12. As you probably know, the United States and most of our allies have been imposing political as well as economic sanctions on South Africa for a number of years. The goal has been to pressure the white minority government of South Africa into ending its system of Apartheid and the segregation of black citizens. I am going to read you a list of some situations that have happened already in South Africa or might happen in the near future. For each one, please tell me what you think the United States government should do if it did happen. First *(read item)*. If that's what happens, what would be the appropriate action for the United States to take--to end all sanctions against South Africa, reduce the sanctions somewhat, or keep all of the sanctions in place?

13X At some point, the United States and other countries will probably decide sanctions against South Africa should be lifted and American companies will be allowed to increase their operations in that country. We're interested in knowing how you think American companies should behave *after* the official sanctions against the government have been lifted. Here is a list of five statements. (HAND RESPONDENT CARD) Would you please look over this list and tell me which *one* approach you would like American companies to take with respect to South Africa after the sanctions have been lifted.

a. American companies should not operate in South Africa even after sanctions have been lifted, because white supremacy will still be deeply rooted in South African society 1

13/

b. American companies operating in South Africa should agree on a strict code of conduct requiring them to set aside plenty of good jobs for qualified black South Africans and to invest heavily in black communities to improve living conditions 2

c. American companies operating in South Africa should make a real effort to help black South Africans, but they should not do any more about social justice than they do in this country 3

d. American companies in South Africa should focus on being profitable and successful, without taking sides with either the blacks or whites, since this will improve living conditions for everybody 4

e. American companies operating in South Africa should avoid making matters any worse for the blacks who live there, but at the same time they should realize that the white government offers the best chance for stable business conditions 5
