Title: Times Mirror Poll # 1992-PS0392: Political Survey IV

Survey Organizations: Princeton Survey Research Associates

Sponsors: Times Mirror Center for the People & the Press

Field Dates: March 26 - 29, 1992

Sample: National adult

Sample Size: 1668

Sample Notes: There are 3 forms for this study located in column 168. Form 1=1; Form 2=2, Form 3=3.

Interview Modes: Telephone Interview

Weight Location: Columns 271-273 (x.xx)

Please note that data provided by the Roper Center for Public Opinion Research may not be re-disseminated without written permission. The results of any analyses conducted on the data may, however, be published with appropriate acknowledgments and source citation.

SURVEY METHODOLOGY

The survey results are based on telephone interviews conducted among a nationally representative sample of 1,668 adults, 18 years of age or older, during the period of March 26-29, 1992. For results based on the total sample, one can say with 95% confidence that the error attributable to sampling and other random effects is plus or minus 3 percentage points. For results based on ***only*** Form 1 (N=557) ***or*** Form 2 (N=557) ***or*** Form 3 (N=554), the error attributable to sampling is plus or minus 5 percentage points. For results based on Form 1 ***and*** Form 2 (N=1,114) ***or*** Form 1 ***and*** Form 3 (N=1,111) ***or*** Form 2 ***and*** Form 3 (N=1,111), the error attributable to sampling is plus or minus 3 percentage points.

In addition to sampling error, one should bear in mind that question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.

THE TIMES MIRROR TYPOLOGY

In 1987 Times Mirror developed a unique voter classification scheme that divided the electorate on the basis of political values, party identification and measures of political participation. Since its inception Times Mirror has conducted numerous nationwide surveys using this political typology, the most recent of which was reported in ***THE PEOPLE, THE PRESS & POLITICS - 1990***. The typology was developed for administration by personal interview in that it requires about 15 minutes of interviewing time to ask the full battery of questions.

Over the past year the ***Times Mirror Center for the People and the Press*** has developed a modified form of the Times Mirror Typology that is suitable for telephone interviewing in that it requires many fewer questions. It also divides the public into fewer groups (9 vs. 11) and therefore can be used with more limited sample size surveys. It is our intention to utilize the modified typology scheme on each of our pre-election surveys in 1992. While this form of the typology does not offer the full analytical richness of the original scheme, we think it continues to be an important and highly useful way of looking at the electorate.

The modified typology is based on the important concepts about the homogeneity of various voting groups that we uncovered in our earlier research.

There are two core Republican groups:

Enterprisers: Enterprisers are fiscal conservatives who hold positive attitudes toward business and are anti-welfarist. They are affluent, well-educated and well-informed. Enterprisers are much less likely than other Americans to agree with the popular notion that the rich get richer and the poor get poorer (43% vs. 81%). Their pro-business stance leads them to differ with most Americans on the idea that too much power is concentrated in the hands of big companies. While 82% of other Americans feel that this is true, only 48% of Enterprisers agree. Enterprisers are also less likely to completely agree that society should make sure that everyone has an equal opportunity (55% vs. 41%).

Moralists: Moralists are highly religious, socially conservative and show low levels of concern for personal freedoms. They are less affluent, older, and many live in the South. A vast majority of Moralists agree that books with dangerous ideas should be banned from public schools, which sets them firmly to the right of the rest of the public on the issue of censorship (89% vs. 39%).

There are three core Democratic groups:

Sixties Democrats: Sixties Democrats are strong believers in peace and social justice. More than any other segment of the population, they disagree with the idea that the best way to preserve peace is through military strength (88% vs. 44%). And two-thirds (65%) of Sixties Democrats completely agree that society should guarantee everyone an equal opportunity. This is a heavily female, middle class, middle-aged group that supports most of the policy positions of the national Democratic party.

New Dealers: New Dealers are older Democrats who experience little financial pressure and are more socially conservative than the national Democratic Party.* Drawn heavily from the South, many of these old-time Democrats have party roots that go back to Roosevelt. Despite the end of the Cold War, New Dealers still universally agree that the best way to insure peace is through military strength (96%[2]).

Pocketbook Democrats: Pocketbook Dems overwhelmingly agree that they don't have enough money to make ends meet (98%). They are very concerned with social justice, and they believe that government should take an active role in the solution of the socio-economic problems that plague them. One-third of Pocketbook Dems are minorities (32%), and many have less than a high school education.

There are three typology groups that are basically Independent:

Seculars: Seculars lean to the Democratic party, but some identify more closely with the GOP on certain issues. They are strongly supportive of personal freedoms. Seculars are well-informed, relatively affluent, and more often found on the East and West coasts. Their defining characteristic is an almost total lack of religious conviction. While 87% of the rest of the public says that prayer is an important part of their daily life, only one in ten (12%) Seculars hold this view. Their support for personal freedoms is best reflected in their feelings about censorship: 97% disagree with banning books containing dangerous ideas from public school libraries, compared with 48% of other Americans.

Two of the Independent groups lean to the Republican party:

Disaffecteds: Disaffecteds are personally alienated, financially pressured and deeply skeptical of politicians. This middle-aged, lower-middle income group contains many blue collar workers. Disaffecteds are nearly twice as likely as others to agree that hard work offers little

guarantee of success (69% vs. 36%). Their political distrust is such that three-quarters (77%) disagree that elected officials care what people like them think.

Upbeats: Upbeats are also independents who lean to the GOP, but their attitudinal profile is almost the opposite of Disaffecteds. Upbeats are primarily young people who tend to be uncritical of government and other institutions. They also have American Exceptionalist values: 88% of Upbeats agree that Americans can always solve their problems, while only 55% of others agree.

Finally, there is one typology group that is by definition apolitical:

Bystanders: Bystanders have an almost total lack of interest in politics and public affairs. This urban, lower socio-economic group contains many young singles. Forty-six percent of Bystanders say they seldom vote.

The table below shows the percentage of the survey respondents in each typology group for this survey.
