: Americans Talk Issues Survey: Energy and Taxes

Survey Organizations: The Telephone Center

Sponsors: Americans Talk Issues Foundation

Field Dates: December 2 - 15, 1991

Sample: National adult

Sample Size: 2010

Sample Notes: There are 2 forms for this study located in Card 1, Column 4. Form A=1; Form B=2.

Interview Modes: Telephone Interview, Landline

Weight Location: None

Usage Notes: Columns locations are found to the right of the question in this format (R/CC), where R = Record or Card number and CC = Column(s).

Please note that data provided by the Roper Center for Public Opinion Research may not be re-disseminated without written permission. The results of any analyses conducted on the data may, however, be published with appropriate acknowledgments and source citation.

Column Guide for ATI #20

Respondent ID	Cols.	1-4	
Form	Col.	5	
Region	Col.	7	1-New England 2-Middle Atlantic 3-East North Central 4-West North Central 5-South Atlantic 6-East South Central 7-West South Central 8-Mountain 9-Pacific
Are you 18/over?	Col.	9	1-Yes 2-No
Card number	Col.	80	

1. We'll start with a question on energy. How concerned are you that we are NOT using our energy resources -- like oil, coal, gas nuclear energy, and electricity -- efficiently? Very concerned, somewhat concerned or not at all concerned?

	TOTAL US %
1- Very Concerned	44
2- Somewhat concerned	48
3- Not at all concerned	7
4- DON'T KNOW	1

1/25

---

2. Some people say that energy and environmental problems don't only concern the United States, they are global problems, and as an industrial leader, we should do all we can to ensure a healthy planet, even if that means helping developing countries by funding to increase environmental responsibility.

Other people say that if a country is advanced enough to be producing industrial pollution, then they are advanced enough to raise their own money to clean up themselves. Which is closer to your view?

	TOTAL US %
2- They clean up themselves	62
1- Help other countries	29
3- Depends (VOLUNTEERED)	6
4- DON'T KNOW	3

1/26

---

3. Would you strongly favor, favor, oppose, or strongly oppose giving foreign aid to countries for environmental purposes like cleaning up the environment and limiting the pollutants and toxins in their industries?

	TOTAL US %
Favor	45
1- Strongly	12
2- Favor	33
Oppose	49
3- Oppose	27
4- Strongly	23
5- DON'T KNOW	6

1/27

4. Would you strongly favor, favor, oppose or strongly oppose shifting some of the money currently spent on foreign military aid to instead go toward foreign environmental aid?

	TOTAL US %
Favor	59
1- strongly	25
2- Favor	34
Oppose	35
3- Oppose	21
4- strongly	13
5- DON'T KNOW	6

1/28

---

5. Now we'll talk a little about automobile fuel economy -- that is improving the miles per gallon of gasoline that cars, vans and trucks get. Do you think that by using some methods -- maybe, by regulation; maybe by setting standards; maybe by adjusting taxes -- the government should help the country get better fuel economy in automobiles. OR do you think the government is already doing enough about automobile fuel economy, OR do you think that the government should do less?

	TOTAL US %
1- Should do more	63
2- Should do the same	20
3- Should do less	12
4- DON'T KNOW	4

1/29

NOTE: QUESTION 6A THROUGH 14A WERE ASKED OF HALF THE SAMPLE, THE OTHER HALF WERE ASKED QUESTIONS 6B THROUGH 14B. QUESTIONS 6 THROUGH 10 ARE ASKED "FOR" AND QUESTIONS 11 THROUGH 14 ARE ASKED "AGAINST."

I am going to read you some reasons or arguments for and against doing something about automobile fuel economy and I want you to tell me if you were aware of these arguments and how convincing they are to you. (ROTATE FOR AND AGAINST QUESTION SETS EACH SPLIT SAMPLE)

BEFORE EACH QUESTION: FOR FIRST TWO IN EACH SET, **"First/next, an argument for/against the government doing something about auto fuel economy. . . "** FOR THIRD AND FOLLOWING, **"Next an argument for/against . . ."**

AFTER EACH QUESTION, ASK: **"Were you very aware, slightly aware or unaware of this argument? Do you find it convincing or unconvincing? Is that very or somewhat convincing/unconvincing?** IF RESPONDENT REQUIRES RE-READING OF THESE QUESTIONS, READ: **"Were you very aware, slightly aware, or unaware of this argument for/against the government doing something about auto fuel economy? Do you find this a convincing or unconvincing argument for/against the government doing something about auto fuel economy?"**

