Title: Times Mirror Poll # 1992-PS1092B: Post Presidential Debate--Callback

Survey Organizations: Princeton Survey Research Associates

Sponsors: Times Mirror Center for the People & the Press

Field Dates: October 20 - 22, 1992

Sample: Registered voter callback

Sample Size: 1153

Sample Notes: Respondents were originally interviewed October 8-11, 1992. There are 2 forms for this study located in column 239. Form 1=1; Form 2=2.

Interview Modes: Telephone Interview

Weight Location: Columns 252-254 (x.xx)

Please note that data provided by the Roper Center for Public Opinion Research may not be re-disseminated without written permission. The results of any analyses conducted on the data may, however, be published with appropriate acknowledgments and source citation.

Survey Methodology

The survey results are based on telephone re-interviews conducted October 20-22, 1992 of 1,153 registered voters from a nationwide survey of adults 18 years and older originally conducted October 8-11, 1992 (N=1815).

For results based on the total sample of registered voters, one can say with 95% confidence that the error attributable to sampling and other random effects is plus or minus 3 percentage points. In addition to sampling error, one should bear in mind that question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.

THE TIMES MIRROR TYPOLOGY

In 1987 Times Mirror developed a unique voter classification scheme that divided the electorate on the basis of political values, party identification and measures of political participation. Since its inception Times Mirror has conducted numerous nationwide surveys using this political typology, the most recent of which was reported in ***THE PEOPLE, THE PRESS & POLITICS - 1990***. The typology was developed for administration by personal interview in that it requires about 15 minutes of interviewing time to ask the full battery of questions.

Over the past year the ***Times Mirror Center for the People and the Press*** has developed a modified form of the Times Mirror Typology that is suitable for telephone interviewing in that it requires many fewer questions. It also divides the public into fewer groups (9 vs. 11) and therefore can be used with more limited sample size surveys. It is our intention to utilize the modified typology scheme on each of our pre-election surveys in 1992. While this form of the typology does not offer the full analytical richness of the original scheme, we think it continues to be an important and highly useful way of looking at the electorate.

The modified typology is based on the important concepts about the homogeneity of various voting groups that we uncovered in our earlier research.

There are two core Republican groups:

Enterprisers: Enterprisers are fiscal conservatives who hold positive attitudes toward business and are anti-welfarist. They are affluent, well-educated and well-informed. Enterprisers are much less likely than other Americans to agree with the popular notion that the rich get richer and the poor get poorer (43% vs. 81%). Their pro-business stance leads them to differ with most Americans on the idea that too much power is concentrated in the hands of big companies. While 82% of other Americans feel that this is true, only 48% of Enterprisers agree. Enterprisers are also less likely to completely agree that society should make sure that everyone has an equal opportunity (55% vs. 41%).
