# SURVEY METHODOLOGY

The survey results are based on telephone interviews conducted among a nationally representative sample of 1,227 adults, 18 years of age or older, during the period of February 20-23, 1992. For results based on the total sample, one can say with 95% confidence that the error attributable to sampling and other random effects is plus or minus 3 percentage points.

In addition to sampling error, one should bear in mind that question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.

### *THE TIMES MIRROR TYPOLOGY*

In 1987 Times Mirror developed a unique voter classification scheme that divided the electorate on the basis of political values, party identification and measures of political participation. Since its inception Times Mirror has conducted numerous nationwide surveys using this political typology, the most recent of which was reported in ***THE PEOPLE, THE PRESS & POLITICS - 1990***. The typology was developed for administration by personal interview in that it requires about 15 minutes of interviewing time to ask the full battery of questions.

Over the past year the ***Times Mirror Center for the People and the Press*** has developed a modified form of the Times Mirror Typology that is suitable for telephone interviewing in that it requires many fewer questions. It also divides the public into fewer groups (9 vs. 11) and therefore can be used with more limited sample size surveys. It is our intention to utilize the modified typology scheme on each of our pre-election surveys in 1992. While this form of the typology does not offer the full analytical richness of the original scheme, we think it continues to be an important and highly useful way of looking at the electorate.

The modified typology is based on the important concepts about the homogeneity of various voting groups that we uncovered in our earlier research.

There are two core Republican groups:

***Enterprisers***: Enterprisers are fiscal conservatives who hold positive attitudes toward business and are anti-welfarist. They are affluent, well-educated and well-informed. Enterprisers are much less likely than other Americans to agree with the popular notion that the rich get richer and the poor get poorer (43% vs. 81%). Their pro-business stance leads them to differ with most Americans on the idea that too much power is concentrated in the hands of big companies. While 82% of other Americans feel that this is true, only 48% of Enterprisers agree. Enterprisers are also less likely to completely agree that society should make sure that everyone has an equal opportunity (55% vs. 41%).

***Moralists***: Moralists are highly religious, socially conservative and show low levels of concern for personal freedoms. They are less affluent, older, and many live in the South. A vast majority of Moralists agree that books with dangerous ideas should be banned from public schools, which sets them firmly to the right of the rest of the public on the issue of censorship (89% vs. 39%).