		YES, AWARE			NOT		
		Total	Very	Slightly	Aware	DK	
		%	%	%	%	%	
			(1)	(2)	(3)	(4)	
6A	FOR Americans make up only five percent of the world's population but use 26% of the world's oil. The US uses twice as much energy per unit of production as Japan making our economy less competitive. We have to cut down our use of oil	77	44	33	23	0	1/30
9B	FOR About half the US trade deficit is due to oil imports. Almost half of the oil we use is in our autos, including vans and light trucks. Autos are the root cause of US oil dependence. We have to improve automobile miles per gallon	72	41	30	28	-	1/46
9A	FOR Requiring improved fuel economy ONLY for cars powered by gasoline, and NOT for cars powered by some other fuels, would put pressure on the auto companies to develop cars that are powered by fuels like hydrogen and alcohol, or by natural gas or electricity, that get AWAY FROM the problems of air pollution and dependence on foreign oil that go with gasoline engines	72	34	39	28	-	1/36
10A	FOR Fuel efficient cars tend to be smaller, but they need not be unsafe. As fuel economy doubled over the past decade, cars became safer because of better design. Auto fatalities actually fell by 40%	68	28	39	31	2	1/38

	(RESPONSES TO Q 6A-14B CONTINUED)	Total %	YES, AWARE: Very % (1)	YES, AWARE: Slightly % (2)	NOT Aware % (3)	DK % (4)
1/58	11B \ AGAINST We need to compete with the Japanese who are better at producing small, economy cars than the American auto companies. Mandatory standards would play into the hands of the Japanese auto companies	67	37	31	32	1
1/44	8B \ FOR Manufacturers say that they can not build affordable cars to meet higher standards, but others point out that their real reluctance to accept higher standards is that the profit on large luxury cars is many times that of a good economy car. Many manufacturers have demonstrated prototype cars that can get over 67 miles per gallon, without decreasing safety, comfort, or performance but the companies won't risk putting them on the market until standards or market demand require them	60	32	29	40	0
1/50	11A \ AGAINST Improved auto efficiency is not needed and if we tried to get it, the effort would jeopardize jobs in the auto industry	59	23	36	41	0
1/64	14B \ AGAINST The increased cost of a car meeting higher standards forces the consumer to pay more up front for a new car. Fuel savings will not make up that out-of-pocket difference for at least a year or two after the new car purchase	56	24	32	43	1
1/40	6B \ FOR If we increased automobile efficiency by just 10%, we would save the amount of oil we imported before the Gulf war from Iraq AND Kuwait. A 40% increase in fuel economy would eliminate the need for Middle East imports	56	24	32	43	1
1/32	7A \ FOR The increased cost of a car meeting higher standards would be paid for several times over by the gasoline savings over the life of the car	55	23	32	43	2
1/48	10B \ FOR Fuel efficient cars tend to be smaller, but they need not be unsafe. Many small cars on the road today are safer than many big cars. For example, the Ford Escort, a small car averages 34 mpg and is rated "superb" in Federal crash tests	54	29	24	46	0
1/42	7B \ FOR If we don't have improved fuel economy we will ultimately wind up with added taxes to cut gasoline consumption	54	22	31	46	0

(RESPONSES TO Q 6A-14B CONTINUED)

		Total %	YES, AWARE: Very % (1)	YES, AWARE: Slightly % (2)	NOT Aware % (3)	DK % (4)	
13B	AGAINST Any development of cars getting more miles per gallon without using modern crash-worthiness technologies, could end up with greater numbers of downsized, less-safe cars	53	22	30	47	1	1/62
8A	FOR Standards introduced in 1975 cut gas consumption per mile nearly in half, but mandatory annual improvements were eliminated after 1984. Some improvement occurs because some older gas guzzlers are taken off the road each year, but some manufacturers' new vehicle fuel economies are now decreasing. Buick's 1991 Roadmaster for example gets 16 city miles per gallon	52	25	27	47	1	1/34
12B	AGAINST Consumers should set the direction of the types of cars the auto companies make, not the federal government	52	24	28	48	1	1/60
13A	AGAINST Any attempt to force higher miles per gallon requirements on automobiles would force families into using unsafe or more expensive cars or cars too small for their families	51	25	27	48	1	1/54
14A	AGAINST Manufacturers would have to put all their development effort into meeting higher fuel efficiency standards and would have to neglect the development of vehicles to run on alternative fuels which might be more promising	51	16	35	48	1	1/56
12A	AGAINST Other fuel efficiency measures now in the works will reduce gas consumption by 13% without the harmful effects of increasing taxes, increasing fees or imposing mandatory standards	43	12	31	56	1	1/52

Do you find it convincing or unconvincing? Is that very or somewhat convincing/unconvincing?

15. **OK. Now I want to ask you about the subject of OIL. First, do you strongly favor, somewhat favor, somewhat oppose or strongly oppose beginning some gradual increase in taxes on oil?** (NOTE: NO Q. 16)

	TOTAL US %	
Favor	18	
1- Strongly	5	1/66
2- Somewhat	12	
Oppose	78	
3- Somewhat	22	
4- Strongly	56	
5- DON'T KNOW	4	

NOTE: QUESTION 17A THROUGH 23A WERE ASKED OF HALF THE SAMPLE, THE OTHER HALF WERE ASKED QUESTIONS 17B THROUGH 23B. QUESTIONS 17 THROUGH 20 ARE ASKED "FOR" AND QUESTIONS 21 THROUGH 23 ARE ASKED "AGAINST.")

I am going to read you arguments for and against increasing taxes on oil and I want to know how convincing you think these arguments are.

ROTATE FOR AND AGAINST QUESTION SETS IN EACH SPLIT SAMPLE.

BEFORE EACH QUESTION: FOR FIRST TOW IN EACH SET, "First/next, an argument for/against an oil tax . . ." FOR THIRD AND FOLLOWING, "Next . . . "

AFTER EACH QUESTION, ASK: "Is this a convincing or unconvincing argument to begin to raise taxes on oil? Is that very or somewhat convincing/ unconvincing?"

			CONVINCING			UNCONVINCING			
		TOTAL %	VERY % (1)	SOME WHAT % (2)	TOTAL %	SOME WHAT % (3)	VERY % (4)	DK % (5)
2/19	21B	AGAINST A tax on oil is unfair. Many hardworking people who need to heat their homes or to use a lot of gasoline in their work, such as truckers and farmers, or need to transport friends and family a lot, would be hurt the most. Some of them just could not afford any increase and would suffer real hardships	82	61	21	18	9	9	0
2/16	21A	AGAINST A tax on oil is unfair. Many hardworking people who need to heat their homes or to use a lot of gasoline in their work and for transportation of friends and family would be hurt the most. Some of them just could not afford any increase and would suffer real hardships	80	57	23	19	9	10	1
2/18	23A	AGAINST The burden of a tax on heating oil would fall heaviest on poor people. And as for gasoline, there is already a 15 cent a gallon Federal tax and many states add another tax of 20 cents a gallon more. That's enough taxes	79	61	18	18	9	10	2
2/10	19A	FOR Burning less oil and gasoline would reduce air pollution and improve our health and the environment. It would help keep the planet habitable by helping to prevent urban smog and global warming	71	46	24	27	12	15	2
2/17	22A	AGAINST An increased tax on oil -- like any new tax -- would just encourage the government to spend money in some wasteful way	69	50	19	29	11	18	2

(RESPONSES TO Q 17A-23B CONTINUED)		CONVINCING TOTAL	CONVINCING VERY % (1)	CONVINCING SOME WHAT % (2)	UNCONVINCING TOTAL %	UNCONVINCING SOME WHAT % (3)	UNCONVINCING VERY % (4)	DK % (5)	
23B	AGAINST The shock of a new tax on oil could drive us further into a recession	69	49	20	28	12	17	3	2/21
20B	FOR A tax on oil would encourage the consumption of less oil and gasoline and the use of alternative transportation, mass-transit, and carpooling. The higher cost of gasoline at the pump would also put pressure on automobile manufacturers to improve fuel efficiency in new cars	62	34	28	37	12	24	2	2/15
18A	FOR A tax on oil would encourage the development of gasoline alternatives like hydrogen, natural gas, or alcohol fuels, or electric cars that would further stretch our oil supplies and could be much less polluting	54	31	23	43	16	27	3	2/9
17B	FOR Since 1972 we have had three crises threatening our supply of imported oil, including the recent Gulf crisis. The next one could have a much more serious affect on oil supplies. Imported oil is now almost half of our oil supply and growing. A tax on imported oil would help reduce our use of foreign oil -- and encourage domestic development by raising prices	54	27	26	44	17	27	3	2/12
18B	FOR A tax on oil would encourage the development of alternative energy sources, like coal, gas, nuclear, solar, hydro, and wind	54	25	28	42	17	25	4	2/13
19B	FOR A tax on oil would mean that less oil and gasoline would be burned and that would reduce air pollution and improve our health and the environment. It would help keep the planet habitable by helping to prevent urban smog and global warming	53	33	20	45	17	28	2	2/14
20A	FOR Increased taxes would help to conserve the finite world supply of oil and give us more time to learn how to do with a lot less oil before the supply drops to a trickle and the price becomes unaffordable	51	28	23	47	16	31	2	2/11

(RESPONSES TO Q. 17A-23B CONTINUED)

		CONVINCING			UNCONVINCING			
		TOTAL	VERY	SOME WHAT	TOTAL	SOME WHAT	VERY	DK
		%	% (1)	% (2)	%	% (3)	% (4)	% (5)
2/20	22B AGAINST This is another example of liberal social engineering which usually doesn't work and is not worth the money	45	22	22	48	20	28	8
2/8	17A FOR Almost half of our oil supply goes into automobiles. Each ONE cent PER gallon increase in the Federal gasoline tax brings a BILLION dollars a year to the US treasury, a big help in reducing the deficit or in making it possible to cut other taxes, or however we what to use the funds	37	19	18	61	19	42	2

---

24 **Now that we have talked about it a little, I am going to ask you again. Do you favor or oppose beginning some gradual increase in taxes on oil? Is that strongly or somewhat favor/oppose?**

	TOTAL US %
Favor	25
1- Strongly	7
2- Somewhat	17
Oppose	74
3- Somewhat	20
4- Strongly	53
5- DON'T KNOW	2

2/22

NOTE: QUESTION 25A WAS ASKED OF HALF THE SAMPLE, THE OTHER HALF WAS ASKED QUESTION 25B

25A/B The US is importing a growing percentage of its oil. (IN SAMPLE A EXCLUDE WORDS INSIDE THE PARENTHESES:) (Some experts believe that a tax on imported oil would be better than a tax on oil produced in the US, because it would give an advantage to domestic producers and encourage the development of domestic sources which in turn might make it less likely that we will have to go to war in the Middle East for oil. Others think that we should not tax but rather encourage using imported oil as long as it is cheap, in order to conserve our own domestic supplies of oil as much as possible for as long as possible.) How great a threat do you think our growing use of foreign oil is to our national security?

	TOTAL US
SAMPLE A:	%
1- Extremely	22
2- Very 24	
3- Somewhat	33
4- Not very	9
5- Not at all	8
6- DON'T KNOW	3

2/23

SAMPLE B:	
1- Extremely	21
2- Very 27	
3- Somewhat	32
4- Not very	10
5- Not at all	6
6- DON'T KNOW	4

2/23

26 Some experts think a tax on things like coal, oil, and natural gas, called a "carbon" tax because these fuels are based on carbon, would be better than a tax on just oil or just gasoline, because it would fall more evenly on energy suppliers and users AND would encourage substitutes for carbon-based fuels that would result in the reduction of airborne carbon dioxide and the threat of global warming. Do you favor or oppose such a carbon tax or haven't you heard enough about a carbon tax to say? (DO NOT ASK SOMEWHAT OR STRONGLY)

	TOTAL US %
1- Favor	18
2- Oppose	18
3- Haven't heard enough	63
4- DON'T KNOW	2

2/24

---

27 Supporters say a carbon tax would tend to curb the use of all non-renewable and polluting energy supplies in a fair manner and help conserve them into the next century. Now I am going to mention four alternative proposals for a tax increase and, regardless of whether you favor any of them or not, I want you to imagine that the government was going to adopt one of them and that whichever one was adopted, the tax rate would be set so that it would cost you the same amount of money. Do you understand that? IF ANSWER IS YES, CONTINUE; IF NOT, REREAD QUESTION (ANSWER HERE NEED NOT BE RECORDED) So with that in mind please tell me which would you prefer: (CHOICES ROTATED) an across the board carbon tax, principally on coal, oil, gasoline, and natural gas, OR a tax on oil only, OR just a tax on imported oil only, OR a tax on gasoline only?

	TOTAL US %
3- Just a tax on imported oil only	42
1- An across the board carbon tax	31
2- A tax on oil only	9
4- A tax on gasoline only	9
5- DON'T KNOW	9

2/25

Now let's get away from taxes.

NOTE:QUESTION 28A WAS ASKED OF HALF THE SAMPLE, THE OTHER HALF WAS ASKED QUESTION 28B

28A Currently, the federal government requires automobile companies to sell vehicles that, in total, average 28 miles per gallon. Some people think it is important to achieve goals of increased efficiency and conservation of oil without new taxes. One proposal is for the federal government to require the automobile companies to increase the fuel economy of new cars from 28 miles per gallon to 40 miles per gallon by 2001. Do you favor or oppose this proposal? Would that be strongly or just somewhat favor/oppose?

	TOTAL US %
Favor	75
1- Strongly	49
2- Somewhat	26
Oppose	23
3- Somewhat	10
4- Strongly	13
5-DON'T KNOW	3

2/26

28B Currently, the federal government requires automobile companies to sell vehicles that, in total, average 28 miles per gallon. Some people think it is important to achieve goals of increased efficiency and conservation of oil without new taxes. One proposal is for the federal government to require the automobile companies to increase the fuel economy of new cars from 28 miles per gallon to 33 miles per gallon by 1996. Do you favor or oppose this proposal? Would that be strongly or just somewhat favor/oppose?

	TOTAL US %
Favor	83
1- Strongly	57
2- Somewhat	26
Oppose	15
3- Somewhat	8
4-Strongly	7
6-DON'T KNOW	2

2/26

29 Some people propose another way to make cars more fuel efficient. It goes like this: The Federal government would give rebates to buyers of new fuel EFFICIENT cars and charge fees to buyers of new fuel-INEFFICIENT cars. Both rebates and fees would be on a sliding scale set up so that the average car buyer would not pay a tax and the program would pay for itself.

Now supporters of this proposal say it would work better than miles per gallon standards by giving manufacturers incentives to do better than the standards. Also they recommend that the rebate could increase depending on how much greater fuel economy your new car has than your old one. This would get old gas-guzzlers off the road sooner.

Now suppose that you were going out to buy a new car. Which method do you think would make you more likely to want to buy a car that has better fuel-economy: this system of fees and rebates OR increased gasoline taxes?

	TOTAL US %
1- This system of fees and rebates	74
2- Increased gasoline taxes	18
3-DON'T KNOW	9

2/28

---

30 Now that we have talked about automobile fuel economy -- that is improving the miles per gallon of gasoline that cars, vans and trucks get, I'd like to ask you an earlier question again. Do you think that using the best of the various methods like regulation, setting standards, adding taxes or giving tax rebates, the government should help the country get better fuel economy in automobiles, OR do you think he government is already doing enough about automobile fuel economy OR do you think that the government should do less? (IF "MORE", SKIP TO Q.32)

	TOTAL US %
1- Should do more	68
2- Should do the same	20
3. Should do less	10
4- DON'T KNOW	3

2/29

31 Even though you do not think the government should do more, I'd like to ask you of the three methods to get more fuel economy we have talked about, which would you have the least objection to? Fees and rebates, increased gasoline taxes or higher fuel economy standards?

BASE: SAID SAME/LESS/DON'T KNOW IN Q.30

	TOTAL US %	2/30
3- Higher fuel economy standards	41	
1- Fees and rebates	39	
2- Increased gasoline taxes	13	
4- DON'T KNOW	7	

32 Of the three methods to get more fuel economy we have talked about, which do you think is overall the best for the country: Fees and rebates OR increased gasoline taxes OR higher fuel economy standards?

	TOTAL US %	2/31
3- Higher fuel economy standards	52	
1- Fees and rebates	35	
2- Increased gasoline taxes	7	
4- DON'T KNOW	5	

DEMOGRAPHICS

Now, I would like to ask you a few questions for statistical purposes.

A **Party ID** Generally speaking, do you think of yourself as a Republican, Democrat, an Independent, or what?

	TOTAL US %	
1- Democrat	31	2/65
2- Republican	24	
3- Independent	35	
4- No preference	7	
5- Other	1	
6- REFUSED	2

Graduate School +	7

2/62-63

H: **Income** Which of the following income groups includes your TOTAL FAMILY INCOME in 1990 before taxes? (Just stop me when I read the correct category)

	Income	%
1-	up to $10,000	14
2-	$10,000-14,999	9
3-	$15,000-19,999	8
4-	$20,000-24,999	8
5-	$25,000-29,999	7
6-	$30,000-39,999	14
7-	$40,000-49,999	10
8-	$50,000-74,999	14
9-	$75,000+	9

2/66

(IF REFUSED):
2/61 Would you please tell me if your family income was under $40,000 or over $40,000?
1 = Under $40,000
2 = over $40,000
3 = DK/Refused

J **Race** Is your racial or ethnic heritage white, black, hispanic, or what?

Race	%
White	77
Black	11
Hispanic	4
Other	7

2/70

1: White
2: Black
3: Hispanic
4: Oriental
5: American Indian
6: Other
7: Refused

K **Sex** BY OBSERVATION:

1-	Male	48
2-	Female	52

2/73
